LNKR VX090 Enhanced Review processing terminated

Explanation This message is issued after an error is detected when the link routine attempts to initialize the environment for Review exits. The reason for the failure is provided by one or more previously issued message or messages.

Action Review other previously issued messages to determine the cause of the error.

LNKR VX091 GETMAIN failed for Review exit work area

Explanation The storage for the REVEXIT1 (REVEXITB) work area was not available. No Adabas Review processing is possible for this task or job step.

Action Contact your Software AG technical support representative for assistance.

LNKR VX092 GETMAIN failed for REVEXIT2 work area

Explanation The storage required to support REVEXIT2 client monitoring is not available. Client monitoring will not be possible but standard REVEXIT1 (REVEXITB) processing may be possible.

Action Contact your Software AG technical support representative for assistance.

LNKR VX093 Primary Revexit work area header invalid

Explanation The header for the primary Adabas Review work area appears to be invalid. Adabas Review processing cannot continue.

Action Contact your Software AG technical support representative for assistance.

LNKR VX094 REVEXIT2 work area invalid

Explanation The work area for REVEXIT2 (client monitoring) appears to be invalid or corrupted. Adabas Review client monitoring cannot continue.

Action Contact your Software AG technical support representative for assistance.

LNKR VX095 Handshake with Review Hub: *hub-id* failed RSP: *rc* Sub: *sc*

Explanation The handshake to establish communication with the Adabas Review hub listed in the message (*hub-id*) failed with the Adabas response code (*rc*) and the Adabas subcode (*sc*) given in the message. Adabas Review client monitoring cannot continue for this task or job step.

Action Evaluate the returned Adabas response code and subcode to determine the action to take to correct the issue. For example, if the Adabas response code is 148, ensure that the specified Adabas Review hub is up and running.

LNKR VX096 Review monitoring is {ON|OFF}

Explanation This message indicates the new or current state of Adabas Review client monitoring. It is issued in response to a request from SYSREVDDB to activate or deactivate client monitoring for the Adabas link routine.

Action No action is required for this informational message.

LNKR VX097 PC number zero after V4 call, Transport not active

Explanation The handshake to establish communications between the link routine, REVEXIT2 and the Adabas Review hub has failed because the Adabas Review Transport software is not running.

Action Restart the Adabas Review Transport software.
