ART0102I **An Event Replicator Target Adapter engine is started and waiting for work**

Explanation An Event Replicator Target Adapter has successfully started and is waiting for work.

Action No action is required for this informational message.

ART0103E **Unable to load resource bundle; message**

Explanation This is an internal error.

Action Contact your Software AG technical support representative for assistance.

ART0104I **Version information *version***

Explanation The version of the Event Replicator Target Adapter that is running is given in the message (*version*).

Action No action is required for this informational message.

ART0105I **Engine shutdown requested**

Explanation A request has been made to shut down the Event Replicator Target Adapter.

Action No action is required for this informational message.

ART0106I **Main processing loop shutdown requested**

Explanation A request has been made to shut down the main processing loop of the Event Replicator Target Adapter.

Action No action is required for this informational message.

ART0107I **Operation message: *input-msg***

Explanation An operation message (*input-msg*) is listed in the text of this message.

Action No action is required for this informational message.

ART0108E Invalid or unprocessed message received: *msg*

Explanation An invalid or unprocessed message was received. The invalid message (*msg*) is provided in the text of this message.

Action Review any previous messages to determine the primary cause of the problem. If the problem persists, contact your Software AG technical support representative for assistance.

ART0109E Cannot connect to target

Explanation An attempt to connect to a defined target failed.

Action Evaluate the target definition to determine the cause of the problem. If you cannot determine the cause of the problem, contact your Software AG technical support representative for assistance.

ART0110E Operation status: *status*

Explanation The status of the failed operation (*status*) is provided in the text of this message. This message accompanies other error messages. Possible statuses are "Failed" and "FailedRetry".

Action Review the other messages that accompany this one to determine the cause of the problem. If you cannot determine the cause of the problem, contact your Software AG technical support representative for assistance.

ART0111E Incorrect message: *msg*

Explanation The message in error (*msg*) is provided in the text of this message, which accompanies other error messages.

Action Review the other messages that accompany this one to determine the cause of the problem. If you cannot determine the cause of the problem, contact your Software AG technical support representative for assistance.

ART0112I Database retry count is 0

Explanation The database retry count setting has reached the value of zero (0). No further database retries are attempted and the source is closed.

Action Restart the database and reopen the source.

ART0113I **Waiting *secs* seconds before database retry *number* of *total***

Explanation The Event Replicator Target Adapter is waiting the number of seconds listed in the message (*secs*) before attempting to reconnect to the source database. The retry attempt number (*number*) and the total number of retry attempts defined for the source (*total*) are also given in the message.

Action No action is required for this informational message.

ART0114I **Attempting database retry *number* of *total***

Explanation The Event Replicator Target Adapter is attempting to reconnect to a source database. The retry attempt number (*number*) and the total number of retry attempts defined for the source (*total*) are given in the message.

Action No action is required for this informational message.

ART0115E **XSLT or XML document is null**

Explanation The style sheet (XSLT) or XML document to be used in Event Replicator Target Adapter processing is null or cannot be found. This is an internal error.

Action Contact your Software AG technical support representative for assistance.

ART0116I **Committing invalid or unprocessed message**

Explanation The invalid message was committed because the **Commit Unprocessed Message** option was set to true. Processing continues.

Action No action is required for this informational message.

ART0117I **IVP message received and processed**

Explanation The installation verification procedure (IVP) message was received and processed successfully.

Action No action is required for this informational message.

ART0118I **Received *count* request**

Explanation The number of requests received is listed in the message (*count*).

Action No action is required for this informational message.

ART0119E **Received unknown message *msg***

Explanation An unknown message was received.

Action Contact your Software AG technical support representative for assistance.

ART0120E **Cannot convert input message from *source* code page *num1* to *num2***

Explanation The input message listed in the message text could not be converted from one code page (*num1*) to another (*num2*).

Action Contact your Software AG technical support representative for assistance.

ART0121E **Current messages**

Explanation This message accompanies message ARTO108E.

Action Review all the messages to determine the cause of the problem. If the problem persists, contact your Software AG technical support representative for assistance.

ART0122I **Problems writing file; directory must exist: *dirname***

Explanation A file could not be written because the directory listed in the message did not exist.

Action Create the directory and restart the Event Replicator Target Adapter.

ART0123E **Unprocessed data *count* bytes in buffer *buf***

Explanation An internal error has occurred.

Action Contact your Software AG technical support representative for assistance.

ART0124I **Successful database reconnect for *target* target**

Explanation An attempt to reconnect to the database target was successful.

Action No action required for this informational message

ART0125I **Software AG License check *license***

Explanation A Software AG license check occurred for the license shown in the message.

Action No action required for this informational message

ART0303I Initial-state process started for: *isname*

Explanation The Event Replicator Target Adapter has started processing an initial-state request. The name of the initial-state definition (*isname*) is listed in the message.

Action No action is required for this informational message.

ART0304I Initial-state process completed for: *isname*

Explanation The Event Replicator Target Adapter has completed processing an initial-state request. The name of the initial-state definition (*isname*) is listed in the message.

Action No action is required for this informational message.

ART0305I Initial-state erroneous request rejected

Explanation An invalid initial-state request was rejected. It was not processed.

Action No action is required for this informational message. However, you might want to review the invalid initial-state request to determine why it was not processed.

ART0307I Normal Event Replicator Server session started message received from: *reptor-id*

Explanation A normal Event Replicator Server session has started and a message has been received from it. The Event Replicator Server ID is listed in the message (*reptor-id*).

Action No action is required for this informational message.

ART0308I Event Replicator Server restart after abnormal end

Explanation The Event Replicator Server has restarted after it ended abnormally.

Action No action is required for this informational message although you might want to review the error messages provided by the Event Replicator Server to determine why it ended abnormally.

