CORD* - Adabas System Coordinator Daemon Messages

CORDnn messages are issued by the Adabas System Coordinator daemon.

Overview of Messages

```
CORD01S | CORD02S | CORD03E | CORD04I | CORD05E | CORD06E | CORD07E |
CORD08E | CORD10E | CORD11I | CORD12I | CORD13E | CORD14I | CORD15I |
CORD16S | CORD21I | CORD22E | CORD30E | CORD31E | CORD34E | CORD35S |
CORD37S | CORD38S | CORD39I | CORD40S | CORD45E | CORD46I | CORD47S |
CORD49W | CORD50E | CORD52I | CORD53I
```

CORD01S   COORDINATOR CANNOT INITIALIZE, GETMAIN ERROR

Explanation   The Adabas System Coordinator cannot initialize because of a memory shortage.

Action   Increase the region specification for the daemon job.

CORD02S   COORDINATOR CANNOT INITIALIZE, KERNEL LOAD ERROR

Explanation   The daemon failed to locate or load the runtime kernel module CORKRN.

Action   Ensure that the load library containing the kernel module is available to the job.

CORD03E   DDCARD OPEN ERROR: ## - TERMINATING

Explanation   The DDCARD control file could not be opened.

Action   Ensure that the daemon job has a DDCARD file containing the required control cards.

CORD04I   INPUT PARAMETER:

Explanation   The input parameters contained in the DDCARD file are echoed in the job message output file.

Action   None. This message is for information only.

CORD05E   INVALID PARAMETER:

Explanation   An invalid input parameter was found in the DDCARD file. The daemon terminates.

Action   Correct or delete the invalid parameter.

CORD06E   PRODUCT PARAMETER NOT SPECIFIED

Explanation   There was no PRODUCTparameter in the DDCARD file. The daemon does not know which product(s) to load.

Action   Add the required PRODUCT parameter and restart the daemon.

CORD07E   MPM FAILURE - FUNCTION: ## ERROR ##

Explanation   An error occurred when trying to:

- sign on to the Adabas SVC (Function=24 - x'18')

- sign off from the Adabas SVC (Function=20 - x'14')

- Post command completion to caller (Function=12 - x'0C')

- get the command queue element (CQE) (Function=8 - x'08')

Action   For a sign on error, ensure that the correct SVC and Node ID have been specified in the Adabas System Coordinator group member.

A sign-off error indicates an internal problem with the System Coordinator Daemon. Contact your Software AG technical support representative for assistance.

A Get CQE error or a Post error indicates a problem with the daemon caller. This will be accompanied by an Adabas "User Gone" message (ADAM91 or ADAM92), identifying the calling Job and session Id. Examine the calling job to determine the reason for the failure. Probably the job has abnormally terminated. No action is required in the Coordinator Daemon.

CORD08E   IOR FAILURE - FUNCTION: ## ERROR ##

Explanation   An error occurred during an ADAIOR service call.

Action   Contact your Software AG technical support representative for assistance.

CORD10E   GETMAIN FOR COMMAND QUEUE FAILED

Explanation   The daemon cannot acquire memory for the command queue.

Action   Increase the region specification for the Adabas System Coordinator daemon task.

CORD11I   CORD11I SYSCO IS ACTIVE ON NODE ##### ###

Explanation   The daemon successfully signed on to the Adabas SVC and is ready for communication. The message indicates the node and SVC number used.

Action   None. This message is for information only.

CORD12I   OPER TYPEIN: #################

Explanation   The operator entered a console command to the daemon. The command is echoed back to the message output file.

Action   None. This message is for information only.

CORD13E   INVALID OPERATOR COMMAND

Explanation   The command entered is not valid.

Action   Correct the command and enter it again.

CORD14I   TARGET ##### TERMINATION IN PROGRESS

Explanation   The daemon is terminating because of operator request or unrecoverable error.

Action   None. This message is for information only.

CORD15I   TARGET ##### ENDED NORMALLY

Explanation   The daemon terminated normally as a result of an operator request.

Action   None. This message is for information only.

CORD16S   TARGET ##### ENDED ABNORMALLY

Explanation   The daemon terminated abnormally as a result of a previous error.

Action   A previous message will identify the cause of the abnormal termination. Examine the message and take appropriate recovery action.

CORD21I   OPERATOR COMMAND PROCESSED SUCCESSFULLY

Explanation   An operator command completed successfully.

Action   None. This message is for information only.

