

ARIS 9.8 SR6 RELEASE FEATURES

ARIS Product Marketing
October 2016

AGENDA **ARIS 9.8 SR6**

Release Highlights

Simple Handling for Business Users

Extensive Capabilities for Professionals

High-performance Administration for ARIS Experts

Important news to SAP Users

RELEASE HIGHLIGHTS

- Business information at a fingertip
- Elaborated collaboration
- Distributing licenses to different business units
- Enhanced integration between ARIS Connect & ARIS Risk & Compliance Manager
- Most extensive cloud offering of the BPA market

CREATE AND SAVE SEARCH FILTERS

ARIS CONNECT/ ARIS CLOUD

Easily access relevant information is absolutely crucial to reduce complexity

Filter information even across collaboration items or within stored documents

Use the advanced filters to run tailored search queries and instantly find your information

Save your filter settings to iteratively search important coherencies

The screenshot displays the ARIS Connect search interface. At the top, the header shows 'ARIS Connect' and a user profile 'Jeff Customer'. The search bar contains the term 'customer'. Below the search bar, a dropdown menu shows 'Portal'. A notification box indicates '4 matches' and provides a 'Save filters as favorite' option. The search criteria are listed as 'Any of the following criteria fulfilled'. The filters applied are 'Customer journey map', 'Customer journey step', 'Customer touchpoint', and 'Customer journey landscape'. The search results are displayed in a table with columns for 'Property', 'Description', and 'Filter list'. The results include:

- Customer Advisory Service - Customer journey map**
Name: Customer Advisory Service
Path: /Main group/2. Processes/2.3 CIM processes/2.3.2 Selection/Customer Advisory Service
Last change: Thu Aug 11 14:45:39 CEST 2016
- Customer review - Customer touchpoint**
Name: Customer review
Path: /Main group/2. Processes/2.3 CIM processes/2.3.4 Usage/Customer review
Description: This touchpoint is physically a critical article that a customer write about the claimed service or product.
- Invitation to customer review - Customer touchpoint**
Name: Invitation to customer review
Path: /Main group/2. Processes/2.3 CIM processes/2.3.4 Usage/Invitation to customer review
Description: After claiming a service, customers will be asked to write a review in order to share them in web. The related touchpoint is physically an email, a social media private message or a sms. To provide an easy access to the review form, this message has to include an URL linking to the review portal.
- Customer receives invitation to write review - Customer journey step**
Name: Customer receives invitation to write review
Path: /Main group/2. Processes/2.3 CIM processes/2.3.4 Usage/Customer receives invitation to write review

SEARCH FILTERING FOR MODELS

ARIS CONNECT DESIGNER/ARIS CLOUD

The screenshot displays the ARIS Connect search interface. At the top, the 'ARIS Connect' logo is visible. Below it, a search bar contains the text 'customer'. To the right of the search bar, a dropdown menu is set to 'Models', and a status indicator shows 'About 177 matches'. On the left side, there is a sidebar with 'Filters' and 'Favorites' sections. The 'Filters' section includes a 'Show all' button and a list of model types: 'Access diagram', 'Access diagram (physical)', 'Application collaboration diagram', 'Application collaboration diagram (physical)', and 'Application system diagram'. Below this list is a 'Show more...' link. The 'Favorites' section is currently empty. The main search results area shows a list of models. The first result is 'Customer qualification (to-be) - EPC', which is highlighted with a blue box. Below this result, a preview of the model is shown, including its path, description, and last change date. The second result is 'Customer services process - Value-added chain diagram', and the third is 'Customer qualification - EPC'. Each result includes a preview of the model's content, such as a flowchart or a list of attributes.

Use the advanced search filtering that is available for ARIS Connect Designer now

Filter models according to model types and attributes

Navigate to the modeling environment of ARIS Connect directly from the search results

Faster search results and access to change processes

ELABORATED COLLABORATION

ARIS CONNECT/ ARIS CLOUD

Define per content item who can actively, passively or even can't collaborate at all

Control your audience by according rights and tagging collaboration or user groups

Spread (confidential) content directly to the right colleagues & involve them in your issue

Enables efficient, directed and safety-conscious communication

The screenshot displays the ARIS Connect Collaboration interface. At the top, the header shows 'ARIS Connect' and 'Collaboration' tabs. A user profile for 'Jeff Customer' is visible in the top right. The main content area is divided into two sections. The top section, titled 'Define your collaboration audience', shows a post creation form. It includes a text area with a placeholder message, an 'Attach' section with 'Tag', 'Link', and 'File' options, and a 'Visible for' dropdown menu set to 'Sales processes'. Below this, a blue arrow points to a feed of posts. The feed shows three posts: a post by 'Jeff Customer' with a tag 'bettercollaboration', a post by 'Jeff Customer' stating 'Jeff Customer is now following Group "Sales processes"', and a post by 'Jeff Customer' commenting on a post by 'Ethan Owner'.

Hey [Ethan Owner] (#activity/person/10000 owner),

with the new collaboration features we can better distribute news to the person to whom it may concern. You can decide via the extended permissions who may follow and read collaboration feeds, who may follow and write in the collaboration feed and finally who has no access at all. Furthermore you can restrict the audience of a specific conversation by entering the UMC group or collaboration group to the field below.

STRUCTURED LICENSES TO DIFFERENT BUSINESS UNITS

ARIS ARCHITECT / DESIGNER

Keep track of licenses and always grant access to dedicated users

Create pools of licenses and specifically assign them to certain business units

Grant exclusive consumption for certain user groups and control the license distribution

Ensure the most efficient degree of utilization of licenses and lower your TCO

UMC User Licenses – All Business Units: e.g. 1000

Block certain licenses for one specific pool to always ensure access to its users