ART0309I Normal Event Replicator Server session termination message received from: *reptor-id*

Explanation A normal Event Replicator Server session has terminated. The Event Replicator Server ID is listed in the message (*reptor-id*).

Action No action is required for this informational message.

ART0310I Replication deactivated**Explanation** Replication has been deactivated (stopped).**Action** No action is required for this informational message.**ART0311I Replication reactivated****Explanation** Replication has been reactivated (started).**Action** No action is required for this informational message.**ART0314I Replay process (ADARPL) started****Explanation** The ADARPL utility has started to resend replicated data from the database protection log (PLOG) to the target RDBMS. For more information, read about the ADARPL utility in your Event Replicator for Adabas documentation.**Action** No action is required for this informational message.**ART0315I Replay process (ADARPL) ended****Explanation** The ADARPL utility has completed resending replicated data from the database protection log (PLOG) to the target RDBMS. For more information, read about the ADARPL utility in your Event Replicator for Adabas documentation.**Action** No action is required for this informational message.**ART0316I Event Replicator Server replication definitions refreshed****Explanation** The Event Replicator Server replication definitions have been refreshed via an RPLREFRESH command.**Action** No action is required for this informational message.**ART0317I ADALOD UPDATE started****Explanation** A run of the ADALOD UPDATE utility function has started.**Action** No action is required for this informational message.

ART0318I ADALOD UPDATE ended

Explanation A run of the ADALOD UPDATE utility function has ended.

Action No action is required for this informational message.

ART0319I ADALOD LOAD ended. Source: *src* Target: *target*

Explanation A run of the ADALOD LOAD utility function has ended.

Action No action is required for this informational message.

ART0320E Unknown status message *message*

Explanation An unknown status message was encountered during Event Replicator Target Adapter processing. The status message is given in the message text.

Action Contact your Software AG technical support representative for assistance.

ART0321E Unknown URBS operation *operation*

Explanation An unknown URBS operation was attempted. The type of operation attempted is listed in the message text.

Action Contact your Software AG technical support representative for assistance.

ART0322E Invalid DBID *dbid* or file number *fn*

Explanation An invalid database ID or file number was encountered during processing.

Action Contact your Software AG technical support representative for assistance.

ART0323I Receiving LODS message: Source: *src* Target: *target*

Explanation An LODS message is being received. The data source and target are listed in the message.

Action No action is required for this informational message.

ART0324E Receiving unknown message

Explanation An unknown message was received during processing.

Action Contact your Software AG technical support representative for assistance.

ART0325I Receiving AUT1 message (Adabas utility execution)

Explanation An AUT1 message produced by the execution of an Adabas utility is being received.

Action No action is required for this informational message.

ART0401I Testing database connections

Explanation The Event Replicator Target Adapter is testing its database connections.

Action No action is required for this informational message.

ART0402I Database information at startup:

Explanation This message is the introductory message for a series of other informational messages about the databases to which the Event Replicator Target Adapter has connections.

Action No action is required for this informational message.

ART0403I Connector protocol: *protocol-type* port: *port*

Explanation This message lists the protocol type and port number used by the Event Replicator Target Adapter Tomcat engine.

Action No action is required for this informational message.

ART0404I Using connector port: *conn-port* port: *port*

Explanation This message lists the default HTTP port number that will be used.

Action No action is required for this informational message.

ART0405I Adabas Replicator servlet shutdown started

Explanation The Event Replicator Server is shutting down.

Action No action is required for this informational message.

ART0406I Adabas Replicator servlet shutdown complete

Explanation The Event Replicator Server shutdown is complete.

Action No action is required for this informational message.

ART0407I Testing connection to database resource *id*

Explanation A test is being performed that connects to the database resource listed in the message (*id*).

Action No action is required for this informational message.

ART0408I Database testing complete

Explanation Tests on the database have completed.

Action No action is required for this informational message.

ART0409I JMS information at startup:

Explanation This message is the introductory message for a series of other informational messages about the JMS to which the Event Replicator Target Adapter has connections.

Action No action is required for this informational message.

ART0410I JMS testing complete

Explanation Tests on the JMS have completed.

Action No action is required for this informational message.

ART0501I EntireX Broker information *info*

Explanation This message displays information about a webMethods EntireX source used to convey replicated Adabas data to the Event Replicator Target Adapter.

Action No action is required for this informational message.

ART0502I EntireX Broker source shutdown requested

Explanation A request is being processed to close a webMethods EntireX source used to convey replicated Adabas data to the Event Replicator Target Adapter.

Action No action is required for this informational message.

ART0503I **EntireX Broker source shutdown requested; processing: *state* userstop: *xxxx***

Explanation A webMethods EntireX source used to convey replicated Adabas data to the Event Replicator Target Adapter is being closed. The current state of the source is displayed in the message.

Action No action is required for this informational message.

ART0504I **EntireX Broker source close complete**

Explanation A webMethods EntireX source used to convey replicated Adabas data to the Event Replicator Target Adapter has been closed.

Action No action is required for this informational message.

ART0505I **EntireX Broker UOW rolled back ID: *id***

Explanation The webMethods EntireX unit of work ID was rolled back. This is an internal process.

Action No action is required for this informational message.

ART0506I **EntireX Broker prefetch size reached: *size***

Explanation The defined prefetch size for the webMethods EntireX source has been reached. The defined prefetch size is given in the message (*size*).

Action No action is required for this informational message. However, you might consider increasing the defined prefetch size. Note that increasing the prefetch size will increase the memory requirements.

ART0507E **EntireX Broker send error class: *class* code: *code* message: *msg***

Explanation An error has occurred during an attempt to send data to a webMethods EntireX source. The error class (*class*), message code (*code*) and message text (*msg*) are given in the message.

