Document Conventions

Convention	Description
Bold	Identifies elements on a screen.
Monospace font	Identifies service names and locations in the format <i>folder.subfolder.service</i> , APIs, Java classes, methods, properties.
<i>Italic</i>	Identifies: Variables for which you must supply values specific to your own situation or environment. New terms the first time they occur in the text. References to other documentation sources.
Monospace font	Identifies: Text you must type in. Messages displayed by the system. Program code.
{ }	Indicates a set of choices from which you must choose one. Type only the information inside the curly braces. Do not type the { } symbols.
	Separates two mutually exclusive choices in a syntax line. Type one of these choices. Do not type the symbol.
[]	Indicates one or more options. Type only the information inside the square brackets. Do not type the [] symbols.
...	Indicates that you can type multiple options of the same type. Type only the information. Do not type the ellipsis (...).

Online Information and Support

Software AG Documentation Website

You can find documentation on the Software AG Documentation website at <https://documentation.softwareag.com>.

Software AG Empower Product Support Website

If you do not yet have an account for Empower, send an email to empower@softwareag.com with your name, company, and company email address and request an account.

Once you have an account, you can open Support Incidents online via the eService section of Empower at <https://empower.softwareag.com/>.

You can find product information on the Software AG Empower Product Support website at <https://empower.softwareag.com>.

To submit feature/enhancement requests, get information about product availability, and download products, go to [Products](#).

To get information about fixes and to read early warnings, technical papers, and knowledge base articles, go to the [Knowledge Center](#).

If you have any questions, you can find a local or toll-free number for your country in our Global Support Contact Directory at https://empower.softwareag.com/public_directory.aspx and give us a call.

Software AG Tech Community

You can find documentation and other technical information on the Software AG Tech Community website at <https://techcommunity.softwareag.com>. You can:

- Access product documentation, if you have Tech Community credentials. If you do not, you will need to register and specify "Documentation" as an area of interest.
- Access articles, code samples, demos, and tutorials.
- Use the online discussion forums, moderated by Software AG professionals, to ask questions, discuss best practices, and learn how other customers are using Software AG technology.
- Link to external websites that discuss open standards and web technology.

Data Protection

Software AG products provide functionality with respect to processing of personal data according to the EU General Data Protection Regulation (GDPR). Where applicable, appropriate steps are documented in the respective administration documentation.

2 ET Data Management

- ET Data Location and ET Data Management Requirements 6
- ET Data Management Checklist 6
- ET Data Management Activity Display/Start 6

This section describes how to manage ET data in the TM's recovery file.

ET Data Location and ET Data Management Requirements

When Adabas Transaction Manager is in use, the location of ET data is determined by the client runtime control ET data storage location and the TM control ET data storage location:

If ET data storage location is configured for "TM", it may be necessary to migrate existing ET data from application databases into the TM's recovery file, according to the following considerations:

- If an application that uses ET data is capable of starting from an initial state where no ET data is stored, it can be run without migrating ET data.
- If, on the other hand, the current ET data contents of the application are required whenever the application is executed, the application's current ET data must be migrated.

 **Caution:** Sites newly deploying Adabas Transaction Manager who wish to maintain ET data in the TM recovery file must perform this ET data migration before any ET data dependant applications are run.

ET Data Management Checklist

The following checklist outlines the required steps in the ET data management procedure:

1. Identify the ETIDs whose ET data needs to be migrated.
2. Identify the database(s) in which the ET data is currently stored.
3. For each database identified in step 2, use Adabas Online System to delete ET data for any ETIDs that were not identified in step 1.
4. For each database identified in step 2, start an ET data management activity.

ET Data Management Activity Display/Start

This feature is provided as part of tasks in the System Coordinator network discovery function. Refer to *How to display/start ET Data management activity*.