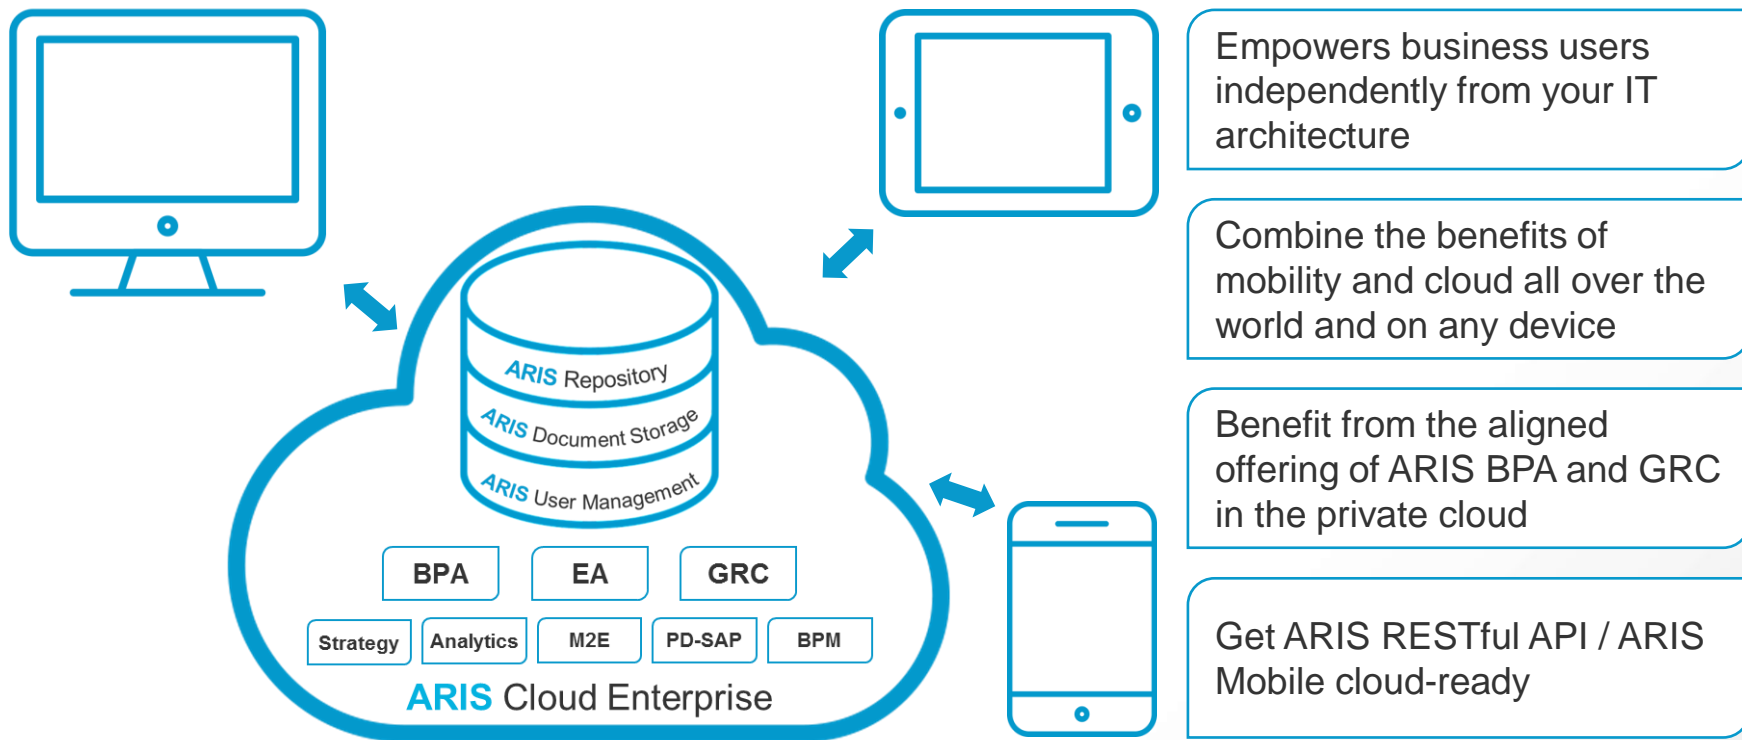

**UMC User Licenses -
Business Unit A:
e.g. 500 Licenses**

**UMC User Licenses -
Business Unit B:
e.g. 200 Licenses**

**UMC User Licenses -
Business Unit C-Z:
e.g. 300 Licenses**

MOST COMPLETE CLOUD OFFERING IN THE BPA MARKET

ARIS CLOUD LAUNCHES ARIS GRC & ARIS MOBILE

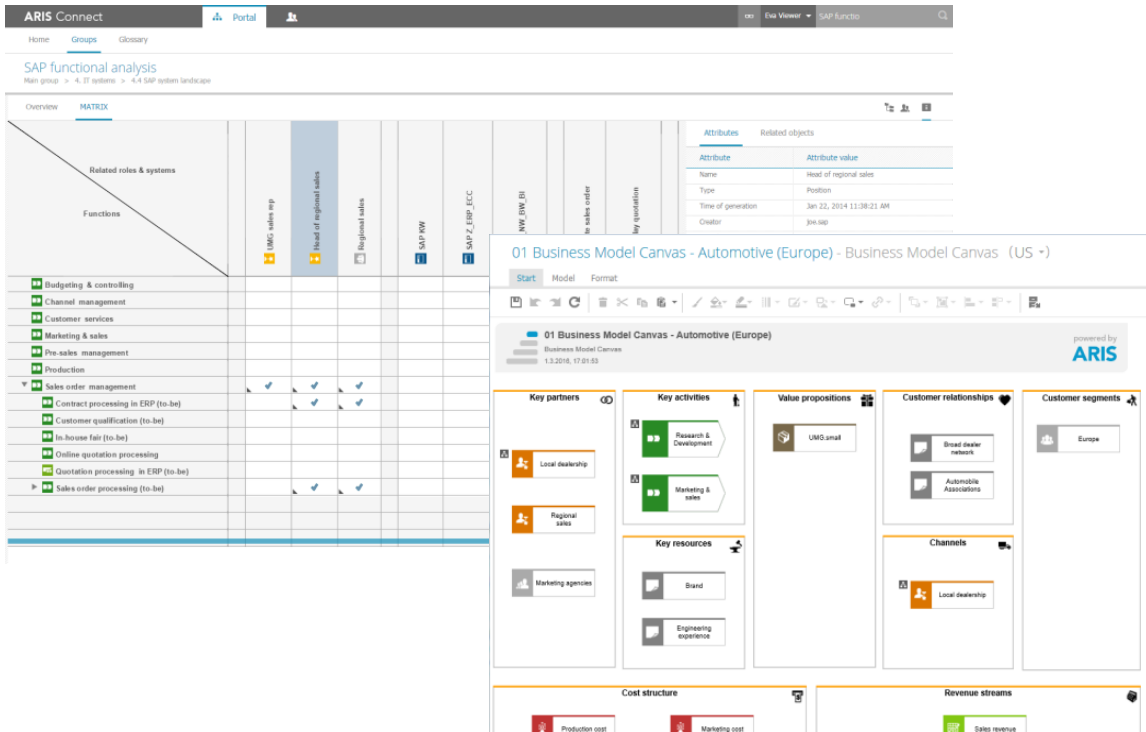

SIMPLE HANDLING FOR BUSINESS USERS

- Matrix models and Business Model Canvas in the portal
- Elaborated reporting capabilities
- Show occurrences in the ARIS Connect portal
- Sort new tables by process flow
- CXM Method extensions
- IT system factsheets for ARIS Connect
- Display meta information in portal

NEW MODEL TYPES IN THE PORTAL AVAILABLE

ARIS CONNECT/ ARIS CLOUD

Manage your strategies using Business Model Canvas also in the ARIS Connect Designer

Make matrix models available
also for viewers in ARIS Cloud
or ARIS Connect

Map business models to your architecture and use the clear matrix overview in your portal

Benefit from the same matrix model features known from the design clients

IMPROVED USAGE OF REPORTS

ARIS CONNECT/ ARIS CLOUD/ ARIS ARCHITECT/ DESIGNER

Restrict access of reports and macros for different users and user groups

Get easy access to reports no matter whether you are in portal, designer or repository

Use reports standardized for portal & designer based on the context they were started

Reduce complexity by providing user specific access to harmonized reports over all

The screenshot displays the ARIS Connect Repository interface. The left sidebar shows a hierarchical tree of 'Models and objects' under 'Databases', including 'ARIS Connect Governance Inbox', 'ARIS Connect Governance Models', 'Governance Automation Models', and 'United Motor Group'. The main area shows a list of models and objects, including 'Marketing & sales (to-be processes)', 'Billing', 'Channel management', 'Pre-sales management', 'Sales order management', and 'Sales planning'. The right sidebar shows the 'Reports' section, which includes 'Marketing & sales (to-be processes)' and 'Output model information'. A callout box highlights the 'Reports' section and 'Output model information', showing a report titled 'Model: Marketing & sales (to-be processes) - Value-added chain diagram, format: pdf'.

SHOW OCCURRENCES IN THE ARIS CONNECT PORTAL

ARIS CONNECT/ ARIS CLOUD

Navigate from one process to another based on an specific item´s occurrences

Overview item´s occurrences within & across models

Increase viewer´s clearness by showing item´s connections across the database

Reduce time and amount of clicks searching for coherency between processes

SORT NEW TABLES BY PROCESS FLOW

ARIS CONNECT/ ARIS CLOUD

Get a table based overview in the portal often simplifies understanding the process

Tailor variable sorting options for different model types thus increases the efficiency

Easily define which logic is used to sort the table within the XML configuration

Sort either by process flow, alphabet, x-y/y-x-coordinates or attribute values

The screenshot shows the ARIS Connect portal interface. The top navigation bar includes 'ARIS Connect', 'Portal', and user information 'Jeff Customer'. The breadcrumb trail indicates the current location: 'Main group > 2. Processes > 2.1 Process architecture > 2.1.1 Core processes > 2.1.1.4b Marketing & sales (to-be) > Sales order management (to-be) > 2.1.1.4b.2.2 Customer qualification'. The page title is 'Customer qualification (to-be)'. Below the title, there are tabs for 'Overview', 'Steps', 'Table', 'RACI', 'Diagram', 'Tasks', and 'More'. The 'Table' tab is selected, displaying a table of activities. A dropdown menu is open over the table, showing sorting options: 'Sort by process flow' (selected), 'By X-Y position', and 'By Y-X position requirements'. The table has columns for 'Name', 'Description', 'Roles', 'IT systems', and 'Documents'. The data rows are: 1. 'Head of regional sales' with role 'Local dealership sales rep'. 2. 'Product Catalogue Requirement' with role 'Local dealership sales rep'. 3. 'Present vehicle' with role 'Local dealership sales rep' and description 'Present vehicle consists of the presentation of a concrete car model in the showroom.' The bottom of the page shows 'Show all' and '1-3 of 6'.

