

ARIS

# E-MAIL TEMPLATE CONFIGURATION

VERSION 10.0 - SERVICE RELEASE 18  
MAY 2022

This document applies to ARIS Version 10.0 and to all subsequent releases.

Specifications contained herein are subject to change and these changes will be reported in subsequent release notes or new editions.

Copyright © 2010 - 2022 Software AG, Darmstadt, Germany and/or Software AG USA Inc., Reston, VA, USA, and/or its subsidiaries and/or its affiliates and/or their licensors.

The name Software AG and all Software AG product names are either trademarks or registered trademarks of Software AG and/or Software AG USA Inc. and/or its subsidiaries and/or its affiliates and/or their licensors. Other company and product names mentioned herein may be trademarks of their respective owners.

Detailed information on trademarks and patents owned by Software AG and/or its subsidiaries is located at <https://softwareag.com/licenses>.

Use of this software is subject to adherence to Software AG's licensing conditions and terms. These terms are part of the product documentation, located at <https://softwareag.com/licenses> and/or in the root installation directory of the licensed product(s).

This software may include portions of third-party products. For third-party copyright notices, license terms, additional rights or restrictions, please refer to "License Texts, Copyright Notices and Disclaimers of Third Party Products". For certain specific third-party license restrictions, please refer to section E of the Legal Notices available under "License Terms and Conditions for Use of Software AG Products / Copyright and Trademark Notices of Software AG Products". These documents are part of the product documentation, located at <https://softwareag.com/licenses> and/or in the root installation directory of the licensed product(s).

Contents.....	1
1 Create user-defined HTML template for notifications.....	1
2 What variables can be used? .....	4
3 Legal information.....	5
3.1 Documentation scope.....	5
3.2 Support .....	6

## 1 Create user-defined HTML template for notifications

You can customize HTML templates for notifications that are automatically sent when a user is created, activated or deactivated. You carry out this part of the configuration in ARIS Administration.

Variables may be used to personalize the content of a notification of ARIS Administration. Variables can be used in both notification subject and body.

### Prerequisite

You should have a good knowledge in HTML and in creating HTML templates.

### Procedure

1. Use a text editor to create the HTML template for HTML formatted e-mails.
2. Use the following example as basis.
3. Adapt the text.
4. The load balancer URL is read from the **Load balancer URL** property of ARIS Administration. You find the URL in ARIS.
  - a. Start ARIS.
  - b. Click **Application launcher** > **Administration**.
  - c. Click **Configuration**.
  - d. Click **User managemen**.
  - e. If not selected yet, click **Infrastructure**. The load balancer URL ist displayed.
5. Adapt the look and feel, for example, the border size of the HTML e-mail.

You have created a customized HTML template for e-mails.

**Example**

```
<!DOCTYPE html PUBLIC "-//W3C//DTD XHTML 1.0 Strict//EN"
"http://www.w3.org/TR/xhtml1/DTD/xhtml1-strict.dtd">
<html xmlns="http://www.w3.org/1999/xhtml">
  <head/>
  <body>
    Dear <#if user.givenName?has_content>${user.givenName}
    ${user.lastName}<#else>user</#if>,
    <p>
      your account has been activated. Please use the following credentials to login:</p>
    <table border="0" cellpadding="1" cellspacing="1" style="width: 250px;">
      <tbody>
        <tr>
          <td>
            Server name</td>
          <td><a href="${property["com.aris.umc.loadbalancer.url"]}/umc"
target="_blank"></a></td>
        </tr>
        <tr>
          <td>
            Tenant:name</td>
          <td>
            <b>${tenant.name}</b></td>
        </tr>
        <tr>
          <td>
            User name:</td>
          <td>
            <b>${user.login}</b></td>
        </tr>
        <tr>
          <td>
```

```
        Password:</td>
    <td>
        <b>${user.password}</b></td>
        <td>
            <tr>
                Please set the new password within</td>
            </tr>
            <tr>
                <td>
                    ${property["com.aris.umc.password.reset.confirmation.ttl"]}
minutes (only once):</td>
            </tr>
            <tr>
                <td>
                    SetPassword</td>
            </tr>
            <td>
            <tr>
                Ignore this e-mail if you have not submitted any request.</td>
            </tr>
        </tbody>
    </table>
    <p>
        Best regards,
    <br/>
        Administration</p>
    <p>
        <em>*** This notification was sent automatically by Administration. Please do not reply
to this e-mail.***</em></p>
    </body>
</html>
```