Action Refer to your webMethods EntireX documentation for additional information.

ART0508E **EntireX Broker error class: *class* code: *code* message: *msg***

Explanation An error has occurred during an attempt to use a webMethods EntireX source. The error class (*class*), message code (*code*) and message text (*msg*) are given in the message.

Action Refer to your webMethods EntireX documentation for additional information.

ART0509E EntireX Broker exception: *info*

Explanation An exception occurred during an attempt to use a webMethods EntireX source. The exception information (*info*) is given in the message.

Action Contact your Software AG technical support representative for assistance.

ART0510E EntireX Broker receive error class: *class* code: *code* message: *msg*

Explanation An error has occurred during an attempt to receive data from an webMethods EntireX source. The error class (*class*), message code (*code*) and message text (*msg*) are given in the message.

Action Refer to your webMethods EntireX documentation for additional information.

ART0511E EntireX Broker logon error ID: *class* service: *service* message: *msgtxt*

Explanation An error has occurred during an attempt to log into an webMethods EntireX source. The error class (*class*), service name (*service*), and message code (*msgtxt*) are given in the message.

Action Verify that the correct logon information (user ID, token, and password) is provided in the webMethods EntireX source definition. Correct it as necessary and try again.

ART0512E EntireX Broker error on: *id* cause: *exx-cause*

Explanation An error occurred during an attempt to use the webMethods EntireX source whose ID is listed in the message (*id*). The cause of the error is also listed in the message (*exx-cause*).

Action Contact your Software AG technical support representative for assistance.

ART0513E EntireX Broker commit error message: *err-msg*

Explanation An error occurred during an attempt to use a webMethods EntireX source definition. The webMethods EntireX error message (*err-msg*) is listed in the message.

Action Contact your Software AG technical support representative for assistance.

ART0514E EntireX Broker cannot open Broker trace log file: *fn*

Explanation An error occurred during an attempt to open the webMethods EntireX trace log file. The file name of the log file is given in the message (*fn*).

Action Verify that the correct file name is specified for the webMethods EntireX trace log file in the webMethods EntireX definitions. If it is not, correct the name and try again. If the problem persists, contact your Software AG support representative for assistance.

ART0515I EntireX Broker trace level: *lvl* trace file: *fn*

Explanation This message identifies the trace level (*lvl*) and file name (*fn*) used by the Event Replicator Target Adapter for webMethods EntireX sources.

Action No action is required for this informational message.

ART0516I EntireX Broker receive complete: time: *count* Ms length: *length* UowStatus: *status*

Explanation A webMethods EntireX source received data from replication. The length of time (in microseconds) for the receive operation (*count*), the length of the data received (*length*), and the unit of work status of the receive operation (*status*) are given in the message. Values for the unit of work status are "First", "Middle" or "Last".

Action No action is required for this informational message.

ART0517E EntireX Broker commit error class: *class* code: *code* uowid: *uowid* message: *msg*

Explanation An error occurred during a commit attempt for the webMethods EntireX source. The error class (*class*), EntireX message code (*code*), EntireX UOWID (*uowid*) and EntireX message text (*msg*) are listed in the message.

Action Contact your Software AG technical support representative for assistance.

ART0518E EntireX Broker rollback error class: *class* code: *code* message: *msg*

Explanation An error occurred during a rollback attempt for the webMethods EntireX source. The error class (*class*), EntireX message code (*code*) and EntireX message text (*msg*) are listed in the message.

Action Contact your Software AG technical support representative for assistance.

ART0519E **EntireX Broker deregister error host: *host-id* service: *service* message: *msg***

Explanation An error occurred during an attempt to deregister a webMethods EntireX source. The EntireX ID (*host-id*), service (*service*) and message text (*msg*) are listed in the message.

Action Contact your Software AG technical support representative for assistance.

ART0520E **EntireX Broker user ID required**

Explanation A valid webMethods EntireX user ID is required but was not supplied.

Action Supply a valid webMethods EntireX user ID and try again.

ART0521E **EntireX Broker token required**

Explanation A valid webMethods EntireX token is required but was not supplied.

Action Supply a valid webMethods EntireX token and try again.

ART0601I **Save file *fn* with data: *dddd***

Explanation An attempt to save the file listed in the message (*fn*) with the data listed in the message (*dddd*) was successful.

Action No action is required for this informational message.

ART0602E **Read resource failed for: *resource-id* status code: *code***

Explanation An attempt to read from the resource listed in the message (*resource-id*) failed. The status code of the attempt is given in the message (*code*).

Action Contact your Software AG technical support representative for assistance.

ART0603I **Retrying resource read for: *resource-id***

Explanation An attempt is being made to read from the resource listed in the message (*resource-id*).

Action No action is required for this informational message.

ART0604E WebDAV error: *err-code*

Explanation A WebDAV error occurred during Event Replicator Target Adapter processing.

Action Verify that the web service target URL is correct and try again. If the problem persists, contact your Software AG technical support representative.

ART0605E WebDAV repository is not accessible *err-code*

Explanation The WebDAV repository cannot be accessed.

Action Verify that the web service target URL is correct and try again. If the problem persists, contact your Software AG technical support representative.

ART0606E Invalid WebDAV cache size value *size*

Explanation An invalid WebDAV cache size has been specified. The value was not numeric.

Action Supply a valid numeric cache size and try again.

ART0607E Cannot find generic XSLT file *filename*

Explanation The XSLT file listed in the message (*filename*) could not be found.

Action If the problem persists, contact your Software AG technical support representative.

ART0608E Cannot find XSLT file *filename*

Explanation The XSLT file listed in the message (*filename*) could not be found.