Name	Description	Roles	IT systems	Documents
Head of regional sales		Local dealership sales rep		
Product Catalogue Requirement		Local dealership sales rep		Product Catalogue Requirement
Present vehicle	Present vehicle consists of the presentation of a concrete car model in the showroom.	Local dealership sales rep

announcement 1 CK 1

Improvement 1

Jeff Customer

Ethan Owner,

I maintained the Connect Factsheet of the Enterprise UMG journey landscape. Now we can better analyze where we had to start improving our customer experience. I think we should check up the purchase phase first.

CK Improvement announcement

Just now

Enterprise UMG Journey Landscape

Customer journey landscape

Jan 26, 2016 4:53:55 PM

powered by ARIS

Awareness

Promotion

Consideration UMG

Consideration... is predecessor of Customer journey

Customer journey is predecessor of Consideration...

Enhance the customer journey landscape overview by the new journey factsheets

Simplify viewers perception of the several customer journeys and their status quo

Use new connection types to better represent and analyze customer journey landscapes

Encompass journeys as a part of a lifecycle stage and put your journeys in a sequence

IT SYSTEM FACTSHEET ENHANCEMENTS

ARIS CONNECT/CLOUD

Get extensive information on various aspects of IT systems with the IT system factsheet

Specify different types of responsibility for an IT system by using new connection types

Provide a quick overview of IT system information for viewer

Ensure to easily edit selected IT system information for contributors

The screenshot displays the ARIS Connect web application interface. The top navigation bar includes 'ARIS Connect', 'Portal', and 'Administrator System'. The main content area shows the 'PRO-ORDER' system factsheet. The breadcrumb trail is 'Main group > 4. IT systems > 4.6 Systems > 4.6.1 System inventory > PRO-ORDER'. The factsheet is divided into two main sections: 'Description' and 'Properties'. The 'Description' section contains a paragraph: 'The order processing module is part of the ProOn Software system and provides functionality for OKD shipments.' The 'Properties' section is a table with the following data:

Name	PRO-ORDER
Short description	ProOn Software order processing module
Manufacturer	Proprietary system
Standardization status	Standard
Individual development	Yes
Warranty until	Dec 1, 2019
Number of internal users	Up to 1000
Number of external users	0
Criticality	Very high
Availability	99.9 percent
Maximum downtime	Less than 1 hour

On the right side of the factsheet, there is a 'System manager' section with a profile for Peter Brown (peter.brown@united-motors-group.com, 555-32547). Below this is a 'Substitute' section with a profile for John Cooper (john.cooper@united-motors-group.com). At the bottom is a 'Persons responsible' section with a profile for Michael Wyler (michael.wyler@united-motors-group.com).

EXTENSIVE CAPABILITIES

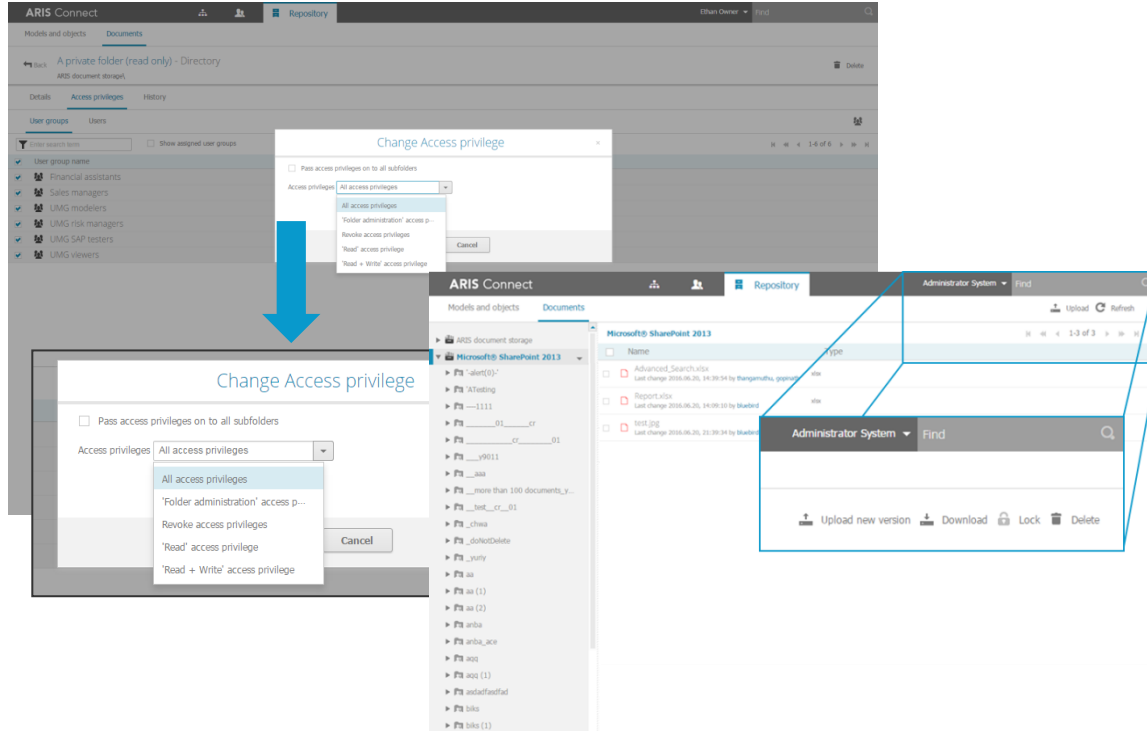

FOR PROFESSIONALS

- Improved access control for document storage
- Elaborated table-based modeling
- Object mapping in Connect and bulk import
- Object specific manager roles
- Improved handling of ARIS Risk & Compliance Manager
- Enhanced user experience for ARIS Process Governance
- Import and update pictures via report API
- Enhancement of ARIS Process Governance
 - Enhanced Report-support
 - Extend APG Service "Save attribute(s)"
- Model-2-Execute:
 - Support REST for service request use case
 - Input/ Output elements in FADs

IMPROVED DOCUMENT STORAGE

ARIS CONNECT/ ARIS CLOUD

Enable the right people to access the right information at the right time

Set up and control access authorization on documents folders to ensure data integrity