## 2 What variables can be used?

Variables may be used to personalize the content of a notification of ARIS Administration. Variables can be used in both notification subject and body. The following variables are supported:

- `${tenant.name}` - Name of the tenant the user belongs to
- `${user.login}` - Login of a user receiving notifications
- `${user.givenName}` - First name of a user receiving notifications
- `${user.lastName}` - Last name of a user receiving notifications
- `${user.password}` - (New) password of a user receiving notifications
- `${user.otpSecret}`- Token secret of a user receiving notifications

The following variables are supported for license-related events:

- `${license.serial}` - Serial number of a license
- `${license.productName}` - Name of a licensed product
- `${license.expiry}` - Expiration date of a licensed product in the format YYYY-MM-DD

## 3 Legal information

### 3.1 Documentation scope

The information provided describes the settings and features as they were at the time of publishing. Since documentation and software are subject to different production cycles, the description of settings and features may differ from actual settings and features. Information about discrepancies is provided in the Release Notes that accompany the product. Please read the Release Notes and take the information into account when installing, setting up, and using the product.

If you want to install technical and/or business system functions without using the consulting services provided by Software AG, you require extensive knowledge of the system to be installed, its intended purpose, the target systems, and their various dependencies. Due to the number of platforms and interdependent hardware and software configurations, we can describe only specific installations. It is not possible to document all settings and dependencies.

When you combine various technologies, please observe the manufacturers' instructions, particularly announcements concerning releases on their Internet pages. We cannot guarantee proper functioning and installation of approved third-party systems and do not support them. Always follow the instructions provided in the installation manuals of the relevant manufacturers. If you experience difficulties, please contact the relevant manufacturer.

If you need help installing third-party systems, contact your local Software AG sales organization. Please note that this type of manufacturer-specific or customer-specific customization is not covered by the standard Software AG software maintenance agreement and can be performed only on special request and agreement.

## 3.2 Support

If you have any questions on specific installations that you cannot perform yourself, contact your local Software AG sales organization

(<https://www.softwareag.com/corporate/company/global/offices/default.html>). To get detailed information and support, use our websites.

If you have a valid support contract, you can contact **Global Support ARIS** at: **+800 ARISHELP**. If this number is not supported by your telephone provider, please refer to our Global Support Contact Directory.

### ARIS COMMUNITY

Find information, expert articles, issue resolution, videos, and communication with other ARIS users. If you do not yet have an account, register at ARIS Community.

### PRODUCT DOCUMENTATION

You can find the product documentation on our documentation website.

In addition, you can also access the cloud product documentation. Navigate to the desired product and then, depending on your solution, go to **Developer Center**, **User Center** or **Documentation**.

### PRODUCT TRAINING

You can find helpful product training material on our Learning Portal.

### TECH COMMUNITY

You can collaborate with Software AG experts on our Tech Community website. From here you can, for example:

- Browse through our vast knowledge base.
- Ask questions and find answers in our discussion forums.
- Get the latest Software AG news and announcements.
- Explore our communities.
- Go to our public GitHub and Docker repositories and discover additional Software AG resources.

## PRODUCT SUPPORT

Support for Software AG products is provided to licensed customers via our Empower Portal (<https://empower.softwareag.com/>). Many services on this portal require that you have an account. If you do not yet have one, you can request it. Once you have an account, you can, for example:

- Download products, updates and fixes.
- Add product feature requests.
- Search the Knowledge Center for technical information and tips.
- Subscribe to early warnings and critical alerts.
- Open and update support incidents.