Action If the problem persists, contact your Software AG technical support representative.

ART0609E Create table XML message is null or base table name is null

Explanation An internal error has occurred.

Action If the problem persists, contact your Software AG technical support representative.

ART0610E Cannot convert create table schema to string

Explanation An internal error has occurred.

Action If the problem persists, contact your Software AG technical support representative.

ART0611E Cannot save create table schema *name* into WebDAV

Explanation An attempt to save the schema named in the message (*name*) to the WebDAV repository failed.

Action If the problem persists, contact your Software AG technical support representative.

ART0612E Problem with managing WebDAV file *filename*

Explanation The WebDAV file named in the message (*filename*) could not be managed.

Action If the problem persists, contact your Software AG technical support representative.

ART0613I Collection may not exist *colname*

Explanation The collection named in the message (*colname*) may not exist in the WebDAV repository. The collection is created.

Action No action is required for this informational message.

ART0614I Retrying resource write for *res*

Explanation An attempt is in progress to retry the resource write for the resource named in the message (*res*).

Action No action is required for this informational message.

ART0615E Write resource file *fn* failed *err-code*

Explanation An attempt to write the resource file named in the message (*fn*) failed.

Action If the problem persists, contact your Software AG technical support representative.

ART0616E WebDAV status code *code* status message *msg*

Explanation A WebDAV internal error has occurred.

Action If the problem persists, contact your Software AG technical support representative.

ART0617E Make collection *colname* failed status *stat*

Explanation An attempt to make the collection named in the message (*colname*) failed. The status of the attempt is also given in the message (*stat*).

Action If the problem persists, contact your Software AG technical support representative.

ART0701I Source shutdown complete

Explanation An attempt to shut down a source completed successfully.

Action No action is required for this informational message.

ART0702I Source waiting for restart after user stop or rollback

Explanation The source is waiting to be restarted after it was manually stopped or after a rollback occurred.

Action No action is required for this informational message. Restart the source when you are ready.

ART0703I Retries = 0; source waiting for manual restart

Explanation The value of the `Retry Count` parameter in the source definition has been reached. The source is waiting for a manual restart.

Action No action is required for this informational message. Manually restart the source when you are ready.

ART0704I Wait for retry; count: *count*

Explanation The source is waiting between retry attempts. The retry attempt count is given in the message (*count*).

Action No action is required for this informational message.

ART0705E No commit/rollback listener

Explanation An internal error has occurred.

Action Contact your Software AG technical support representative for assistance.

ART0706E Source message is null on commit**Explanation** An internal error has occurred.**Action** Contact your Software AG technical support representative for assistance.**ART0707E Unsupported source type *type*****Explanation** An internal error has occurred.**Action** Contact your Software AG technical support representative for assistance.**ART0708E Cannot open source capture file *fn*****Explanation** The file cannot be opened. Verify that the directory name exists.**Action** If the problem persists, contact your Software AG technical support representative.**ART0801I Runtime metrics****Explanation** This message is the heading message for a series of runtime metric messages.**Action** No action is required for this informational message.**ART0802I Resource key: *rkey*****Explanation** A resource key is listed in the message (*rkey*).**Action** No action is required for this informational message.**ART0803I Metrics key: *mkey*****Explanation** A metrics key is listed in the message (*mkey*).**Action** No action is required for this informational message.**ART0901E Process request failed****Explanation** An Event Replicator Target Adapter process request failed. The source is shut down.**Action** Review any accompanying error messages to determine the cause of the problem. If the problem persists, contact your Software AG technical support representative.

ART0902I Database active result: *result*

Explanation The result of a test to see whether the database is active or not is listed in the message (*result*).

Action No action is required for this informational message.

ART0903I Retrying Database Transaction

Explanation An attempt is in progress to retry the database transaction.

Action No action is required for this informational message.

ART1001E Exception cause: *cause*

Explanation An Event Replicator Target Adapter process request failed. The cause of the failure is given in the message (*cause*).

Action Contact your Software AG technical support representative for assistance.

ART1002E Exception stack: *stack*

Explanation An Event Replicator Target Adapter process request failed. The exception stack for the failure is given in the message (*stack*).

Action Contact your Software AG technical support representative for assistance.

ART1005W Unable to transform document

Explanation The Event Replicator Target Adapter was unable to transform a document.

Action No action is required for this warning message. Determine the reason for which the Event Replicator Target Adapter cannot transform the document and alter the conditions as necessary. Then try again.

ART1101I File source configured for input directory: *dirname*

Explanation A file source definition has been configured for the input directory listed in the message (*dirname*).

Action No action is required for this informational message.

ART1102I **File source ready to receive data from: *dirname***

Explanation A file source definition is ready to receive data from the directory listed in the message (*dirname*).

Action No action is required for this informational message.

ART1103E **File source unable to get list of files**

Explanation A file source could not get a list of the files from the source.

Action Determine why a list of files could not be obtained. Resolve the error and try again. If the problem persists, contact your Software AG support representative for assistance.

ART1104I **File source closing**

Explanation A file source is closing.

Action No action is required for this informational message.

ART1105I **File source returning file: FILE: *dirname-->fn***

Explanation The file source definition is returning the file source as part of the file source shutdown execution. The directory (*dirname*) and filename(*fn*) are given in the message.

Action No action is required for this informational message.

ART1106I **File source shutdown requested**

Explanation Shutdown of a file source was requested.

Action No action is required for this informational message.

ART1107I **File source rollback called**

Explanation Rollback of the updates from a file source was called.

Action No action is required for this informational message.

ART1108E File source file does not exist *fn*

Explanation The file source file named in the message (*fn*) does not exist. This is an internal message.

Action Contact your Software AG technical support representative for assistance.