Change documents version and in ARIS and refer it to Microsoft® SharePoint 2013®

Increase your control about the distribution of documents and knowledge

ELABORATED TABLE-BASED MODELING

ARIS CONNECT/ ARIS CLOUD

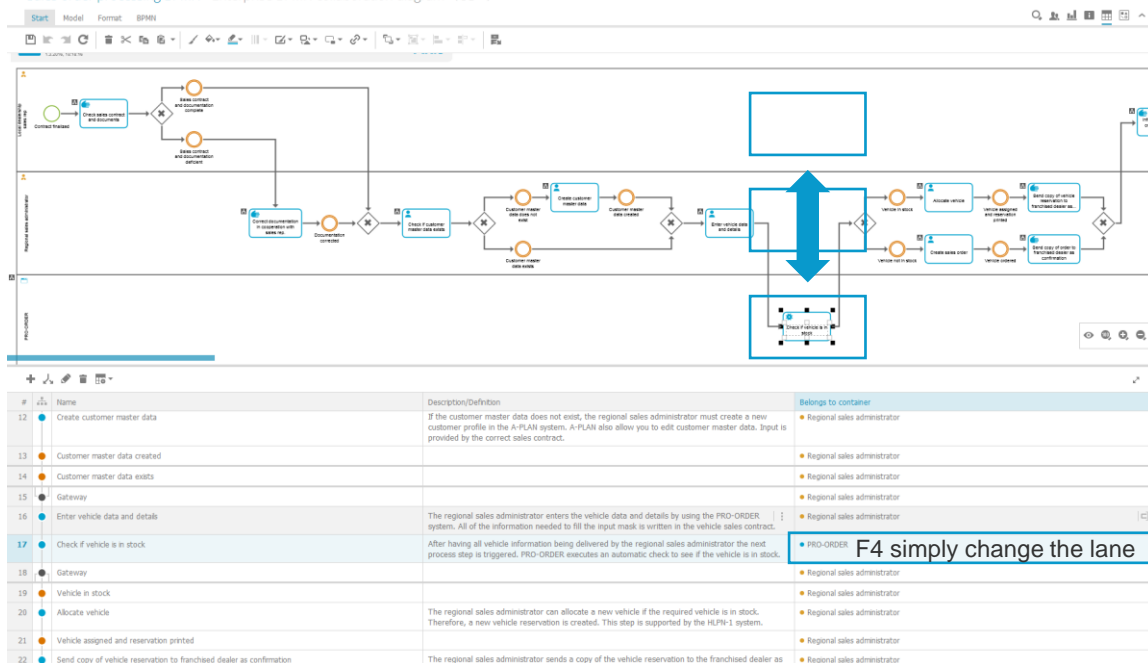

Simplify modeling by a better use of the keyboard in many situations (e.g. workshops)

Use the improved keyboard navigation of to change processes quickly

Model table based no matter in which phase of the design process you are

Move objects between containers or create new ones just via keyboard

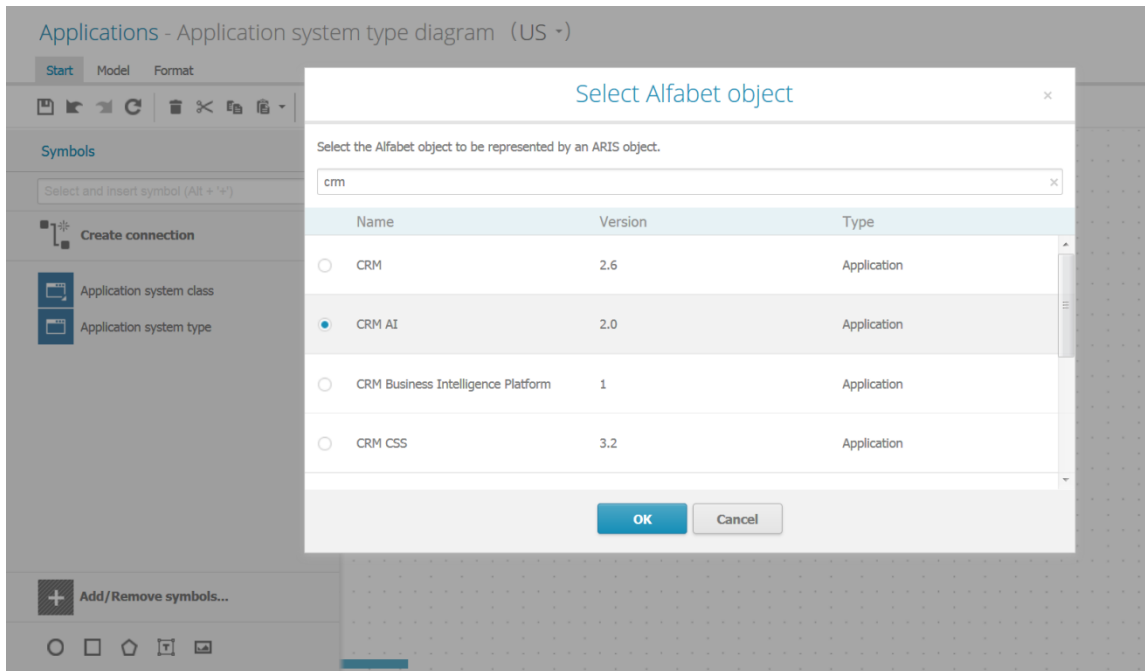

Sales order processing BPMN - Enterprise BPMN collaboration diagram (US -)

F4 simply change the lane

OBJECT MAPPING IN CONNECT AND BULK IMPORT

ARIS/ALFABET INTEROPERABILITY

Map single objects mastered in ALFABET and reuse them in ARIS Connect Designer

Use bulk mapping to import many assets from ALFABET into ARIS

Create and synchronize connections, assignments and diagrams in addition to objects

Benefit from a simplified license structure for ARIS/ALFABET interoperability

OBJECT SPECIFIC MANAGER ROLES

ARIS RISK & COMPLIANCE MANAGER

Restrict access rights for certain GRC manager roles can be crucial

Define object-specific manager roles also for special elements

Restricted access to test cases, surveys, sign offs and deficiencies

Better protection of confidential data

Test case

Survey

Deficiency

Sign off
process

IMPROVED HANDLING FOR OPERATING GRC USERS

ARIS RISK & COMPLIANCE MANAGER

ARIS Risk & Compliance Manager [Home](#)

Save Generate PDF report Mark Back

Documents

Status* Non-compliant

Reason* Significant

Measure* Unspecified

Result* No issue
Issue

Prioritize risks based on risk scores calculated via qualitative risk assessments

Benefit from a automated generation of issues for not compliant audit steps

Enforce the segregation of duties to prevent role conflicts (e.g. Owner = Reviewer)

Send emails from ARCM to external email addresses (non-ARCM users)

ENHANCED USER EXPERIENCE AND PERFORMANCE

ARIS PROCESS GOVERNANCE

Custom buttons for custom workflows in ARIS Connect

Deactivate unneeded user notifications

Import/export of APG configuration via Process administration

The screenshot displays the ARIS Administration interface, specifically the Configuration page under Process Governance. The table lists various configuration properties, including keys like 'com.idischeduler.ape.config.encrypted', 'com.idischeduler.ape.activity.ws.call.timeout', and 'com.idischeduler.ape.xe.maxExecDuration'. A callout box highlights the 'Administrator System' dropdown menu and the 'Export current configuration as a file.' button.

Key	Show name	Value
com.idischeduler.ape.config.encrypted	Encrypted properties	
com.idischeduler.ape.activity.ws.call.timeout	Web service read timeout	43200
com.idischeduler.ape.xe.maxExecDuration	Maximum execution time	43200
com.idischeduler.ape.query.maxResults	Maximum query result size	500
com.idischeduler.ape.log.dblogger.severity	Log level	INFO
com.idischeduler.ape.autodeploy.archive	Archive folder	C:/SoftwareAG/ARIS9.8/

WORKFLOW OVERVIEW IN PROCESS ADMINISTRATION

ARIS PROCESS GOVERNANCE

The screenshot displays the ARIS Administration interface, specifically the 'Process administration' section. The top navigation bar includes 'Processes', 'Human tasks', 'Instances', and 'Console'. The main area shows a list of process instances for '2016-08-22 16:50:30 eva.viewer [Sales order processing]'. The table lists various events and activities, including 'End event', 'Implement change request', and 'Send approval e-mail to auth.'. Below the table, there is a detailed view of a specific instance, showing its 'Input data' and 'Output data'. The 'Input data' section includes fields like 'Database name', 'Database language', 'User login', 'Password', and 'Selected items'. The 'Output data' section shows the 'AT_REALIZATION_STA' field. A yellow box highlights a note about the model testing the AND, OR, and NOT operator in the data flow of the Notification task. At the bottom, a process diagram is visible, showing the flow of the process.

ARIS Administration

2016-08-19 08:55:54 (3)
Process version

Details Context Diagram

This model tests the AND, OR and NOT operator in the data flow of the Notification task.

Test:

- (1) Connect yourself to the role QA with a performas connection in the OrgChart AGTeam in the folder _Organisation
- (2) Deploy and run process.

Result:

When the human task is executed, three boolean values have to be entered. Afterwards an email is send to you with the results of the boolean operations.

Process diagram showing the flow of the process, including tasks like 'Set status to "Is planned"', 'Send approval e-mail to auth.', and 'Implement change request'.

