The ARIS Transformation Suite

Software AG's ARIS is a comprehensive transformation suite that helps customers to gain insights into process performance, develop plans for future improvements, implement actions, and prove results in the context of transformation, operational excellence, and regulatory compliance. ARIS helps to make processes transparent, controlled, manageable, and agile. Business and IT get the capabilities and tools they need to collaborate for true end-to-end business and IT improvement, guided by process governance. ARIS also enables enterprises to confidently meet internal and external legal requirements and standards while efficiently managing risks.

ARIS Business Process Analysis

ARIS Business Process Analysis goes far beyond simple process analysis. It includes tools and capabilities to design & document process information, to monitor & analyze processes and their performance, and to communicate and optimize processes throughout the enterprise. It all supports the companies' main goal of achieving business process excellence for business and IT. More efficient processes help our customers to adapt to changing business and market requirements more quickly.

ARIS Basic

ARIS Basic is an entry-level BPA solution for intuitive & focused business modeling, communication, and improved efficiency.

ARIS Process Mining

ARIS Process Mining discovers the actual behavior of business processes, monitors and analyzes their performance as well as helps to identify bottlenecks and root-causes in order to implement fact-based optimizations. In combination with corresponding process models, the compliance and adoption rate can be automatically calculated based on process conformance checking. ARIS Process Mining is available in three editions: ARIS Process Mining Elements, ARIS Process Mining Advanced, and ARIS Process Mining Enterprise.

ARIS Process Mining Basic

ARIS Process Mining Basic introduces you to the world of Process Mining to perform quick health checks of your processes with data snapshots. Work with an easy-to-use and intuitive interface to discover the hidden root causes that lead to inefficiency and delays in your business process

landscape. Stop relying on your gut feeling and use data-driven insights to achieve process excellence. Be prepared to check your process compliance based on documented process models in ARIS.

Client

	ARIS Process Mining Basic Analyst (YPMU)
Data source connectors	
CSV-based snapshot projects	x
Data transformation and preparation	
Manage access restrictions on data set level	x
Calculate new calculated fields using the Code or Visual editor	x
Translate analysis model fields	x
View status of the process mining pipeline	x
Manage and preview source tables	x
Create data model using source tables	x
View run log of previously executed and currently running tasks	x
Delete process storage or specific cases	x
Export and import solution files incl. all assets (w/o data)	x
Upload CSV files as source tables	x
Process compliance checking	
Process conformance checking incl. process fitness value calculation and impact analysis	x ¹
Map tasks of BPMN model with discovered activities	x
Automatic mapping of BPMN tasks and discovered activities	x
Define compliance rules	x ²
Compliance rule checking and impact analysis	x ²
Process discovery and variant analysis	
Automated process discovery	x
Automated process variant discovery	x
Build analysis with out-of-the box apps like Process Overview, Process Explorer and Process Compliance app	x
Build own apps using the App builder with various chart types & components	x
Flexibly define field, activity, process flow and code filters	x
Save personal favorites incl. Bookmarks & saved filters	x

View analyses	x
Root Cause Miner to discover root causes for ad-hoc specified process symptoms	x
Process enhancement	
Transfer discovered processes into the ARIS Repository	x¹
Service overview and administration

Support for Identity Management Service (SCIM) in ARIS Process Mining	x
Transfer existing users from ARIS BPA to ARIS Process Mining	x¹
Integrate ARIS Process Mining with ARIS BPA	x¹
Gallery with pre-defined accelerators	x³

¹ Requirement: ARIS BPA license.

² Limitation: max. 3 rules in total.

³ Limitation: Can be browsed only; ARIS Process Mining Advanced or Enterprise edition required to install accelerators.

ARIS Process Mining Advanced

ARIS Process Mining Advanced takes your process mining maturity to the next level. With its room to grow, it enables you to import a comprehensive collection of process data and provide process mining analyses to a wide range of business experts in your organization. Based on living system connections, you are ready to perform continuous process diagnostics to monitor your processes end-to-end.

ARIS Process Mining Enterprise

ARIS Process Mining Enterprise provides all the functionality needed to implement enterprise-wide process mining initiatives and embed continuous process mining into your organization's DNA. Comprehensive system configurations and multiple integration options with source systems (such as SAP®) allow even the most complex organizations to capture their entire process landscape and track process compliance and user adoption to process changes. Even sophisticated simulations to tackle all kinds of bottlenecks within your process organization and to control your entire process life cycle are guaranteed in one integrated platform.

