# **ARST\* - Adabas Review Interface Messages**

# **Overview of Messages**

ARST01 | ARST02 | ARST06 | ARST07 | ARST08 | ARST09 | ARST10 | ARST11

ARST01 dbid GETMAIN failure, size= requested-getmain-size

**Explanation** A request for storage in the Adabas nucleus subtask ADARST failed.

**Action** Either determine what is using so much storage in the Adabas nucleus and correct the

problem; or increase the available storage.

ARST02 dbid LOAD FAILED FOR MODULE module

**Explanation** The specified module cannot be loaded.

**Action** Probably, the requested load module is missing.

ARST06 dbid Adabas Review subtask statistics

dbid Buffers in: count Buffers out: count

dbid UEX5 calls: count Timer calls: count posts: count

**Explanation** This message displays ADARST shutdown statistics.

**Action** None required. This message is for information only.

ARST07 *dbid* Error in Trans-port call. Review parameter set to NO

**Explanation** An abend occurred in the ADARST subtask of an Adabas nucleus. The abend did occur

in the Adabas Review Trans-port routine. To avoid subsequent failures, the ADARUN REVIEW parameter is switched from a hub ID to "NO." The Adabas Review hub is no

longer active for the Adabas nucleus.

**Action** Check the abend and contact your Software AG technical support representative. If

necessary, try switching the ADARUN REVIEW parameter to a hub ID again.

# ARST08 dbid Error in a non Trans-port routine. Review parameter set to NO

**Explanation** An abend occurred in the ADARST subtask of an Adabas nucleus. The abend did not

occur in the Adabas Review Trans-port routine. To avoid subsequent failures, the ADARUN REVIEW parameter is switched from a hub ID to "NO". The Adabas

Review hub is no longer active for the Adabas nucleus.

**Action** Check the abend and contact your Software AG technical support representative. If

necessary, try switching the ADARUN REVIEW parameter to a hub ID again.

#### ARST09 dbid Subtask ADARST detached

**Explanation** The subtask ADARST was detached for one of the following reasons:

- An error occurred when accessing the Adabas Review hub
- The Adabas Review hub returned Adabas response code 148 (ADARSP148 not active)

As long as the subtask is not attached, this database will not send data to the Adabas Review hub.

**Action** If the reason for the detachment is an unjustified Adabas response code 148

(ADARSP148), contact your Software AG technical support representative for

assistance.

### ARST10 dbid Unrecoverable abend in subtask ADARST

**Explanation** The subtask ADARST abended either due to an unrecoverable abend or to the second

call of the ESTAE (in this case see previous ARSTxx messages).

The subtask is deactivated and the database will not send data to the Adabas Review

hub.

**Action** It is not possible to reactive the subtask using the ADARUN REVIEW=hubid

parameter. You must restart the database to reactivate Adabas Review.

# ARST11 dbid Abend S0D6 occurred

**Explanation** This error messages can only occur in an Adabas nucleus, if an Adabas Review hub is

installed using the Trans-port feature. For some reason the PC number for the PC call is

invalid.

The ARST07 message and the ADARUN REVIEW parameter is set to NO.

**Action** Determine the reason for the abend S0D6. It is likely that the Adabas Review hub

has abended. If necessary, contact you Software AG support representative for further

assistance.
