

Adabas Delta Save Facility 8.2 Release Notes

Adabas Delta Save (ADE) is a Software AG product that allows you to back up and restore only the changed (delta) portions of Adabas databases.

Adabas Delta Save is a selectable unit to Adabas customers who have exercised a separate purchase agreement for this feature.

This document provides release notes for the Adabas Delta Save 8.2 release. It is organized as follows:

●	<i>Prerequisites</i>	Lists the currently supported operating environments for Adabas 8.
●	<i>Enhancements</i>	Describes the new and changed features in Adabas 8.2.
●	<i>End of Maintenance</i>	Describes how you can determine the end-of-support dates for your Software AG products.
●	<i>Documentation</i>	Describes the documentation provided with this release of Adabas.