Benefit from the new & sophisticated workflow overview

Control & proof the state of process executions via a diagram

Check up the exact time stamp of delegation history in the process board dialog

Use the more user-friendly table overview to oversee data in the process administration

BETTER PERFORMANCE FOR QUERIES & SPREADSHEETS

TECHNICAL IMPROVEMENTS

Profit by a new architecture for queries and spreadsheets that causes a performance boost

Run greater queries and spreadsheets faster than ever before

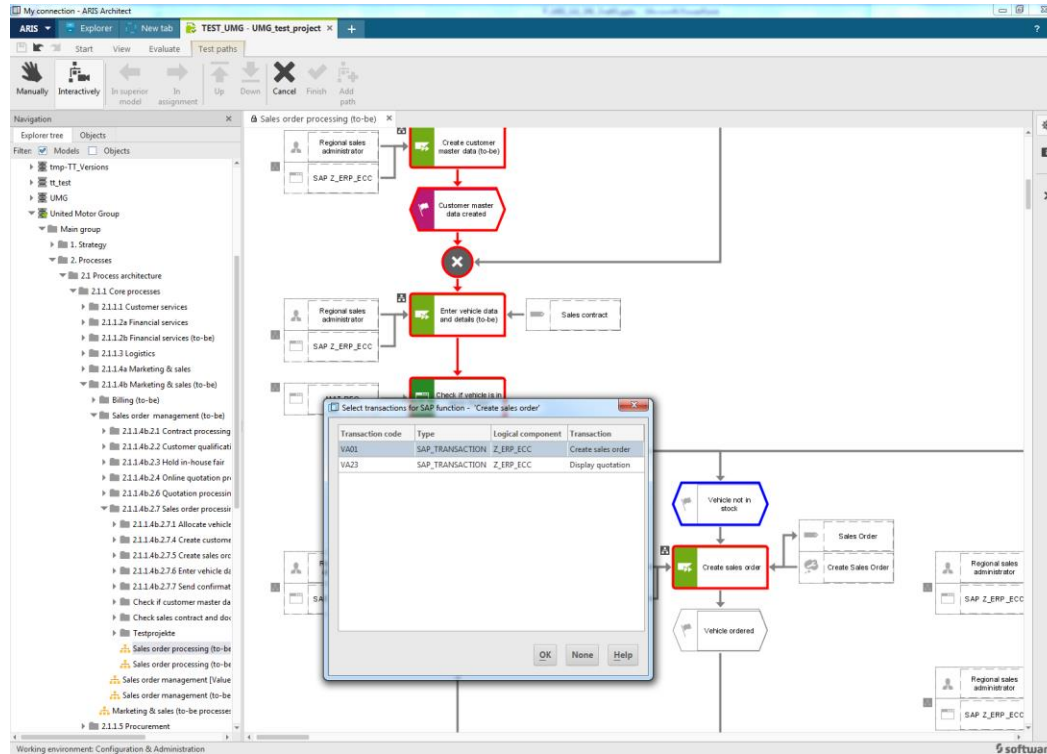

Accelerate your query runtime on customer data by almost 70 %

Reduce time for style change by more than 50% and for template change by 60%

The screenshot displays the ARIS Architect interface. On the left, a process diagram shows a flow starting from 'Sales order processing' through 'Contract processing' and 'Check sales contract and documents' to 'Local dealership sales rep' and 'New vehicle sales contract'. On the right, a table titled 'Table 1' shows the output of a query. The table has columns A through H. The data rows show various steps in the process, such as 'Allocate vehicle', 'Check if customer master data exists', 'Check if vehicle is in stock', 'Check sales contract and documents', 'Contract processing', 'Correct documentation in cooperation...', 'Create customer master data', 'Create sales order', and 'Invalid sales order processing'. The table also includes a 'Template' column and a 'Result' column.

	A	B	C	D	E	F	G	H
1	Allocate vehicle	Allocate vehicle	810					
2		HELP-1	33					
3		New vehicle reservation	218					
4		Regional sales administrator	145					
5		Vehicle assigned and reservation printed	1					
6		Vehicle in stock	1					
7	Check if customer master data exists	(Unbilled)	44					
8		Check / Edit customer master data	810					
9		New vehicle sales contract	218					
10		PRO-ORDER	33					
11		Regional sales administrator	145

29		Customer master data does not exist	1					
30		New vehicle sales contract	218					
31		Regional sales administrator	145					
32	Create sales order	Invalid sales order processing	688					
33		New vehicle sales order	718					

TEST DESIGN AVAILABLE TO ALL ARIS DESIGNER USERS

Reuse of process information
for test design saves time

Fast design of end-to-end test
paths

Automated test path
generation fastens test phase

Comprehensive test design
secures project success

HIGH-PERFORMANCE FOR ADMINISTRATION EXPERTS

- Tenant management enhancements
- Backup, restore and reorganize databases as a system user
- Better Performance by technical improvements

TENANT MANAGEMENT ENHANCEMENTS

TECHNICAL IMPROVEMENTS

Administrate a multitude of tenants is a duty without a efficient tenant management

Install, update and smoothly migrate your tenants via a embedded runnable

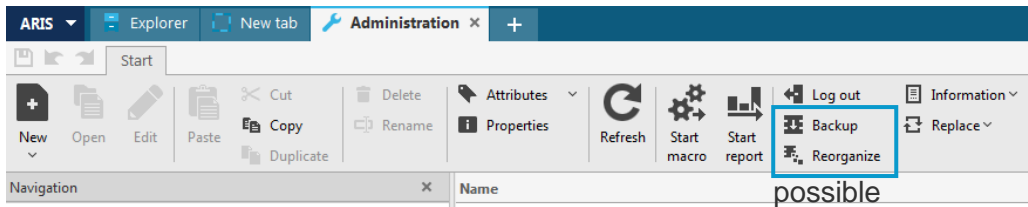

Backup and restore master tenant via its own web UI

Give certain business units or subsidiaries their own tenant and keep track of them easily

Tenant Management					Administrator
Tenants Schedules Backups					🔄 + 🔍 Search
Tenant name	Status	Usage	Licences	Backup	
 default on localhost	● Loading failed			📘 No backups	
 master on localhost	● Read only	✖ Unknown	0%	📘 No backups	
 test on localhost	● Active	✖ Unknown	0%	✓ February 29, 2016 1:22 PM	⋮
 test01 on localhost	● Active	✖ Unknown	28%	✓ February 29, 2016 1:19 PM	
 test02 on localhost	● Active	✖ Unknown	42%	✓ February 29, 2016 1:20 PM	
 test03 on localhost	● Active	✖ Unknown	29%	✓ March 2, 2016 12:00 PM	
 test345 on localhost	● Loading failed			📘 No backups	
 test555 on localhost	● Loading failed			📘 No backups	

BACKUP & REORGANIZE A DATABASE AS SYSTEM USER

ARIS ARCHITECT / DESIGNER

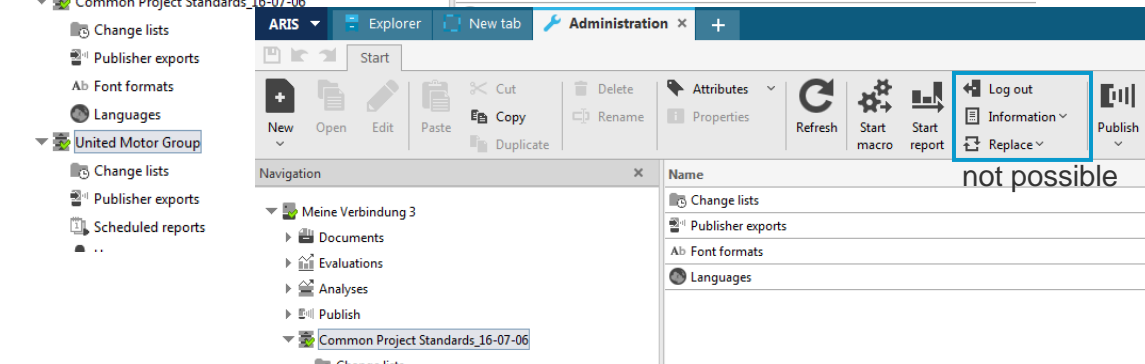

Benefit from setting database administrator privilege for system users by default