⁴ Requirement: YPMEA or YPMEE license.

⁵ Requirement: YPMEA or YPMEE + ARIS Enterprise Ext. Risk and Compliance (YSPRC).

⁶ Requirement: YPMEA or YPMEF + ARIS Enterprise Ext. Enterprise Server (YSPES).

Extensions

	ARIS Process Mining Enterprise Ded. Infr. (YPMED)	ARIS Process Mining Enterprise Combined Deployment (YPMEDC)	ARIS Process Mining Enterprise Shared Deployment (YPMES)
Process enhancement			
Augment BPMN models in ARIS with process mining measures		x¹	
Augment BPMN models in ARIS with discovered activities and connections		x¹	
Integrate ARIS Process Mining analyses into the ARIS portal		x¹	

¹ Requirement: ARIS Cloud Enterprise license.

ARIS Risk & Compliance

Risk & Compliance Management enables a flexible implementation and efficient operation of an enterprise-wide compliance and risk management system. It supports enterprises to meet internal and external legal and regulatory requirements and standards while efficiently managing risks. It includes identifying risk-affected processes, risk assessment, implementing an internal control system, and monitoring control effectiveness.

ARIS Extensions - Risk & Compliance

The extension for Risk & Compliance extends ARIS with the capabilities needed to run an effective Risk & Compliance management within a company or organization.

Extensions

	ARIS Enterpr. - Ext: Risk and Compliance (YSPRC)
Capturing of risk and compliance assets	
Administration of R&C related items	x¹
Audit management	x¹
Control execution	x¹
Control testing	x¹
Deficiency management	x¹
Incident and loss management	x¹
Incident documentation	x¹
Issue management	x¹
Policy management	x¹
Regulatory management	x¹
Risk assessment	x¹
Sign-off management	x¹
Survey management	x¹
Assessment workflows	
Automated start/close of scheduled workflows	x¹
Notification/remaindering/escalation (Email)	x¹
Reporting and analytics for risk and compliance	
Preconfigured evaluations	x¹

¹ Requirement: ARIS BPA environment with at least minimum configuration.

ARIS Automation & Connectivity

ARIS Automation & Connectivity provides a set of tools, that help to automate business processes and connect to various IT system. This includes RPA as a general technological approach but also process driven SAP and IoT management as well as synchronizations user and document management systems.

ARIS Enterprise - Extensions

These extensions provide additional added-value functionality to an ARIS Business Process Analysis environment (Enterprise edition).

Client

	ARIS Enterpr. - Ext: for SAP Solution (YSPAS)	ARIS Enterpr. - Ext: Rollout add-ons (YSPRA)	ARIS Enterpr. - Ext: Simulation (YSPSI)
Process-driven SAP Application Lifecycle Management (ALM) integration			
Automatic generation of test documents	x ¹		
Branch synchronization	x ¹		
Capturing of end-to-end test scenarios	x ¹		
Central administration to manage SAP connectivity	x ¹		
Configurable synchronization method	x ¹		
Consistency check for SAP conformance	x ¹		
Creation of test projects	x ¹		
Execute SAP customizing activities	x ¹		
Import of BPMN diagrams	x ¹		
Maintain different languages for SAP Business Process Repositories (BPR)	x ¹		
Modelling support	x ¹		
Navigation to ARIS process diagrams from SAP Solution Manager	x ¹		
Navigation to ARIS process model from SAP systems ("F1" help)	x ¹		
Navigation to business blueprints	x ¹		
Navigation to documents	x ¹		
Navigation to solution documentation	x ¹		
Open SAP Solution Manager documents	x ¹		
Open transaction-specific R/3 help	x ¹		
Process Step Library generation	x ¹		
Start executables from published models	x ¹		
Supporting roll-out process	x ¹		
Synchronization of content	x ¹		
Synchronization of global attributes	x ¹		
Synchronization of keywords	x ¹		
Synchronization of master and non-master process diagrams	x ¹		
Synchronization of process steps sequence	x ¹		

