

# Software AG Licensing Messages

The messages in this document may be produced by Software AG mainframe license processing or when using the license utility, LICUTIL.

## Overview of Messages

MLC1001	MLC1002	MLC1003	MLC1004	MLC1005	MLC2001	MLC2002
MLC2003	MLC2004	MLC2005	MLC2006	MLC2007	MLC2008	MLC2009
MLC2010	MLC9001	MLC9002	MLC9003	MLC9004	MLC9005	MLC9006
MLC9007	MLC9009	MLC9010				

---

### **MLC1001 CPU-ID *cpuid* is not defined in your product license**

**Explanation** The CPU ID listed in the message (*cpuid*) is not defined in your product license. Either your license file is invalid or you have attempted to run the Software AG mainframe product on a machine for which it is not licensed.

**Action** Install and run the Software AG product on the machine for which it is licensed. If the problem persists, contact your Software AG sales representative for assistance.

### **MLC1002 LPAR name *lparname* is not defined in your product license**

**Explanation** The LPAR name listed in the message (*lparname*) is not defined in your product license. Either your license file is invalid or you have attempted to run the Software AG mainframe product on a machine for which it is not licensed.

**Action** Install and run the Software AG product on the machine for which it is licensed. If the problem persists, contact your Software AG sales representative for assistance.

### **MLC1003 Machine capacity *value* higher than MSUs in your product license**

**Explanation** The machine capacity (*value*) of the machine on which you have attempted to install and run the Software AG mainframe product exceeds the capacity allowed in your product license. Either your license file is invalid or you have attempted to run the Software AG mainframe product on a machine for which it is not licensed.

**Action** Contact your Software AG sales representative for assistance.

### **MLC1004 The product license will expire on *timestamp***

**Explanation** This warning message provides the date and time (*timestamp*) when the license will expire for this Software AG mainframe product.

**Action** No action is required for this warning message. However, you should contact your Software AG sales representative to obtain an updated license soon.

**MLC1005      We assume CPU-ID *cpuid* as your DR or DR testing environment**

**Explanation**    The CPU ID listed in the message (*cpuid*) is not defined in your product license. Therefore we assume that you are running in a disaster recovery environment.

**Action**            If you are running in a disaster recovery environment, no action is required for this warning message. If you are not running in a disaster recovery environment, contact your Software AG sales representative to obtain an updated license.

**MLC2001            The product license is invalid**

**Explanation**        Your product license is invalid.

**Action**              Contact your Software AG sales representative for assistance.

**MLC2002      The product license key is invalid**

**Explanation**    The license file for the Software AG mainframe product is invalid.

**Action**            Verify that the license file was transferred correctly to the mainframe host and that it is still in ASCII format. If the problem persists, contact your Software AG sales representative for assistance.

**MLC2003      The product license is not for *value***

**Explanation**    The license file for the Software AG mainframe product is not for the operating system (OS), product code, or product version listed in the message (*value*).

**Action**            Use the correct license file. If the problem persists, contact your Software AG sales representative for assistance.

**MLC2004      The product license has expired on *timestamp***

**Explanation**    The product license has expired. The date and time it expired is given in the message (*timestamp*).

**Action**            Contact your Software AG sales representative for assistance.

**MLC2005      Tag missing in product license: *tagname***

**Explanation**    The tag with the name listed in the message (*tagname*) is missing in your product license.

**Action**            Contact your Software AG sales representative for assistance.

**MLC2006     Invalid tag value in product license: *tagname***

**Explanation**     The value of the tag with the name listed in the message (*tagname*) is invalid in your product license.

**Action**             Contact your Software AG sales representative for assistance.

**MLC2007     Current CPU-ID not found for product license check**

**Explanation**     The CPU ID of the CPU on which the product license check was run is not found in the license file.

**Action**             Contact your Software AG sales representative for assistance.

**MLC2008             The number of MSU values in the product license is incorrect**

**Explanation**     The machine capacity covered by the product license is incorrect.

**Action**             Contact your Software AG sales representative for assistance.

**MLC2009     ExtendedRights setting *value* not allowed under this system**

**Explanation**     The ExtendedRights setting listed in the message (*value*) is not supported by your system.

**Action**             Contact your Software AG sales representative for assistance.

**MLC2010     Soft capping is not allowed with ExtendedRights *value***

**Explanation**     Your product license does not allow soft capping with the ExtendedRights setting listed in the message (*value*).

**Action**             Contact your Software AG sales representative for assistance.

**MLC9001             License exceeds maximum size of 8000**

**Explanation**     Your license file is too large.

**Action**             Contact your Software AG sales representative for assistance.

**MLC9002      Error opening license file input**

**Explanation**    An error occurred during an attempt to open the license file input.

**Action**            Investigate the cause of the error, paying special attention to the corresponding error messages produced by the operating system. Contact your Software AG sales or support representative for assistance.

**MLC9003      Error reading license file input**

**Explanation**    An error occurred during an attempt to read the license file input.

**Action**            Investigate the cause of the error, paying special attention to the corresponding error messages produced by the operating system. Contact your Software AG sales or support representative for assistance.

**MLC9004      Error opening license file assembler output**

**Explanation**    An error occurred during an attempt to open the license file assembler output.

**Action**            Investigate the cause of the error, paying special attention to the corresponding error messages produced by the operating system. Contact your Software AG sales or support representative for assistance.

**MLC9005      Error writing license file assembler output**

**Explanation**    An error occurred during an attempt to write the license file assembler output.

**Action**            Investigate the cause of the error, paying special attention to the corresponding error messages produced by the operating system. Contact your Software AG sales or support representative for assistance.

**MLC9006      License converted to assembler output records written to output file**

**Explanation**    The license file was successfully converted to an assembler source module. Output records were written to the output file.

**Action**            No action is required for this informational message.

**MLC9007      Error loading license module *modulename* *errorcode***

**Explanation**    The LOADLIC function (z/OS only) tried to load a license module from the load library and received an error (*errorcode*) from the operating system.

**Action**            Correct the LICUTIL input, removing duplicate LICUTIL function calls. Check that the license module (*modulename*) is in the load library, that the correct library is referenced in the JCL, and that the module name is specified correctly in the LOADLIC statement (case sensitive, a blank between LOADLIC and *modulename*).

**MLC9009      DMS Error**

**Explanation**    A DMS error occurred (only in BS2000/OSD environments).

**Action**            Investigate the cause of the BS2000/OSD DMS error. If you need assistance, contact your Software AG support representative.

**MLC9010      LOADLIC can only be issued once, before any DISPLAY, CHECK, MAKE or READ**

**Explanation**    The LOADLIC function (z/OS only) can only be performed once per LICUTIL session. LOADLIC must not be preceded by the DISPLAY, CHECK or READ function. These functions can only locate the license module *after* the LOADLIC.

**Action**            Correct the LICUTIL input, removing duplicate LICUTIL function calls. Change the call order so that the LOADLIC precedes any DISPLAY, CHECK or READ.