Backup, restore and reorg a database without overall database administration

Decentralize the responsibility for several databases by assigning a user for each one

Keep the segregation of duties and a clear role assignment while distributing competences

ARIS PERFORMANCE TECHNICAL IMPROVEMENTS

Benefit from a broad range of small improvements promising great progress together

Fine grained and form-based configuration of user activity audit logs

ARIS Connect/ Cloud supports: SAML2 - Support of Redirect binding

The screenshot displays the ARIS Administration interface. The top navigation bar includes 'ARIS Administration' and several icons. Below it, a secondary navigation bar shows 'Portal', 'User management' (highlighted), 'Document storage', 'Process Governance', and 'Collaboration'. The main content area is titled 'Configuration' and features a dropdown menu set to 'Security'. On the left, a sidebar lists 'Account lockout', 'User sessions', 'Multi-factor authentication', and 'Advanced settings' (highlighted). The main panel shows a list of configuration options with checkboxes and input fields:

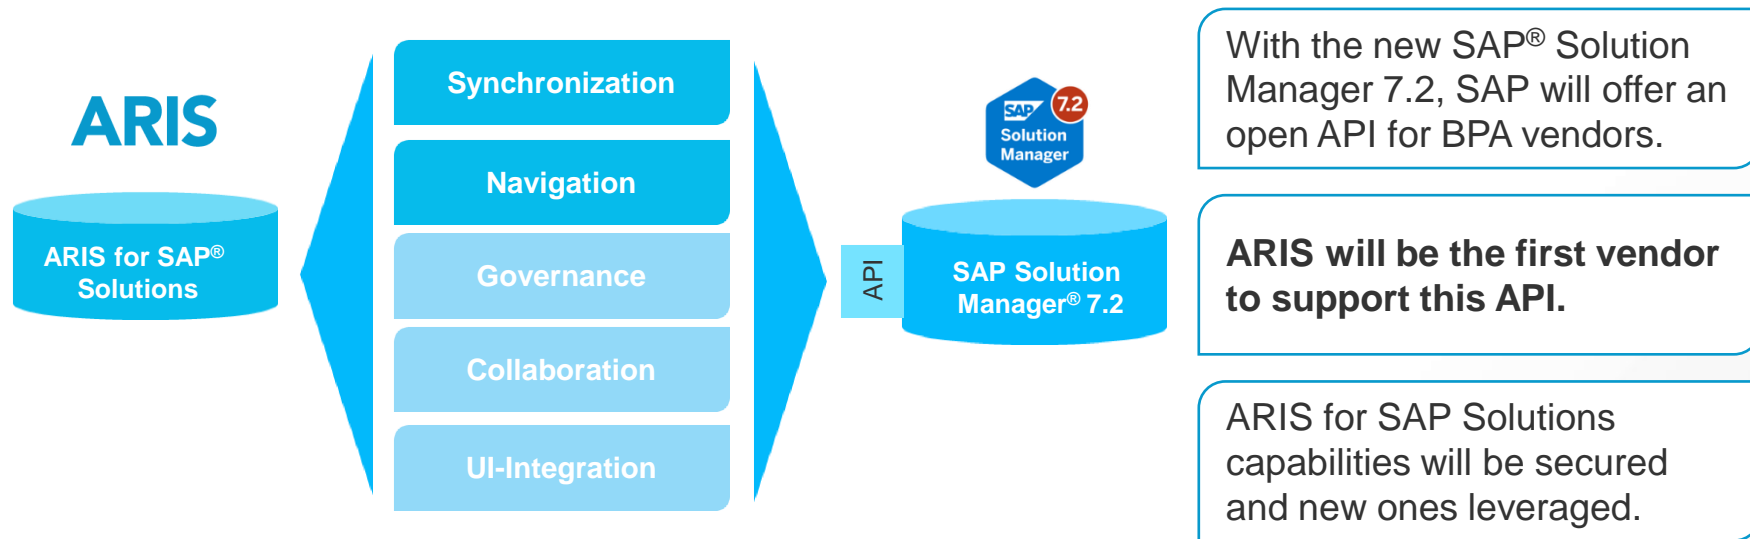

Configuration Option	Value / Status
Generate user statistics	<input checked="" type="checkbox"/>
Log authentication	<input checked="" type="checkbox"/>
Log changes to configuration	<input checked="" type="checkbox"/>
Log changes to licenses/privileges	<input checked="" type="checkbox"/>
Log changes to users/user groups	<input checked="" type="checkbox"/>
Force SSO	<input type="checkbox"/>
Minimum authentication delay	0
Maximum authentication delay	0
Use OTPs	<input checked="" type="checkbox"/>
Lifetime	60
License distribution	<input type="checkbox"/>

IMPORTANT TO SAP USERS

- SAP offers an open API with SAP Solution Manager 7.2 SP3
- ARIS is the first BPA tool to support it
- Dedicated timeline and releases will be available

