1 Entire Net-Work 7.7 Release Notes

This document provides release notes for the Entire Net-Work 7.7 SP1 release. It is organized as follows:

<i>Enhancements</i>	Describes the enhancements made to Entire Net-Work in Version 7.7.
<i>Entire Net-Work 7 Compatibility</i>	Describes compatibility issues between Entire Net-Work 7 and other products.
<i>End of Maintenance</i>	Describes the maintenance plans for prior Entire Net-Work releases.
<i>Migration Considerations</i>	Lists things to consider when migrating from earlier releases of Entire Net-Work
<i>Documentation and Other Online Information</i>	Describes the documentation and other online information you can obtain for this release of Entire Net-Work.

2 Enhancements

The primary enhancement in this release of Entire Net-Work is a rollup of fixes to from previous versions.

There is an internal change to how Entire Net-Work Server finds the required license module libraries. The change is transparent to the user.

Last-minute information on this release is available in the *ReadMe* file.

After installation, please visit the Software AG Empower Product Support website at <https://empower.softwareag.com> to check for and apply any available fixes to Entire Net-Work 7.7 SP1.

Since Entire Net-Work Server has some dependencies on the products Adabas Client, you should also check for and apply any available fixes to Adabas Client.

As of this release, fixes to Entire Net-Work Server will be delivered using the Software AG Update Manager. For more details, see section *Installing and Uninstalling Entire Net-Work Server* of this documentation.

3

Entire Net-Work 7 Compatibility

- Adabas and Classic Entire Net-Work Version Compatibility 6
- Adabas Database Compatibility 6
- EntireX Communicator Compatibility 6

This chapter describes the Entire Net-Work 7 compatibility issues.

Adabas and Classic Entire Net-Work Version Compatibility

Entire Net-Work 7.7 provides the ability to communicate with and pass Adabas traffic with other released versions of Entire Net-Work:

Platform	Entire Net-Work Version	Adabas Version
Workstations	2.6 SP1	6.1 SP11 and later versions
UNIX	2.1 SP1	6.1 SP11 and later versions
OpenVMS	3.2 SP6	6.1 SP11 and later versions
Mainframe	6.2 and later versions	7, 8

Adabas Database Compatibility

Entire Net-Work 7 supports both local and remote Adabas databases. Software AG recommends the use of Adabas 6 on open systems with Entire Net-Work 7 on open systems.

EntireX Communicator Compatibility

The NET transport method of EntireX Communicator on UNIX and Windows does not support Entire Net-Work 7.3, 7.4, or 7.5. For additional information, contact your Software AG technical support representative.

4 End of Maintenance

For information on how long a product is supported by Software AG, access Software AG's Empower web site at <https://empower.softwareag.com>.

Log into Empower. Once you have logged in, you can expand **Products** in the left menu of the web page and select **Product Version Availability** to access the Product Version Availability application. This application allows you to review support information for specific products and releases.

5 Migration Considerations

If the Adabas Directory Server is installed and used by a prior version this product, be sure to use the existing Adabas Directory Server port number setting for this installation. You can change the port number after this product is installed. For complete information on changing the Directory Server port number used, read *Changing the Adabas Directory Server Port Number*, in the *Entire Net-Work LUW Installation Guide*.

Note: You cannot use the System Management Hub (SMH) agents installed with an earlier version of Entire Net-Work Client or Entire Net-Work Server to manage this version of Entire Net-Work Client or Entire Net-Work Server. You must use the SMH agents distributed with this version instead. These agents are installed as part of the Entire Net-Work Administration LUW installation.

To migrate from an older version of Entire Net-Work Client to this one, you need only install this newer version. If you want to use your older Entire Net-Work Client configurations in this new version, you must migrate them. For complete information on migrating older Entire Net-Work Client configurations, read *Migrating Entire Net-Work Client Configurations*, in the *Entire Net-Work Client Installation and Administration Guide*.

To migrate from an older version of Entire Net-Work Server to this one, you need only install this newer version. If you want to use your older Entire Net-Work Server Kernel configurations in this new version, you must migrate them. For complete information on migrating older Kernel configurations, read *Migrating Kernel Configurations*, in the *Entire Net-Work Server LUW Installation and Administration Guide*.

Caution: Once a Kernel configuration has been migrated to 7.6, it cannot be migrated back to an earlier Entire Net-Work Server version. If you really need to do so, contact your Software AG technical support representative for assistance.

6 Documentation and Other Online Information

- Software AG Documentation Website 12
- Software AG TECHcommunity 12
- Software AG Empower Product Support Website 12

The following online resources are available for you to obtain up-to-date information about your Software AG products:

Software AG Documentation Website

You can find documentation for all Software AG products on the Software AG Documentation website at <http://documentation.softwareag.com>. This site requires Empower credentials. If you do not have an Empower user ID and password yet, you will find instructions for registering on this site (free for customers with maintenance contracts) or you can also use the TECHcommunity website to access the latest documentation.

Software AG TECHcommunity

You can find documentation and other technical information on the Software AG TECHcommunity website at <http://techcommunity.softwareag.com>. You can:

- Access product documentation, if you have TECHcommunity credentials. If you do not, you will need to register and specify "Documentation" as an area of interest. If you already have TECHcommunity credentials, you can adjust your areas of interest on the TECHcommunity website by editing your TECHcommunity profile. To access documentation in the TECHcommunity once you are logged in, select **Documentation** from the **Communities** menu.
- Access articles, demos, and tutorials.
- Use the online discussion forums, moderated by Software AG professionals, to ask questions, discuss best practices, and learn how other customers are using Software AG technology.
- Link to external websites that discuss open standards and web technology.

Software AG Empower Product Support Website

You can find product information on the Software AG Empower Product Support website at <https://empower.softwareag.com>. This site requires Empower credentials. If you do not have an Empower user ID and password yet, you will find instructions for registering on this site (free for customers with maintenance contracts).

To submit feature/enhancement requests, get information about product availability, and download products and certified samples, select **Products & Documentation** from the menu once you are logged in.

To get information about fixes and to read early warnings, technical papers, and knowledge base articles, select **Knowledge Center** from the menu once you are logged in.
