

# Integration with webMethods Optimize for Infrastructure

Adabas Review key performance indicator (KPI) statistics are provided to webMethods Optimize for Infrastructure. Using the Optimize component of webMethods Optimize for Infrastructure, you can monitor the status of these statistics as well as the overall status of your system. This support is available in version 8.2 (and later versions) of webMethods Optimize for Infrastructure.

The key performance indicator statistics that are passed from Adabas Review to Optimize provide information about the Adabas Review system itself and not about the monitoring data collected by Adabas Review. The KPIs that are passed include statistics such as the number of records sent to Adabas Review, the CPU. time used by Adabas Review, the memory usage of Adabas Review, and number of I/Os performed by Adabas Review.
