## **ACLX\* - Adabas Review Interface Messages**

These are messages produced by Adabas Review processing.

## **Overview of Messages**

ACLX01 | ACLX02

## Note:

Some of the ACLX\* messages are preceded by the Adabas database ID. These database IDs are not shown in the message texts in this documentation.

ACLX01 Old RUBX arrived

**Explanation** A RUBX for Adabas Review 4.4 or earlier has been received by the Adabas 8.2

nucleus. The older RUBX has been translated into a new format. This causes some performance degradation. New fields which do not exist in Adabas Review 4.4 are not

translated.

**Action** Determine which ADALNK contains an old Adabas Review module.

ACLX02 REV45 RUBX arrived and ignored

**Explanation** A RUBX for Adabas Review 4.5 or later has been received by an Adabas 8.1 nucleus.

The newer RUBX is ignored. The RUBX fields in Adabas Review are empty.

**Action** Use the Adabas LX library for Adabas Review 4.5 or use Adabas 8.2.