Synchronization of technical names at documents	x ¹		
Synchronization with SAP Solution Manager	x ¹		
Test path capturing	x ¹		
Transfer links to trainings assets from SAP Enable Now to ARIS	x ¹		
Transfer process structures from ARIS to SAP EnableNow	x ¹		
Scenario Planning and simulation			
Support for ARIS process model types (e.g. EPC)			x ²
Support for BPMN process model types (incl. Enterprise BPMN)			x ²
Charts			x ²
Experiments			x ²
Shift calendars			x ²
Statistics			x ²
Process animation			x ²
Warm-up phase			x ²
Process instantiation plans			x ²
Confirmation Management			
Access archived notifications to see past changes		x ³	
Create issues if you do not give consent to the change rolled out		x ³	
Get notifications about the latest approved changes		x ³	
Legally binding sign off and acknowledgement of change		x ³	
Set up and manage confirmation schedules for audit proof management & efficient operations		x ³	

¹ Requirement: YSPSE/YSPEs license and YSPDE/YSPEs.

² Requirement: YSPSE/YSPEs license and YSPAB.

³ Requirement: YSPSE/YSPEs license and a valid user license.

Server

	ARIS Enterpr. - Ext: 3rd Party Integr. (YSPIN)	ARIS Enterpr. - Ext: Prem. Doc. Storage (YSPDS)	ARIS Enterpr. - Ext: SharePoint Integr. (YSPSP)
--	---	--	--

3rd party API interface			
Comprehensive API for ARIS Application Management OAUTH	x ¹		
Comprehensive API for ARIS Asset Management	x ¹		
Comprehensive API for ARIS Collaboration	x ¹		
Comprehensive API for ARIS Document Storage	x ¹		
Comprehensive API for ARIS Process Management	x ¹		
Comprehensive API for ARIS Repository	x ¹		
Comprehensive API for ARIS Risk & Compliance Manager	x ¹		
Comprehensive API for ARIS User Management	x ¹		
Comprehensive API for ARIS User Management SCIM	x ¹		
SharePoint integration			
Link & publish document(s) stored in SharePoint			x ²
Upload document(s) to SharePoint			x ²
Documents repository			
Store large amounts of documents			x ³

¹ Requirement: YSPSE/YSPEs license.

² Requirement: YSPSE/YSPEs license and YSPDE/YSPEs.

³ Requirements: YSPES or YSPSE and an appropriate client license that can manage documents.

Product: ARIS Robotic Process Automation (RPA)

Business Automation & Connectivity provides a set of tools, that help to automate business processes and connect to various IT system. This includes RPA as a general technological approach but also process driven SAP and IoT management as well as synchronizations user and document management systems.

Client

	Unattended robot (RPAUR)	Attended robot (RPAAR)
Robotic Process Automation		
Implement unattended robots	x ¹	
Implement attended robots		x ¹
Navigate users through processes using attended robots		x ¹

¹ Requirement: RPASE and RPASt.

Server

	RPA Server (RPASE)
Robotic Process Automation	
Manage users, roles and permissions for RPA users	x
Real-time monitoring of robots	x

Extensions

	RPA Studio (RPAST)	Smart Scan (RPASA)	Smart Scan Plus (RPASP)
Robotic Process Automation			
Assign automation workflows to robots	x ¹		
Create and reuse automation components	x ¹		
Advanced commands library	x ¹		
Use OCR to digitalize documents		x ¹	
Use OCR to digitalize documents in additional languages			x ¹

¹ Requirement: RPASE.

ARIS Task Mining/Robotic Process Discovery (RPD)

Business Automation & Connectivity provides a set of tools, that help to automate business processes and connect to various IT system. This includes RPA as a general technological approach but also process driven SAP and IoT management as well as synchronizations user and document management systems.

Extensions

	Discovery Robot (RPDRA)	Discovery Server (RPDSE)
Robotic Process Automation		
Record user interactions	x ¹	
Set up teams and assign users to teams		x
Analyze applications used		x
View recorded sessions		x
Define application inclusion or exclusion lists		x
Export discovered processes as CSV		x
Manage access rights on team level		x
Analyze variants in discovered processes		x
Snip processes from recordings		x

Generate BPMNs and SOPs out of discovered processes		x
Masking of recordings		x

¹ Requirement: RPDSE.

ARIS Low-code/No-code

This product provides low-code/no-code digitalization capabilities.

ARIS Accelerators

ARIS Accelerators are predefined ARIS databases which include best practices, blueprints, frameworks and other content to help companies accelerate their projects. They are composed by different topics, use cases and sources. Depending on the author and content owner, these ARIS Content Packages are for free or can be purchased.

