

ARIS MOBILE/API ACCESS LEGAL TERMS

ARIS 9.8 SR6 | OCTOBER 2016

Product-specific license restrictions

ARIS API Mobile Access / ARIS Connect Viewer / ARIS Connect Designer

These licenses entitle the Licensee to use a mobile application that interacts with the ARIS Server via the ARIS API. A mobile application is defined as a piece of software that meets these criteria:

- Is designed and optimized to run on mobile devices (smartphones/tablets) and mobile platforms (iOS®, Android®, Windows® Phone, Windows® 10 Mobile)
- Shows only a reduced functional presence and supports only micro-tasking with a minimal feature set serving a targeted purpose, such as selective content capturing / consumption as opposed to massive, high-volume capturing / consumption. In this sense, a mobile application differs from a desktop application by the number of functionalities offered to the user and by the focus of these functionalities to a well-tailored, narrow use case.
- Leverages key mobile technologies, such as a camera, video and audio recording, location identifiers, offline usage and any environmental sensors

ARIS API Read Access

This license entitles the Licensee to read ARIS content from the ARIS Server via the ARIS API by using a third-party application. This does not include the right to use a third-party application distributing ARIS content programmatically to a group of persons lacking ARIS user client licenses, i.e., ARIS Connect Viewer, ARIS Connect Designer, ARIS Architect, ARIS Designer, ARIS Viewer, ARIS API Read Access, or ARIS API Full Access.

ARIS API Full Access

This license entitles the Licensee to read and write ARIS content from and into the ARIS Server via the ARIS API by using a third-party application. This does not include the right to use a third-party application distributing ARIS content programmatically to a group of persons lacking ARIS user client licenses, i.e., ARIS Connect Viewer, ARIS Connect Designer, ARIS Architect, ARIS Designer, ARIS Viewer, ARIS API Read Access, or ARIS API Full Access.

ARIS API System Access

This license entitles the Licensee to run a third-party application that provides a group of the Licensee's employees the possibility to read and write ARIS content from and into the ARIS Server via the ARIS API. This group of users is not required to possess an ARIS user client licenses.

General policies

Registration

Any organization using the ARIS API for application development must register with Software AG. Your application concept will be evaluated thoroughly against license restrictions and general policies. Software AG reserves the right to reject a development project without reasons. Positively evaluated application concepts receive a certificate that unlocks the API on the ARIS Server. It is valid for one year and for this specific application only. It may not be transferred to any other organization.

Functional restrictions

Do not use the ARIS API in any manner to compete with Software AG or to build products or services that compete with ARIS software products or capabilities without our permission.

If you develop an application that retrieves ARIS content from an ARIS server in order to distribute this content programmatically among a group of persons lacking ARIS user client licenses, you must purchase the ARIS API System Access license.
