Installing with Natural Security

If Natural Security is installed, define at least the following libraries to it:

SYSAOS
SYSTRG
SYSAEO
SYSSPT

Define the following libraries as needed:

- For Adabas Vista: SYSAVI and SYSMV*vrs*

- For Adabas Fastpath: SYSAFP and SYSMW*vrs*

- For Adabas SAF Security: SYSAAF and SYSMX*vrs*

- For Adabas Transaction Manager: SYSATM and SYSMT*vrs*

Software AG recommends you define all of these libraries as protected.

Specify the start-up program for SYSAOS as MENU. Do not specify a start-up program name for the other libraries.

Natural Security must be installed before implementing Adabas Online System Security. See the *Adabas Security* documentation for more information. For information about installing Natural Security for use with AOS Security, see the *Natural Security* documentation.

Natural Security includes the ability to automatically close all open databases when the Natural command mode's LOGON function of Adabas Online System is invoked.