ART1109I File source processing time for: *dirname-->fn* is *num* Milliseconds

Explanation The processing time is given in the message for the file identified in the message.

Action No action is required for this informational message.

ART1201I Rollback following SQL commands

Explanation A rollback occurred based on SQL commands.

Action No action is required for this informational message.

ART1203W File name not provided for operation: *op* FNR: *fnum* ISN: *isnum*

Explanation A file name was not provided for the operation listed in the message (*op*). The file (*fnum*) and ISN (*isnum*) numbers are also listed in the message.

Action No action is required for this informational message.

ART1204E Test connection failed: *conn-name*

Explanation A test connection to the connection listed in the message (*conn-name*) failed.

Action Restart the database if it is down.

ART1205E Cannot get a connection from the data source

Explanation An attempt to connect to a data source failed.

Action Review the data source definition and try again. If the problem persists, contact your Software AG technical support representative for assistance.

ART1206E Cannot get metadata

Explanation An attempt to connect to a data source failed.

Action Review the data source definition and try again. If the problem persists, contact your Software AG technical support representative for assistance.

ART1207E Exception obtaining table metadata: *tablename*

Explanation An exception occurred while the Event Replicator Target Adapter was attempting to obtain metadata from a table. The name of the table is given in the message (*tblname*).

Action Contact your Software AG technical support representative for assistance.

ART1208I Process is continuing after the previous error

Explanation Event Replicator Target Adapter processing is continuing in spite of a previously reported error condition.

Action No action is required for this informational message.

ART1209I Unable to locate table: *tablename*

Explanation The Event Replicator Target Adapter could not locate the table listed in the message (*tablename*).

Action No action is required for this informational message. If you really do need the Event Replicator Target Adapter to locate this table, determine why it cannot be located and try again. If the problem persists, contact your Software AG technical support representative.

ART1210I Create index command built: *cmd*

Explanation An internal command to create the index to a table was successfully built.

Action No action is required for this informational message.

ART1211E Cannot get connection to data source *name*

Explanation An attempt to connect to the data source named in the message (*name*) failed.

Action Verify that the database definitions are correct and that the database is active.

ART1212E Cannot retrieve database metadata**Explanation** An attempt to retrieve metadata for the database failed.**Action** Contact your Software AG technical support representative for assistance.**ART1213E Internal error of Sybase ASE****Explanation** An internal error occurred in Sybase ASE**Action** Contact your Software AG technical support representative for assistance.**ART1214W Unknown data type *type* for column *colname* in metadata****Explanation** An attempt was made to specify the unknown data type listed in the message (*type*) in the column listed in the message (*colname*).**Action** Contact your Software AG technical support representative for assistance.**ART1215E pkTableName *pkname* does not match with table name *tblname*****Explanation** A mismatch has occurred between the table and the primary key. The table name (*tblname*) and the primary key (*pkname*) are given in the message.**Action** Contact your Software AG technical support representative for assistance.**ART1216E Cannot find previous column information****Explanation** An internal error occurred.**Action** Contact your Software AG technical support representative for assistance.**ART1217F Initial context is null****Explanation** An internal error occurred.**Action** Contact your Software AG technical support representative for assistance.**ART1218F Context lookup is null****Explanation** An internal error occurred.**Action** Contact your Software AG technical support representative for assistance.

ART1219E Unsupported driver class name for JDBC/database *dbname*

Explanation An unsupported driver class name was specified for the JDBC database listed in the message (*dbname*).

Action Contact your Software AG technical support representative for assistance.

ART1220E Error obtaining connection *err-code*

Explanation A connection to the database could not be made.

Action Verify that the database definitions are correct and that the database is active.

ART1221E Table *tblname* has duplicate column name *colname*

Explanation The table named in the message (*tblname*) has two columns with the same name (*colname*).

Action Change one of the column names and try again.

ART1222E Cannot create statement

Explanation An internal error occurred.

Action Contact your Software AG technical support representative for assistance.

ART1223E Cannot connect to database *dbname*

Explanation An attempt to connect to the database named in the message (*dbname*) failed.

Action Verify that the database definitions are correct and that the database is active.

ART1224E Cannot execute batch

Explanation An internal error occurred.

Action Contact your Software AG technical support representative for assistance.

ART1225E Cannot turn off database autocommit

Explanation An attempt to turn off the autocommit feature of the database failed.

Action Contact your Software AG technical support representative for assistance.

ART1226E Cannot create executing SQL statement

Explanation An internal error occurred.

Action Contact your Software AG technical support representative for assistance.

ART1227E Process continuing because dbErrorContinue is TRUE

Explanation The target database **Error Continue** option was set to "true" (selected or turned on), so the SQL error is ignored and processing continues.

Action No action is required for this message.

ART1228E Executing....<processing information>

Explanation An SQL command either failed or executed successfully. The SQL command and details about its processing are given in the message (<processing information>).

If an error occurred, and you have not selected the **Error Continue** option for the target database, the Event Replicator Target Adapter will stop running. For more information, read *Specifying Target Database Processing Option Definitions*.

Action If the command failed, resolve the error described in the message. If necessary, contact your Software AG technical support representative for assistance.

ART1229E Unable to load/construct DB support class for classname

Explanation An internal error occurred.

Action Contact your Software AG technical support representative for assistance.

ART1230E Update to insert mode is on but full image value is missing

Explanation An attempt to insert an update failed because the full image of the record is missing from the database.

Action Use Option=32 in the Event Replicator Server destination definition. For more information, refer to your Event Replicator for Adabas destination documentation.

ART1232E Cannot insert column

Explanation An internal error occurred.

Action Contact your Software AG technical support representative for assistance.

ART1233I SQL command failed *cmd*

Explanation The SQL command listed in the message (*cmd*) failed.