CORD22E   **LOAD FOR MODULE: ######## FAILED**

Explanation   The requested module could not be located or loaded.

Action   Ensure that the requested module is available to the Adabas System Coordinator daemon task.

CORD30E   **GETMAIN FOR PRODUCT PARM BLOCK FAILED**

Explanation   A memory allocation failed during the initialization.

Action   Increase the region specification for the job.

CORD31E   **CAB ALLOCATION ERROR**

Explanation   A memory allocation failed during the initialization of the daemon.

Action   Increase the region specification for the job.

CORD34E   **ASA ALLOCATION ERROR**

Explanation   A memory allocation failed during the initialization of the daemon.

Action   Increase the region specification for the job.

CORD35S   **CONFIGURATION MODULE CORCFG CANNOT BE LOCATED**

Explanation   The configuration module CORCFG cannot be loaded. This module contains the SVC, DBID, and file number for reading the configuration file. The daemon will not function correctly without this module.

Action   Refer to the Adabas System Coordinator Installation documentation for information about assembling a configuration module.

CORD37S   **SYSCO DAEMON member-name NOT FOUND IN CONFIGURATION FILE, RESPONSE=nnnn, SUBCODE=nnnn**

Explanation   The named Adabas System Coordinator group member was not found in the group in the configuration file. Every daemon must have an equivalent group member parameter.

Action   Add the member entry for this daemon to the appropriate Adabas System Coordinator group.

CORD38S   **GROUP group-name NOT FOUND IN CONFIGURATION FILE, RESPONSE=nnnn, SUBCODE=nnnn**

Explanation The named group cannot be located.

Action   An error occurred while searching for the Adabas System Coordinator group parameters. Define the Adabas System Coordinator group. If the problem persists, contact your Software AG technical support representative.

CORD39I   **SHUTDOWN PENDING**

Explanation A shutdown request was entered. One or more of the subcomponents of the Adabas System Coordinator daemon suspended the request until it completes its own shutdown processing. The daemon should terminate when this is completed.

Action   None. This message is for information only.

CORD40S   **ABEND #### PSW ######## ########**

Explanation An error occurred in the Adabas System Coordinator daemon. The registers, PSW, and failing module at the time of the error are displayed. The Adabas System Coordinator writes additional diagnostic information to the CORDUMP file, deletes any common memory pools in use, and terminates.

Action   Contact your Software AG technical support representative.

CORD45E   **THREAD ######## TIMEOUT, TARGET=#####, USER=########**

Explanation The Adabas System Coordinator daemon sent an Adabas command to the indicated target, and has not received a response within the timeout interval as specified by DDCARD parameter CT.

Action   Check that the target database is operating correctly. If the problem persists, try increasing the CT timeout value. If there is still a problem, contact your Software AG technical support representative.

CORD46I   **######## Start pending, configuration file (dbid ##### fnr #####) not active**

Explanation An Adabas System Coordinator daemon has been started, but the required configuration file is not active. The daemon will wait for 60 seconds and try again. If the configuration file is still not active after 60 minutes the daemon will terminate.

Action   Start the database that contains the configuration file.

CORD47S   **Halt-Load library is not Authorized**

Explanation   z/OS only. An Adabas System Coordinator daemon has been started from a load library
                  that is not APF-authorized.

Action   Ensure the specified load library is authorized and restart the daemon.

CORD49W   **(jobname) shutdown rejected, configuration file (dbid ddddd fnr fffff) not active**

Explanation   A daemon shutdown request was made, but either the primary or the alternate
                  configuration file is not active.

                  This message appears only when Alternate Configuration File support is specified.

Action   Make the required Configuration File available and re-issue the shutdown request.

CORD50E   **Shutdown rejected**

Explanation   A daemon shutdown request was made, but there are active client DTR jobs connected
                  to the daemon.

                  This message will be preceded by message CAS004I, identifying the names of the
                  active DTR job(s).

Action   Terminate the active client jobs and re-issue the shutdown request.

CORD52I   **Configuration file: ##### / #####**

Explanation   This message shows the database ID and file number of the configuration file in use by
                  this System Coordinator daemon.

Action   None. This message is for information only.

CORD53I   **Alternate file : ##### / #####**

Explanation   This message shows the database ID and file number of the alternate configuration file
                  in use by this System Coordinator daemon. The message only appears if an alternate
                  configuration file has been specified.

Action   None. This message is for information only.