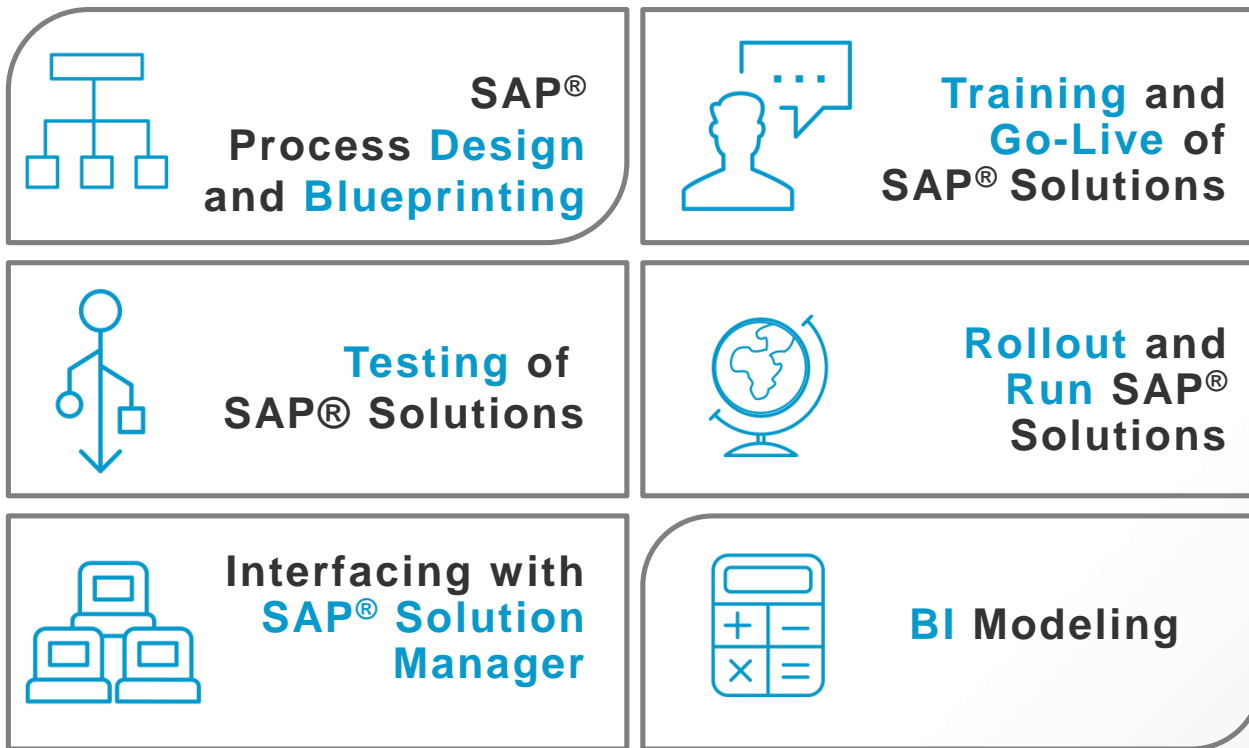

ARIS FOR SAP® SOLUTIONS AND SAP SOLUTION MANAGER LEVERAGE THE NEW API FOR CONTINUED INTEGRATION

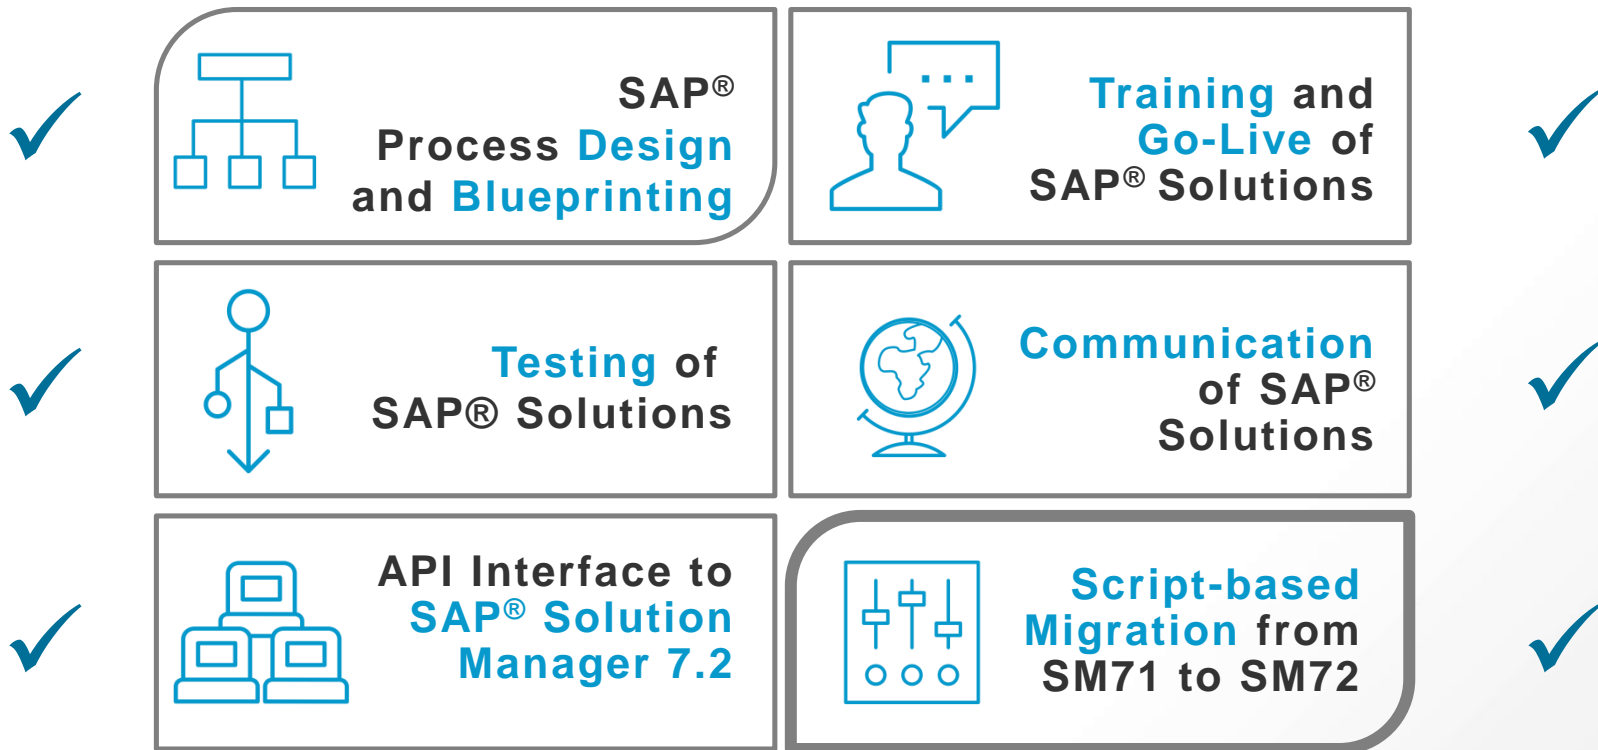

GENERAL USE CASES OF ARIS IN SAP® SOLUTIONS

STATUS QUO – SAP SOLUTION MANAGER 7.1

GENERAL USE CASES OF ARIS IN SAP® SOLUTIONS

MIGRATION PATH – SAP SOLUTION MANAGER 7.2 WITH API

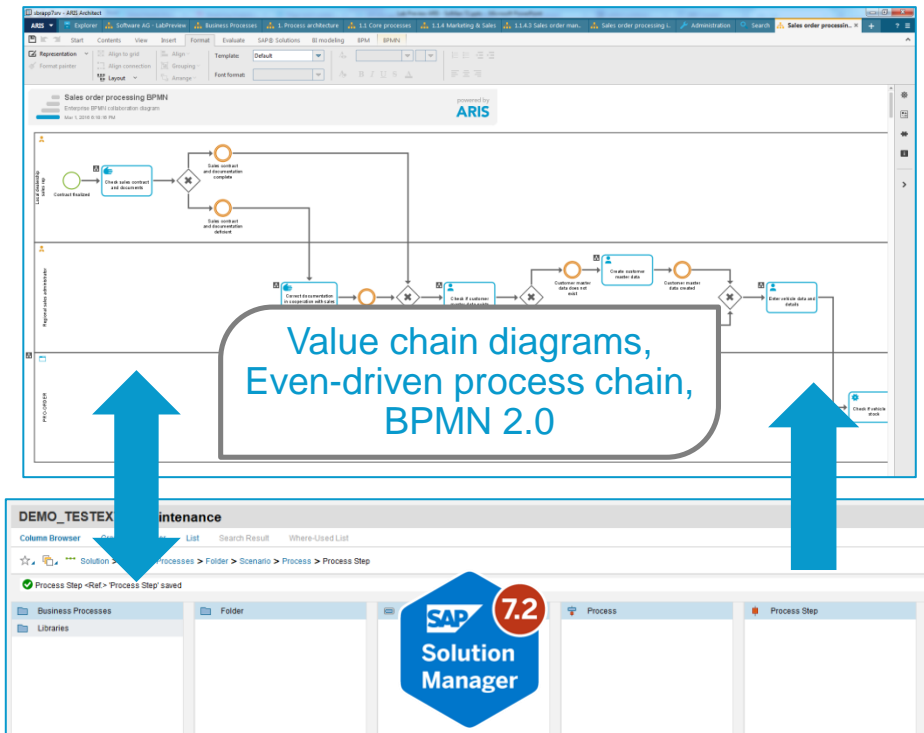

ARIS FOR SAP® SOLUTIONS AND SAP SOLUTION MANAGER

BI-DIRECTIONAL INTERFACE

ARIS

Bi-directional

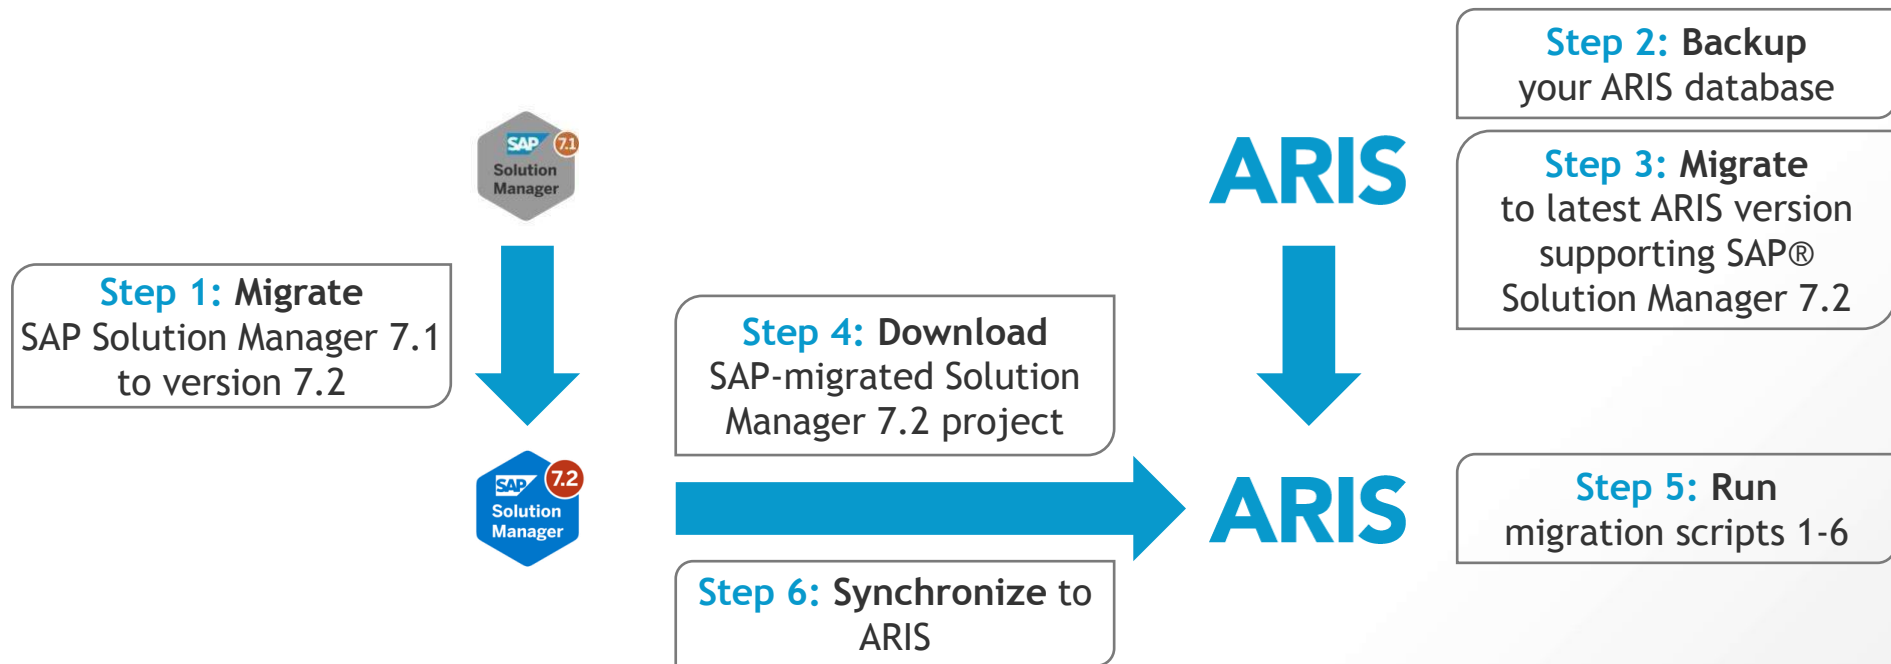

- Folder
- Scenario
- Process
- Process Steps
- Transactions
- End-user roles
- (Upload) Documents
- Customer attributes

Uni-directional

- Branches
- Master data
- Organizational units
- SAP system landscape

ARIS FOR SAP® SOLUTIONS AND SAP SOLUTION MANAGER MIGRATION PROCEDURE – OVERVIEW

