Preface

This document describes the prerequisites and installation procedure for installing the Adabas Delta Save Facility.

This document is organized as follows:

<i>System Requirements</i>	Describes the system requirements of Adabas Delta Save Facility.
<i>Installation Procedure</i>	Describes the steps to install the Adabas Delta Save Facility.
<i>Sequential File Table</i>	Summarizes the sequential files added or changed by the Adabas ADASAV utility for Delta Save operations.
<i>Applying Fixes to Adabas Delta Save Facility</i>	Describes how to apply fixes to the Adabas Delta Save Facility.

1 About this Documentation

▪ Document Conventions	2
▪ Online Information and Support	2
▪ Data Protection	3

Document Conventions

Convention	Description
Bold	Identifies elements on a screen.
Monospace font	Identifies service names and locations in the format <i>folder.subfolder.service</i> , APIs, Java classes, methods, properties.
<i>Italic</i>	Identifies: Variables for which you must supply values specific to your own situation or environment. New terms the first time they occur in the text. References to other documentation sources.
Monospace font	Identifies: Text you must type in. Messages displayed by the system. Program code.
{ }	Indicates a set of choices from which you must choose one. Type only the information inside the curly braces. Do not type the { } symbols.
	Separates two mutually exclusive choices in a syntax line. Type one of these choices. Do not type the symbol.
[]	Indicates one or more options. Type only the information inside the square brackets. Do not type the [] symbols.
...	Indicates that you can type multiple options of the same type. Type only the information. Do not type the ellipsis (...).

Online Information and Support

Software AG Documentation Website

You can find documentation on the Software AG Documentation website at <https://documentation.softwareag.com>.

Software AG Empower Product Support Website

If you do not yet have an account for Empower, send an email to empower@softwareag.com with your name, company, and company email address and request an account.

Once you have an account, you can open Support Incidents online via the eService section of Empower at <https://empower.softwareag.com/>.

You can find product information on the Software AG Empower Product Support website at <https://empower.softwareag.com>.

To submit feature/enhancement requests, get information about product availability, and download products, go to [Products](#).

To get information about fixes and to read early warnings, technical papers, and knowledge base articles, go to the [Knowledge Center](#).

If you have any questions, you can find a local or toll-free number for your country in our Global Support Contact Directory at https://empower.softwareag.com/public_directory.aspx and give us a call.

Software AG Tech Community

You can find documentation and other technical information on the Software AG Tech Community website at <https://techcommunity.softwareag.com>. You can:

- Access product documentation, if you have Tech Community credentials. If you do not, you will need to register and specify "Documentation" as an area of interest.
- Access articles, code samples, demos, and tutorials.
- Use the online discussion forums, moderated by Software AG professionals, to ask questions, discuss best practices, and learn how other customers are using Software AG technology.
- Link to external websites that discuss open standards and web technology.

Data Protection

Software AG products provide functionality with respect to processing of personal data according to the EU General Data Protection Regulation (GDPR). Where applicable, appropriate steps are documented in the respective administration documentation.

2 System Requirements

- Supported Operating System Platforms 6
- Supported Hardware 7
- Required Software AG Products 7

This chapter describes the system requirements for Adabas Delta Save Facility.

Supported Operating System Platforms

Software AG generally provides support for the operating system platform versions supported by their respective manufacturers; when an operating system platform provider stops supporting a version of an operating system, Software AG will stop supporting that version.

For information regarding Software AG product compatibility with IBM platforms and any IBM requirements for Software AG products, please review the [Product Compatibility for IBM Platforms](#) web page.

Before attempting to install this product, ensure that your host operating system is at the minimum required level. For information on the operating system platform versions supported by Software AG products, complete the following steps.

1. Access Software AG's Empower web site at <https://empower.softwareag.com>.
2. Log into Empower. Once you have logged in, you can expand **Products & Documentation** in the left menu of the web page and select **Product Version Availability** to access the Product Version Availability screen.
3. Use the fields on the top of this screen to filter its results for your Software AG product. When you click the **Search** button, the supported Software AG products that meet the filter criteria are listed in the table below the filter criteria.

This list provides, by supported operating system platform:

- the Software AG general availability (GA) date of the Software AG product;
- the date the operating system platform is scheduled for retirement (OS Retirement);
- the Software AG end-of-maintenance (EOM) date for the product; and
- the Software AG end-of-sustained-support (EOSS) date for the product.

Note: Although it may be technically possible to run a new version of your Software AG product on an older operating system, Software AG cannot continue to support operating system versions that are no longer supported by the system's provider. If you have questions about support, or if you plan to install this product on a release, version, or type of operating system other than one listed on the Product Version Availability screen described above, consult Software AG technical support to determine whether support is possible, and under what circumstances.

Supported Hardware

For general information regarding Software AG product compatibility with other platforms and their requirements for Software AG products, visit Software AG's [Hardware Supported](#) web page.

Required Software AG Products

This version of Adabas Delta Save Facility requires the following Software AG products and versions and additional software:

- Adabas Version 8.5
- Adabas Online System (AOS) demo version delivered with Adabas or alternatively, the full version AOS selectable unit. The load module AOSASM from the Adabas load library must be included in the link of the Natural nucleus.

If you want to use online facilities to restart an interrupted online save operation after a system or other user ABEND (see section *Restarting an Interrupted Save Operation* in the *Adabas Delta Save Facility Utilities Manual*), you will need to use the selectable unit AOS.

For information regarding Software AG product compatibility with IBM platforms and any IBM requirements for Software AG products, please review the [Product Compatibility for IBM Platforms](#) web page.

