

NOBATCH: Set Print Width to 80 Characters Per Line

```
ADAICK NOBATCH [NOUSERABEND]
```

The printout width is set to 80 characters per line. See the BATCH function for information about resetting the printout width.

Note:

The NOOPEN parameter can be specified for this function, but is ignored by Adabas.

Optional Parameter

NOUSERABEND: Termination without Abend

When a parameter error or a functional error occurs while this utility function is running, the utility ordinarily prints an error message and terminates with user abend 34 (with a dump) or user abend 35 (without a dump). If NOUSERABEND is specified, the utility will *not* abend after printing the error message. Instead, the message "*utility* TERMINATED DUE TO ERROR CONDITION" is displayed and the utility terminates with condition code 20.

Note:

When NOUSERABEND is specified, we recommend that it be specified as the first parameter of the utility function (before all other parameters). This is necessary to ensure that its parameter error processing occurs properly.