Action Review other accompanying error messages to determine the cause of the problem. If the problem persists, contact your Software AG technical support representative for assistance.

ART1234I SQL command reason *rsncode*

Explanation The previous SQL command failed with the reason code (*rsncode*) given in the message.

Action Review the documentation for your RDBMS to determine the cause of the problem.

ART1235W Sync DDL value *val* is not one of the following values, ignore, warn, apply, error. Reset to ignore.

Explanation The value for the **Adabas-RDBMS Synchronization Level** option is invalid. It has been reset to "ignore".

Action In the target database options, change the setting of the **Adabas-RDBMS Synchronization Level** option to something other than "ignore" if you want.

ART1236E Cannot alter column *detailed-info*

Explanation The Event Replicator Target Adapter could not alter the column described by the detailed information listed in the message (*detailed-info*) during its attempt to synchronize the RDBMS table with the Adabas file.

Action Make sure the target database supports this kind of type conversion and that this column is not a primary key and doesn't have foreign key. If the problem persists, contact your Software AG technical support representative for assistance.

ART1237W Data type or length mismatch on column *detailed-info*

Explanation During an attempt to synchronize the RDBMS table with the Adabas file, the Event Replicator Target Adapter determined that a data type or length mismatch had occurred for the column described by the detailed information listed in the message (*detailed-info*).

Action Issue the same message as the previous one. The Event Replicator Target Adapter will continue to run because the **Adabas-RDBMS Synchronization Level** value is set to "warn". If the problem persists, contact your Software AG technical support representative for assistance.

ART1238I **Alter column *detailed-info***

Explanation The column described by the detailed information listed in the message (*detailed-info*) was altered in the RDBMS during Event Replicator Target Adapter synchronization between the RDBMS table and the Adabas file.

Action No action is required for this informational message.

ART1239I **Add column *detailed-info***

Explanation The column described by the detailed information listed in the message (*detailed-info*) was added to the RDBMS during Event Replicator Target Adapter synchronization between the RDBMS table and the Adabas file.

Action No action is required for this informational message.

ART1240E **Cannot add column *detailed-info***

Explanation The Event Replicator Target Adapter could not add the column described by the detailed information listed in the message (*detailed-info*) to the RDBMS during its attempt to synchronize the RDBMS table with the Adabas file.

Action Make sure the target database supports adding columns. If the problem persists, contact your Software AG technical support representative for assistance.

ART1241W **Target database doesn't have column *detailed-info***

Explanation During an attempt to synchronize the RDBMS table with the Adabas file, the Event Replicator Target Adapter determined that the target RDBMS is missing the column described by the detailed information listed in the message (*detailed-info*).

This message is issued because the **Adabas-RDBMS Synchronization Level** value is set to "warn". In this case, the Event Replicator Target Adapter issues this warning message and continues processing.

Action No action is required for this warning message.

ART1242E **Cannot find *_INDEX* as suffix of the PE table *tablename* primary key *key***

Explanation An internal error occurred.

Action Contact your Software AG technical support representative for assistance.

ART1302I Loader complete for loader

Explanation The Event Replicator Target Adapter completed loading replicated data for the Oracle SQL Loader listed in the message without failing.

Action No action is required for this informational message.

ART1303E Loader fail. Please check the log files *fn*

Explanation An attempt to load replicated data to the database via the Oracle SQL loader failed. The log files (*fn*) that contain more information are listed in the message.

Action Review the log files for more information about the failure. If possible, correct the error and try again. If the problem persists, contact your Software AG technical support representative for assistance.

ART1304E Loader exception

Explanation An exception occurred during the loading process.

Action Contact your Software AG technical support representative for assistance.

ART1305E Create table XML file *fn* does not exist

Explanation A request to create the table in an XML file failed because the XML file could not be found. The filename of the XML file is given in the message (*fn*).

Action Contact your Software AG technical support representative for assistance.

ART1307E Control file *fn* is not generated

Explanation The control file listed in the message (*fn*) was not generated.

Action Contact your Software AG technical support representative for assistance.

ART1308E Loader cannot support streaming mode

Explanation The loader cannot support streaming mode.

Action Modify the target database options used by the database so that the **Use Stream** option is not selected (checked) and try again. For more information, read *Specifying Target Database Processing Option Definitions*.

ART1309E Output file *fn* is not generated

Explanation The output file named in the message (*fn*) was not generated.

Action Contact your Software AG technical support representative for assistance.

ART1310I Current configuration cannot support streaming mode; change to nonstreaming mode

Explanation The current configuration does not support streaming mode. The Event Replicator Target Adapter turns stream mode off and retries the operation.

Action No action is required for this informational message.

ART1311I Current configuration cannot support loader mode; change to nonloader mode

Explanation The current configuration does not support the database in loader mode.

Action No action is required for this informational message.

ART1312I Loader process running for *loader*

Explanation The database loader process is running for the Oracle SQL Loader listed in the message.

Action No action is required for this informational message.

ART1313I Loader about to execute following command: *cmd*

Explanation The database loader process is executing the command listed in the message (*cmd*).

Action No action is required for this informational message.

ART1315I Create loader thread

Explanation An attempt by the Event Replicator Target Adapter to create a loader thread is in process.

Action No action is required for this informational message.

ART1316E **Called with table: *tblname* column: *colname***

Explanation An error occurred trying to call the table (*tblname*) and column (*colname*) whose names are listed in the message.

Action Contact your Software AG technical support representative for assistance.

ART1318I **Initial-state running in loader mode**

Explanation The initial-state process is running in loader mode.

Action No action is required for this informational message.

ART1319E **Cannot wait for loader process**

Explanation An internal error occurred.

Action Contact your Software AG technical support representative for assistance.

