About this Documentation

This document describes the messages and response codes which may be encountered during Adabas Vista execution.

This documentation is organized in the following topics:

- *AVI-xxxx-xx - Adabas Vista Processing Messages*
- *AVInnn - Adabas Vista Database Processing Messages*
- *Adabas Nucleus Response Codes .*

  The primary response codes associated with Adabas Vista are response codes 3 (ADARSP003), 9 (ADARSP009), 17 (ADARSP017), 53 (ADARSP053), and 249 (ADARSP249) and its subcodes. Adabas Vista makes extensive use of the subcode field in the Adabas control block. For information about extracting this subcode, refer to section *Error Handling*.
