■ Data Protection .....	5

## Document Conventions

---

Convention	Description
<b>Bold</b>	Identifies elements on a screen.
Monospace font	Identifies service names and locations in the format <i>folder.subfolder.service</i> , APIs, Java classes, methods, properties.
<i>Italic</i>	Identifies:  Variables for which you must supply values specific to your own situation or environment. New terms the first time they occur in the text. References to other documentation sources.
Monospace font	Identifies:  Text you must type in. Messages displayed by the system. Program code.
{ }	Indicates a set of choices from which you must choose one. Type only the information inside the curly braces. Do not type the { } symbols.
	Separates two mutually exclusive choices in a syntax line. Type one of these choices. Do not type the   symbol.
[ ]	Indicates one or more options. Type only the information inside the square brackets. Do not type the [ ] symbols.
...	Indicates that you can type multiple options of the same type. Type only the information. Do not type the ellipsis (...).

## Online Information and Support

---

### Software AG Documentation Website

You can find documentation on the Software AG Documentation website at <https://documentation.softwareag.com>.

### Software AG Empower Product Support Website

If you do not yet have an account for Empower, send an email to [empower@softwareag.com](mailto:empower@softwareag.com) with your name, company, and company email address and request an account.

Once you have an account, you can open Support Incidents online via the eService section of Empower at <https://empower.softwareag.com/>.

You can find product information on the Software AG Empower Product Support website at <https://empower.softwareag.com>.

To submit feature/enhancement requests, get information about product availability, and download products, go to [Products](#).

To get information about fixes and to read early warnings, technical papers, and knowledge base articles, go to the [Knowledge Center](#).

If you have any questions, you can find a local or toll-free number for your country in our Global Support Contact Directory at [https://empower.softwareag.com/public\\_directory.aspx](https://empower.softwareag.com/public_directory.aspx) and give us a call.

### **Software AG Tech Community**

You can find documentation and other technical information on the Software AG Tech Community website at <https://techcommunity.softwareag.com>. You can:

- Access product documentation, if you have Tech Community credentials. If you do not, you will need to register and specify "Documentation" as an area of interest.
- Access articles, code samples, demos, and tutorials.
- Use the online discussion forums, moderated by Software AG professionals, to ask questions, discuss best practices, and learn how other customers are using Software AG technology.
- Link to external websites that discuss open standards and web technology.

## **Data Protection**

---

Software AG products provide functionality with respect to processing of personal data according to the EU General Data Protection Regulation (GDPR). Where applicable, appropriate steps are documented in the respective administration documentation.

## 3 General

---

Adabas Manager provides browser-based administration and monitoring of Adabas databases on Linux, UNIX, and Windows platforms.

It can be used to administer Adabas databases on remote host machines, in addition to Adabas databases on the local machine. Common administration tasks include listing databases and files, starting/stopping and creating databases, viewing and modifying database parameters, managing database containers, and viewing information about high water marks and buffer pools.

All of the major features of previous versions are supported; exceptions are described below.

# 4

## New and Modified Features in Version 8.5

---

■ Administration of Entire Net-Work .....	10
■ Adabas Manager Docker Image .....	10
■ New Database Administration Features .....	10

The following new features have been added to or modified in Version 8.5 of Adabas Manager:

## **Administration of Entire Net-Work**

---

Adabas Manager Version 8.5 can be used to administer the Entire Net-Work suite of products (Entire Net-Work Client, Entire Net-Work Server, Adabas Directory Server).

## **Adabas Manager Docker Image**

---

Adabas Manager Version 8.5 supports the building of Adabas Manager Docker images.

## **New Database Administration Features**

---

Adabas Manager Version 8.5 includes the following new features in database administration:

- Display of spanned records;
- Support of TCP/IP nucleus parameters;
- Support of the options shutdown, cancel and abort when stopping a database.

## 5 Documentation

---

Due to last-minute documentation updates, it may be possible that the Adabas Manager documentation or the online help that you can invoke directly from the product does not yet contain the latest information. The most up-to-date Adabas Manager documentation can always be found on the Software AG documentation website at <http://documentation.softwareag.com/> (Empower login required).
