Please explore the Adabas Manager Communicator documentation at the Software AG web site:

<http://documentation.softwareag.com/>

The documentation at this site will be updated as required.

Contents:

- A. About Adabas Manager Communicator
- B. Software Requirements
- C. Updates to This Version

A. About Adabas Manager Communicator

Adabas Manager Communicator is a middleware component used by Adabas Manager to locate, communicate with and administer Entire Network Server and Client Services and Kernels, the Adabas Directory Server and Adabas on the mainframe. It provides the ability for Adabas Manager to communicate with instances of these installed products, thereby providing an administration interface for them.

B. Software Requirements

Adabas Manager Communicator require a running instance of Adabas Directory Server in your enterprise.

Adabas Manager depends on Adabas Manager Communicator to enable administration of Entire Net-Work products and components.

C. Updates to This Version

Please check for and apply any applicable fix to this version immediately after installation and before using the product.

Updates or fixes to Adabas Manger Communicator will be made available through Software AG's Software Update Manager. Please visit the Empower website for instructions on installing and using Software Update Manager.
