

About this Documentation

This document provides information useful to customers intending to install and use Adabas 8 and to those planning a migration from previous versions of Adabas.

This document is intended for use by those persons responsible for Adabas 8 configuration and administration. A detailed knowledge of the current Adabas product set is assumed.

This document is organized as follows:

	<i>General Information</i>	Provides information on the availability, prerequisites, and documentation of Adabas 8.
	<i>Migrating From Previous Adabas Versions</i>	Lists considerations for migrating from prior versions of Adabas to Adabas 8.
	<i>Architectural Changes</i>	Describes the architectural changes of Adabas 8.
	<i>Utility Changes</i>	Describes the utility changes of Adabas 8.
	<i>ADARUN Changes</i>	Describes the ADARUN changes for Adabas 8.
	<i>Command Changes</i>	Describes the command changes of Adabas 8.
	<i>User Exit Changes</i>	Describes the hyperdescriptor exit changes of Adabas 8.
	<i>Add-On Product Support for Adabas 8</i>	Describes the Adabas add-on product support for Adabas 8.
