

ADADCK Utility Error Messages

Overview of Messages

ERROR-121	ERROR-123	ERROR-124	ERROR-125	ERROR-127	ERROR-128
ERROR-130	ERROR-131	ERROR-132	ERROR-133	ERROR-134	ERROR-135
ERROR-136	ERROR-137				

ERROR-121 Invalid record length found

Explanation The record length is negative, zero, or greater than the permitted maximum (MAXRECL value).

DSRABN=xxxxxxxx (nnnn), OFFSET=xxxxxx (nnn)

ERROR-123 Duplicate ISN found

Explanation The same ISN is found twice in the same DS block.

DSRABN=xxxxxxxx (nnnn), OFFSET=xxxxxx (nnn)

ERROR-124 Invalid DSST entry found

Explanation The following information is provided to identify the error:

DSRABN=xxxxxxxx (nnnn), REQUIRED % x, PRESENT % x, DSSTRABN=xxxxxxxx (nnnn), OFFSET=xxxxxx (nnn)

Block size minus padding = xxx (nn) Size of block in use = xxx (nn)

ERROR-125 Invalid record length

Explanation The DSCHECK function found that either the sum of all record lengths in one Data Storage block is not equal to the block length minus 4; or that the record length is zero.

DSRABN=xxxxxxxx (nnnn), OFFSET=xxxxxx (nnn)

ERROR-127 Invalid block length

Explanation The block length field contains either

- a negative value; or
- a number larger than the physical block size.

DSRABN=xxxxxxxx (nnnn), OFFSET=xxxxxx (nnn)

ERROR-128 Invalid ISN found

Explanation An ISN was detected that is either zero or greater than the maximum allowed (TOPISN) value.

**ERROR-130 Spanned record with
ISN *isnumber*
DS RABN *rabn*
One of the following errors occurred:
Neither primary spanned record bit nor
secondary spanned record bit is switched on.**

Explanation The header of the spanned record with the ISN number listed in the message (*isnumber*) is erroneous.

Action Correct the ISN or the ISN of the next spanned record or switch on the primary spanned record bit or the secondary spanned record bit (but not both). To correct the header of a spanned record, contact your Software AG technical support representative.

**ERROR-131 Spanned data storage record with
ISN *isnumber* DS RABN *rabn*
contains inconsistencies.
One of the following errors occurred:
ISN of next secondary spanned record is zero.
Bits of secondary spanned record and primary record are both switched on.**

Explanation The header of the primary spanned record with the ISN number listed in the message (*isnumber*) is erroneous.

Action Correct the ISN of the primary spanned record, correct the ISN of the next secondary spanned record, or switch off the secondary spanned record bit. To correct the header of a spanned record, contact your Software AG technical support representative.

ERROR-132 Secondary spanned record with ISN *isnumber* not found.

Explanation The header of the secondary spanned record with the ISN number listed in the message (*isnumber*) cannot be found in Data Storage.

Action Contact your Software AG technical support representative for assistance.

ERROR-133 Duplicate primary spanned DS ISN *isnumber* found - DS RABN *rabn*

Explanation The ISN number listed in the message (*isnumber*) appears in two primary spanned records in Data Storage. ISNs should be unique.

Action Contact your Software AG technical support representative for assistance.

ERROR-134 Duplicate secondary spanned DS ISN *isnumber* found - DS RABN *rabn*

Explanation The ISN number listed in the message (*isnumber*) appears in two secondary spanned records in Data Storage. ISNs should be unique.

Action Contact your Software AG technical support representative for assistance.

ERROR-135 Secondary spanned record with ISN *isnumber1* not found. Secondary ISN *isnumber2* DSRABN *rabn* points to secondary ISN which was not found in data storage

Explanation The ISN for a secondary spanned record listed in the message (*isnumber1*) could not be found in Data Storage. The ISN of the secondary spanned record that points to this ISN is also given in the message (*isnumber2*).

Action Contact your Software AG technical support representative for assistance.

ERROR-136 Secondary ISN *isnumber* found in Data Storage RABN *rabn* but not referenced by a primary ISN.

Explanation A secondary spanned record was found in Data Storage is not referenced by a primary ISN. The ISN of the secondary spanned record is given in the message (*isnumber*).

Action Contact your Software AG technical support representative for assistance.

ERROR-137 Primary ISN *isnnumber1* not found. Primary ISN was referenced in secondary ISN *isnnumber2* DS RABN *rabn* - removing from the FROMRABN/TORABN will most likely resolved the warning.

Explanation The ISN for a primary spanned record that was referenced by a secondary spanned record was not found in Data Storage during the ADADCK run. The ISN numbers for both the primary spanned record (*isnnumber1*) and the secondary spanned record (*isnnumber2*) are given in the message.

The most likely cause of this error is that the FROMRABN and TORABN parameters were specified for the ADADCK run and the FROMRABN parameter references a secondary RABN rather than a primary RABN. We recommend that the FROMRABN parameter reference a primary RABN instead.

Action If you have used the FROMRABN parameter, verify that it points to a primary RABN and not a secondary RABN. Then try the job again. You might also consider removing the FROMRABN and TORABN parameters from the run.

If problems persist, contact your Software AG technical support representative for assistance.