ART1320E **Cannot find control file name**

Explanation An internal error occurred.

Action Contact your Software AG technical support representative for assistance.

ART1321E **Cannot find log file name**

Explanation An internal error occurred.

Action Contact your Software AG technical support representative for assistance.

ART1322E **Cannot find bad file name**

Explanation An internal error occurred.

Action Contact your Software AG technical support representative for assistance.

ART1323E **Cannot find discard file name**

Explanation An internal error occurred.

Action Contact your Software AG technical support representative for assistance.

ART1324E Cannot find out file name**Explanation** An internal error occurred.**Action** Contact your Software AG technical support representative for assistance.**ART1325E Create loader process failed****Explanation** An internal error occurred.**Action** Contact your Software AG technical support representative for assistance.**ART1326I Test loader process successful****Explanation** The test loader process completed successfully.**Action** No action is required for this informational message.**ART1327E Test loader process failed, exit code *code*****Explanation** The test loader process failed with the exit code listed in the message (*code*).**Action** Contact your Software AG technical support representative for assistance.**ART1328E Cannot create XsltWorker****Explanation** An internal error occurred.**Action** Contact your Software AG technical support representative for assistance.**ART1329E Cannot set up environment variables of file *fn*****Explanation** An attempt to set the environment variables for the file named in the message (*fn*) failed.**Action** Contact your Software AG technical support representative for assistance.**ART1330E Cannot support current database type****Explanation** Support is not provided for the database type.**Action** Change the database type to one that is supported by the Event Replicator Target Adapter. If necessary, contact your Software AG technical support representative for assistance.

ART1331E Worker is null**Explanation** An internal error occurred.**Action** Contact your Software AG technical support representative for assistance.**ART1332E Cannot create loader thread****Explanation** An internal error occurred.**Action** Contact your Software AG technical support representative for assistance.**ART1333E Cannot create piped stream****Explanation** An internal error occurred.**Action** Contact your Software AG technical support representative for assistance.**ART1334E Loader failed. Current mode is streaming mode, change to nonstreaming mode and retry****Explanation** The loader failed.**Action** Modify the target database options used by the database so that the **Use Stream** option is not selected (checked) and try again. For more information, read *Specifying Target Database Processing Option Definitions***ART1335E Cannot write to output stream****Explanation** An internal error occurred.**Action** Contact your Software AG technical support representative for assistance.**ART1336E Parsing error *err* line *lll* column *ccc* PID *pid* CID *cid*****Explanation** A parsing error occurred. The error, line number, column number, process ID, and command ID are given in the message.**Action** Contact your Software AG technical support representative for assistance.

ART1337E Unable to send message to the loader**Explanation** An internal error occurred.**Action** Contact your Software AG technical support representative for assistance.**ART1338E Cannot find base file name****Explanation** An internal error occurred.**Action** Contact your Software AG technical support representative for assistance.**ART1339W Current database cannot support streaming mode, reset to nonstreaming mode****Explanation** The current database does not support streaming mode. The Event Replicator Target Adapter has turned streaming mode off.**Action** No action is required for this warning message.**ART1340E The child thread may end unexpectedly****Explanation** An internal error occurred.**Action** Contact your Software AG technical support representative for assistance.**ART1341E Cannot find WebDAV****Explanation** The WebDAV file cannot be found.**Action** Contact your Software AG technical support representative for assistance.**ART1342E Batch file *fn* does not exist****Explanation** The batch file named in the message does not exist.**Action** Contact your Software AG technical support representative for assistance.

ART1343W **The service name of the loader in the Target Database Options of a Teradata MLoad, *name*, has more than *num* characters. Using *xxxx* as the *tdpid* for this MLoad**

Explanation The service name of the loader during Teradata MLoad processing is too long. The Event Replicator Target Adapter is using the name *xxxx* for the *tdpid* of the MLoad processing.

Action No action is required for this warning message.

ART1344W **The service name of the loader in the Target Database Options of a Teradata MLoad has not been informed. Attempting to use *xxxx* as the *tdpid* for ths MLoad**

Explanation The service name of the loader during Teradata MLoad processing has not been provided. The Event Replicator Target Adapter is trying to use the name *xxxx* for the *tdpid* of the MLoad processing.

Action No action is required for this warning message.

ART1401I **Transform document using XSLT file: *fn* token: *token***

Explanation The Event Replicator Target Adapter is attempting to transform the document using the XSLT file (*fn*) and token (*token*) listed in the message.

Action No action is required for this informational message.

ART1402E **Cannot convert from UTF8 byte array to a string**

Explanation An internal error occurred.

Action Contact your Software AG technical support representative for assistance.

ART1501I **Source manager shutdown requested**

Explanation A request was made to shut down the source manager.

Action No action is required for this informational message.

ART1502I **Source manager notified to shut down**

Explanation The source manager has been notified to shut down.

Action No action is required for this informational message.

ART1503I Waiting for source manager shutdown to complete

Explanation The Event Replicator Target Adapter is waiting for the source manager to fully shut down.

Action No action is required for this informational message.

ART1504I Source manager is down

Explanation The source manager shutdown has completed.

Action No action is required for this informational message.

ART1601I Engine manager shutdown requested

Explanation A request was made to shut down the engine manager.

Action No action is required for this informational message.

ART1602I Engine manager notified to shut down

Explanation The engine manager has been notified to shut down.

Action No action is required for this informational message.

ART1603I Waiting for engine manager shutdown to complete

Explanation The Event Replicator Target Adapter is waiting for the engine manager to fully shut down.

Action No action is required for this informational message.

ART1604I Engine manager is down

Explanation The engine manager shutdown has completed.

Action No action is required for this informational message.