3 Installation Procedure

» To install the Adabas Delta Save Facility, perform the following steps:

- 1 Verify you have prepared and installed the product license file, as described in the *Adabas for Mainframes Version 8.5* installation.
- 2 If you plan to perform save operations online, allocate space for the DSIM data set and format the data set with the ADAFRM DSIMFRM function, as described in *Adabas Utility Functions for Delta Save* in the *Adabas Delta Save Facility Utilities Manual*.
- 3 Add the ADARUN parameter DSF=YES to the nucleus and utility jobs used to operate the database (DSF=YES is required for the nucleus and the DSF-related functions of the ADASAV, ADARES, and ADAULD utilities; it is optional for the other utilities. See the section *ADARUN Parameter DSF* in the *Adabas Delta Save Facility Administration Guide* for more information);
- 4 To automatically submit a delta save job when the DLOG area usage exceeds a certain threshold, provide the delta save user exit along with the job control statements it requires, and specify the ADARUN DSFEX1 parameter.
- 5 Start the nucleus (with DSF=YES);
- 6 Using the Adabas Online System (either the demo or full version) "Install DSF" special function described in section *Special Online Functions* in the *Adabas Delta Save Facility Administration Guide*, allocate the DSF logging area;
- 7 Perform a normal Adabas database save operation (ADASAV SAVE) to create a full save data set and to enable Delta Save logging. If the save operation is online, merge the online full save data set with the DSIM data set to produce an offline full save, and to free the DSIM data set for further use.

4 Sequential File Table

This section summarizes the sequential files added or changed by the Adabas ADASAV utility for Delta Save operation. Appendix A of either volume of the *Adabas Utilities* documentation contains a listing of all sequential files, by utility.

Utility	File Name	VSE Tape SYS	Out	In	BLKSIZE by device	Concatenation
ADASAV	DD/FULL	30		x		Yes
	DD/DEL1	31		x		Yes
	DD/DEL2	32		x		Yes
	DD/DEL3	33		x		Yes
	DD/DEL4	34		x		Yes
	DD/DEL5	35		x		Yes
	DD/DEL6	36		x		Yes
	DD/DEL7	37		x		Yes
	DD/DEL8	38		x		Yes

5 Applying Fixes to Delta Save

- Applying Fixes to Delta Save Using MSHP PATCH 14
- Applying Fixes to Delta Save Using MSHP CORRECT 15

Fixes to Delta Save follow the same guidelines as fixes to Adabas. See the *Adabas Installation* documentation for information about applying fixes to Adabas.

Applying Fixes to Delta Save Using MSHP PATCH

A sample job to insert a fix to Adabas Delta Save facility using MSHP PATCH is as follows:

```
// JOB PATCHD          APPLY PATCH TO ADABAS DELTA SAVE
// OPTION LOG
// EXEC PROC=ADEVvLIB
// EXEC MSHP
    PATCH SUBLIB=saglib.ADEVvrs
    AFFECTS PHASE=phasenam
    ALTER offset vvvv: rrrr
/*
/ &
```

-where

vrs	is the Adabas version/revision/system maintenance (SM) level
saglib	is the Adabas library name in the procedure ADEVvFIL
phasenam	is the Adabas phase to be zapped
offset	is the hexadecimal offset into the phase
vvvv	is the verify data for the ZAP
rrrr	is the replace data for the ZAP

The above sample JCL is available in member MSHPATD.X on the Delta Save sublibrary.

Applying Fixes to Delta Save Using MSHP CORRECT

Because Delta Save is installed into a separate sublibrary (ADEvrs) and has a separate product code, it is maintained as a separate MSHP component. Delta Save users must therefore run a MSHP ARCHIVE job for Delta Save.

Note: This job uses the history file identified by the IJSYSHF label in the VSE standard label area.

```
// JOB ARCHIVE      ARCHIVE ADABAS DELTA SAVE
// OPTION LOG
// EXEC PROC=ADAVvLIB
// EXEC MSHP
ARCHIVE ADEvrs
  COMPRISES 9001-ADE-00
  RESOLVES 'SOFTWARE AG - ADABAS DSF Vv.r'
ARCHIVE 9001-ADA-0E-vrs
  RESIDENCE PRODUCT=ADEvrs -
            PRODUCTION=saglib.ADEvrs -
            GENERATION=saglib.ADEvrs
/*
/ &
```

-where

<i>vrs</i>	is the Adabas version/revision/system maintenance (SM) level
<i>saglib</i>	is the Adabas library name in the procedure ADEV vFIL

The above sample job is available in member MSHPARCD.X on the Delta Save sublibrary.

A sample job illustrating the use of MSHP CORRECT to install a fix to Adabas Delta Save is as follows:

```
// JOB CORRECT      APPLY FIX TO ADABAS DSF
// OPTION LOG
// EXEC MSHP

CORRECT 9001-ADE-00-vrs: ATnnnnn

AFFECTS MODE=modname

ALTER  offset vvvv: rrrr

INVOLVES LINK=lnkname

/*
/ &
```

-where

<i>vrs</i>	is the Adabas version/revision/system maintenance (SM) level
<i>nnnnn</i>	is the Adabas fix number
<i>modname</i>	is the Adabas object module to be zapped and then relinked
<i>offset</i>	is the hexadecimal offset to the beginning of the ZAP
<i>vvvv</i>	is the verify data for the ZAP
<i>rrrr</i>	is the replace data for the ZAP
<i>lnkname</i>	is the link book for the phase affected

The above sample JCL is available in member MSHPCORD.X on the Delta Save sublibrary.

The following link books are defined on the Delta Save sublibrary:

ADADSFN ADADSFH ADADSFS ADAMGS
