

Sequential File Table

This section summarizes the sequential files added or changed by the Adabas ADASAV utility for Delta Save operation. BS2000/OSD, z/VM, z/OS and OS-compatible files have "DD..." names (DDFULL, DDDEL1, etc.); VSE/ESA and z/VSE file names are without the "DD..." prefix. Appendix A of either volume of the *Adabas Utilities* documentation contains a listing of all sequential files, by utility.
