1 Release Notes

Adabas Manager provides browser-based administration and monitoring of Adabas databases on Linux, Windows and mainframe platforms.

This document provides information about the current version of Adabas Manager. It is organized as follows:

General	General description and features of Adabas Manager.
New and Modified Features in Version 9.2	New/modified features in Version 9.2
Dropped Features	No longer part of the software.
Documentation	Notes about the Adabas Manager documentation.

2 About this Documentation

■ Document Conventions	4
■ Online Information and Support	4
■ Data Protection	5

Document Conventions

Convention	Description
Bold	Identifies elements on a screen.
Monospace font	Identifies service names and locations in the format <i>folder.subfolder.service</i> , APIs, Java classes, methods, properties.
<i>Italic</i>	Identifies: Variables for which you must supply values specific to your own situation or environment. New terms the first time they occur in the text. References to other documentation sources.
Monospace font	Identifies: Text you must type in. Messages displayed by the system. Program code.
{ }	Indicates a set of choices from which you must choose one. Type only the information inside the curly braces. Do not type the { } symbols.
	Separates two mutually exclusive choices in a syntax line. Type one of these choices. Do not type the symbol.
[]	Indicates one or more options. Type only the information inside the square brackets. Do not type the [] symbols.
...	Indicates that you can type multiple options of the same type. Type only the information. Do not type the ellipsis (...).

Online Information and Support

Product Documentation

You can find the product documentation on our documentation website at <https://documentation.softwareag.com>.

Product Training

You can find helpful product training material on our Learning Portal at <https://learn.software-ag.com>.

Tech Community

You can collaborate with Software GmbH experts on our Tech Community website at <https://tech-community.softwareag.com>. From here you can, for example:

- Browse through our vast knowledge base.
- Ask questions and find answers in our discussion forums.
- Get the latest Software GmbH news and announcements.
- Explore our communities.
- Go to our public GitHub and Docker repositories at <https://github.com/softwareag> and <https://hub.docker.com/publishers/softwareag> and discover additional Software GmbH resources.

Product Support

Support for Software GmbH products is provided to licensed customers via our Empower Portal at <https://empower.softwareag.com>. Many services on this portal require that you have an account. If you do not yet have one, you can request it at <https://empower.softwareag.com/register>. Once you have an account, you can, for example:

- Download products, updates and fixes.
- Search the Knowledge Center for technical information and tips.
- Subscribe to early warnings and critical alerts.
- Open and update support incidents.
- Add product feature requests.

Data Protection

Software AG products provide functionality with respect to processing of personal data according to the EU General Data Protection Regulation (GDPR). Where applicable, appropriate steps are documented in the respective administration documentation.

3 General

Adabas Manager provides browser-based administration and monitoring of Adabas databases on Linux, Windows and mainframe platforms.

It can be used to administer Adabas databases on remote host machines, in addition to Adabas databases on the local machine. Common administration tasks include listing databases and files, starting/stopping and creating databases, viewing and modifying database parameters, managing database containers, and viewing information about high water marks and buffer pools.

All of the major features of previous versions are supported; exceptions are described below.

4

New and Modified Features in Version 9.2

■ Adabas Mainframe	10
■ Adabas Cluster for Linux	10
■ Layout standardization on Adabas Linux screen	10

Adabas Mainframe

Adabas Manager version 9.2 supports stopping database, force end of PLOG or CLOG, displaying and resetting interval statistics, editing database parameters, listing command queues, listing and stopping user queues, listing hold queues, as well as listing and deleting checkpoints. Information and functions related to Clustered databases are available as well.

In addition, with AOZ server, AMN920 can perform Adabas utilities by submitting mainframe JCLs and viewing the system outputs.

Adabas Cluster for Linux

As with AMN920, it is possible to view the parameters of clustered databases on Linux from the Database Monitoring - Parameters page.

Layout standardization on Adabas Linux screen

To have a consistent view between Adabas on Linux and mainframe screens, the menus (e.g. Database, File, Container and Utility) on the top navigation bar are moved to the left navigation menu.

5

Dropped Features

- Support for Internet Explorer Version 11 12

The following features from earlier versions of Adabas Manager have been dropped in this release:

Support for Internet Explorer Version 11

Internet Explorer Version 11 is no longer supported.

6 Documentation

Due to last-minute documentation updates, it may be possible that the Adabas Manager documentation or the online help that you can invoke directly from the product does not yet contain the latest information. The most up-to-date Adabas Manager documentation can always be found on the Software AG documentation website at <http://documentation.softwareag.com/>.
