

About this Documentation

This document describes the messages and response codes which may be encountered during Adabas System Coordinator execution.

This document is organized in the following topics:

●	<i>Message Format</i>	Describes the basic format of messages.
●	<i>CAS* - Adabas System Coordinator Cluster Application Service Messages</i>	Messages issued from the clustered application service (CAS) operating in the Adabas System Coordinator daemon.
●	<i>COR* - Adabas System Coordinator Kernel Messages</i>	Messages issued by the Adabas System Coordinator kernel.
●	<i>CORD* - Adabas System Coordinator Daemon Messages</i>	Messages issued by the Adabas System Coordinator daemon.
●	<i>POP* - Adabas System Coordinator Server Component Messages</i>	Messages issued from the Adabas System Coordinator Adabas server component.
●	<i>Adabas Nucleus Response Codes</i>	Describes Adabas nucleus response and subcodes. Of particular interest to Adabas System Coordinator are the subcodes issued when an Adabas command is returned with response code 101.