ART1701W Parameter *parm* value *val* not numeric

Explanation The parameter named in the message (*parm*) specifies a value (*val*) that is not numeric.

Action Supply a numeric value for the parameter and try again.

ART1702W Parameter *parm* value *val* does not end with "S"

Explanation The parameter named in the message (*parm*) specifies a value (*val*) that does not end in an "S".

Action Supply a value for the parameter that ends in an "S" and try again.

ART1703W Parameter *parm* value *val* is not "true" or "false"

Explanation The parameter named in the message (*parm*) specifies a value (*val*) that is not "true" or "false."

Action Supply a "true" or "false" value for the parameter and try again.

ART1801E Cannot open WebSphere MQ trace log file *fn*

Explanation An attempt to open the WebSphere MQ trace file named in the message (*fn*) failed.

Action Check your definition. Verify that the directory defined in your definitions exists.

ART1802E WebSphere MQ rollback failed *err-code*

Explanation A rollback attempt for WebSphere MQ failed.

Action Review the webSphere MQ documentation to determine the reason for the failure.

ART1803E WebSphere MQ logon failed host *hostid* port *portnum* error *err*

Explanation An attempt to logon to WebSphere MQ failed. The WebSphere MQ host ID (*hostid*), port number (*portnum*), and the error number (*err*) from the attempt are given in the message.

Action Check with your WebSphere MQ administrator to determine why the attempt failed. Resolve the problem and try again.

ART1804I WebSphere MQ logon to host *hostid* successful

Explanation The attempt to log onto the WebSphere MQ host named in the message (*hostid*) was successful.

Action No action is required for this informational message.

ART1805I WebSphere MQ receiving messages from queue *qname*

Explanation WebSphere MQ is receiving and processing messages from the queue listed in the message (*qname*).

Action No action is required for this informational message.

ART1806E WebSphere MQ request failed

Explanation A WebSphere MQ request failed.

Action Check with your WebSphere MQ administrator to determine why the attempt failed. Resolve the problem and try again.

ART1807E WebSphere MQ receive failed *err-code*

Explanation A receive request via the WebSphere MQ queue failed.

Action Check with your WebSphere MQ administrator to determine why the attempt failed. Resolve the problem and try again.

ART1808E WebSphere MQ commit failed *err-code*

Explanation A commit request via the WebSphere MQ queue failed.

Action Check with your WebSphere MQ administrator to determine why the attempt failed. Resolve the problem and try again.

ART1809E WebSphere MQ send failed *err-code*

Explanation A send request via the WebSphere MQ queue failed.

Action Check with your WebSphere MQ administrator to determine why the attempt failed. Resolve the problem and try again.

ART1810E WebSphere MQ close failed *err-code*

Explanation A close request via the WebSphere MQ queue failed.

Action Check with your WebSphere MQ administrator to determine why the attempt failed. Resolve the problem and try again.

ART2001E Required target configuration not found *config* or default**Explanation** An internal error occurred.**Action** Contact your Software AG technical support representative for assistance.**ART2002E Operation is null****Explanation** An internal error occurred.**Action** Contact your Software AG technical support representative for assistance.**ART2003E Operation *opname* is not supported****Explanation** An attempt to run the operation named in the message (*opname*) failed because it is not supported.**Action** Try an operation that is supported.**ART2004E Not SOAP element****Explanation** An internal error occurred.**Action** Contact your Software AG technical support representative for assistance.**ART3001E Wrong factory type for *msgtype*. Type is *factype*.****Explanation** An attempt to use the wrong JMS factory type for the type of messaging specified. The message type (*msgtype*) and factory type (*factype*) are given in the message. Replicate the data to a JMS topic if you want to use publish-subscribe messaging; replicate the data to a JMS queue if you want to use point-to-point messaging.**Action** Verify the JMS target definition is specified correctly in the Event Replicator Target Adapter Administration tool. Contact your Software AG technical support representative for assistance.**ART3002E Factory *factory* not found in the naming system.****Explanation** An attempt to access the JMS topic or queue connection factory in the system was not successful.**Action** Verify the JMS target definition is specified correctly in the Event Replicator Target Adapter Administration tool. Contact your Software AG technical support representative for assistance.

ART3003E **Error occurred while accessing factory *factory* in the naming system *system*.**

Explanation An error occurred attempting to access the JMS topic or queue connection factory named in the message in the system named in the message.

Action Verify the JMS target definition is specified correctly in the Event Replicator Target Adapter Administration tool. Contact your Software AG technical support representative for assistance.

ART3004E **Wrong destination type for *jmsname*. Type is *factype*.**

Explanation An attempt to use the wrong type of destination was made when replicating data to JMS queues or topics. The JMS destination topic or queue name (*jmsname*) and the factory type (*factype*) are given in the message. Specify the destination as a JMS topic (as defined to webMethods Broker) if you want to use publish-subscribe messaging; specify the destination as a JMS queue (as defined to webMethods Broker) if you want to use point-to-point messaging.

Action Verify the JMS target definition is specified correctly in the Event Replicator Target Adapter Administration tool. Contact your Software AG technical support representative for assistance.

ART3005E **Destination *dest* not found in the JNDI provider**

Explanation An internal error occurred. The destination specified in the JMS target definition was not found in the JNDI provider specified in the JMS target definition. The destination name is given in the message.

Action Verify the JMS target definition is specified correctly in the Event Replicator Target Adapter Administration tool. Contact your Software AG technical support representative for assistance.

ART3006E **Error while accessing destination *dest***

Explanation An internal error occurred. An error occurred during an attempt to access the destination specified in the JMS target definition.

Action Verify the JMS target definition is specified correctly in the Event Replicator Target Adapter Administration tool. Contact your Software AG technical support representative for assistance.