It is strongly recommended that no changes to the project in SAP® Solution Manager 7.2 are made before the migration of the ARIS project is done.

FUTURE USE CASES OF ARIS IN SAP® SOLUTIONS

MIGRATION PATH - SAP SOLUTION MANAGER 7.2 WITH API

MEANING

ARIS is **THE**
TOOL OF CHOICE
TO SECURE
SAP CUSTOMERS'
INVESTMENT
IN BPA

ARIS AND SAP® SOLUTION MANAGER 7.2 SP3

WHAT'S IN AND WHEN?

Early adopter version will be based on ARIS 9.8 SR 5

Early version provides synchronization and migration functionalities

Technical restriction: early adopter version can NOT be combined with ARIS 9.8 SR 6

ARIS 9.8 SR 7 offers an extended version

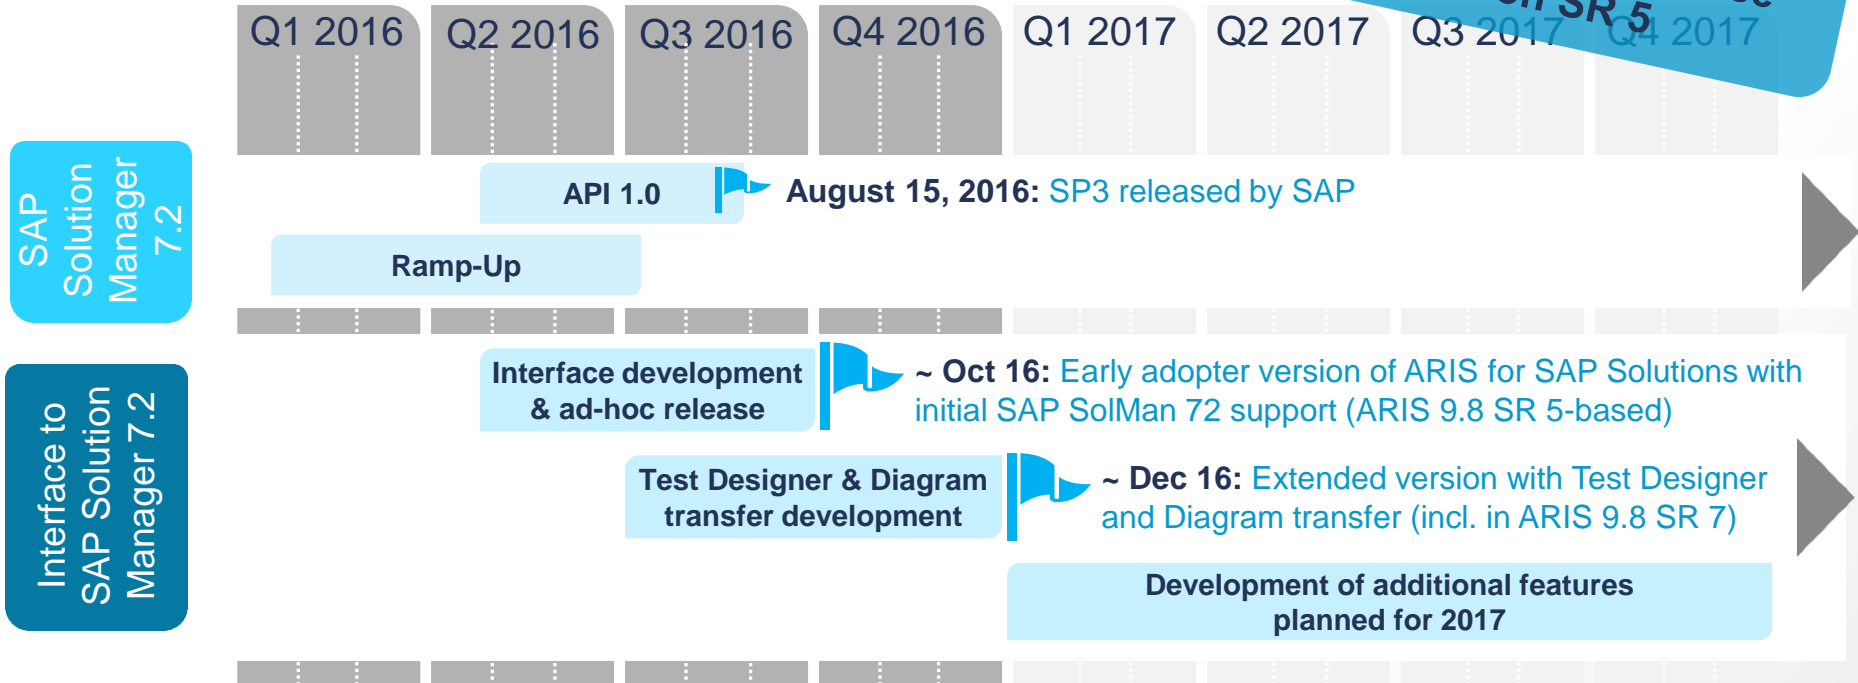

Including ARIS Test Designer & new functionalities like diagram transfers

This version CAN be combined with ARIS 9.8 SR 6

ARIS AND SAP® SOLUTION MANAGER 7.2

CURRENT ROADMAP

NOT PART OF ARIS 9.8 SR 6
But in a dedicated release
based on SR 5