ISO 9001

The ARIS Content Package ISO 9001 is a predefined process library based and aligned to the ISO 9001 standard. Organizations can use this best practice definition to build a Quality Management System documentation. The content provides business processes, procedures and documentations as well as related documents and templates to accelerate a company-wide QMS. Customers need for the installation and utilization this ARIS Content Package an ARIS Advanced or an ARIS Enterprise edition. The content and the IP is owned by a business consulting partner who is an expert in this domain. This is a commercial product.

Extensions

	ACP - ISO 9001 - English (YCPQM)	ACP - ISO 9001 - German (YCPQN)	ACP - ISO 9001 - Bilingual (EN & DE) (YCPQO)
Solutions & Content			
Jump start and accelerate your Quality Management System initiative with best practices and standards of ISO 9001:2015	x	x	x

ITSM for ITIL 4 and ISO 20000

The ARIS Content Package ITSM (for ITIL 4 and ISO 20000) projects provides predefined best practice process that can be used to accelerate the establishment of such an internal as well external oriented IT service organization with the aligned process, procedures, and governance. This ARIS database comes with predefined ARIS models as well as predefined documents and templates. Customers need for the installation and utilization this ARIS Content Package an ARIS Advanced or an ARIS Enterprise edition. The content and the IP are owned by a business consulting partner who is an expert in this domain. This is a commercial product.

Extensions

	ACP - ITSM - English (YCPIE)	ACP - ITSM - German (YCPID)	ACP - ITSM - Bilingual (EN & DE) (YCPIB)
Solutions & Content			
Jump start and accelerate your IT Service Management initiative with best practices and global standards	x	x	x

eTOM

This ARIS Content Package provides the Business Process Framework eTOM by TM Forum. TM Forum, the global industry association for CSPs and their suppliers, are collaboratively developing the Open Digital Framework

for CSPs to effectively transform into a digital service provider. As part of that, leading CSPs within TM Forum have defined the Business Process Framework, eTOM, as a critical component to enable successful business transformation. eTOM is a comprehensive, industry-agreed, multi-layered view of the key business processes required to run an efficient, effective, agile, and service-focused digital enterprise. Customers need for the installation and utilization of this ARIS Content Package an ARIS Advanced or an ARIS Enterprise edition. All TM Forum members are entitled to use this ARIS Content Package for free!

Extensions

	ACP - eTOM Framework
Solutions & Content	
Companies of the telecommunication service industry can perform a jump start and accelerate their process library building with best practices and global standards.	x

ARIS for Sustainability Accelerator

This package accelerates your sustainability journey. The ARIS for sustainability accelerator package anchors sustainability in the organization's operations by integrating it into business process management and provides a common language and single source of truth for all stakeholders. To see how you can more easily turn your ESG (environmental, social and governance) theory into action, download a preview of the ARIS for sustainability accelerator package. The package guides you through the process of integrating sustainability within your company's operations by providing ready-made process models, ESG-relevant templates, reports and dashboards to ARIS users. For each perspective, there are different roles and responsibilities available. They can be directly used in ARIS and connected with all company data already stored there — from strategy definition to operating processes. Please note that this ARIS Content Package requires ARIS Enterprise Service Release 18 (or newer). The usage of Extension: Risk and Compliance (ARIS Risk and Compliance Manager) is optional but allows the use of additional features (such as the questionnaire).

This ARIS packages is for free available.

		note that this ARIS Content Package requires ARIS Enterprise Service Release 18 (or newer). The usage of Extension: Risk and Compliance (ARIS Risk and Compliance Manager) is optional but allows the use of additional features (such as the questionnaire). This ARIS packages is for free available.	
RPAAR	Attended robot	Implement and run attended robots.	ARIS Automation & Connectivity
RPASA	Smart Scan	Enables the build-in OCR capability.	ARIS Automation & Connectivity
RPASE	RPA Server	Store, monitor and control robots.	ARIS Automation & Connectivity
RPASP	Smart Scan Plus	Includes Smart Scan and adds language set (Hebrew, Arabic, Chinese, Japanese, Korean).	ARIS Automation & Connectivity
RPAST	RPA Studio	Development tool to build robots.	ARIS Automation & Connectivity
RPAUR	Unattended robot	Implement and run unattended robots.	ARIS Automation & Connectivity
RPDRA	Discovery Robot	Client to record the computer interactions.	ARIS Automation & Connectivity
RPDSE	Discovery Server	Store, monitor, edit and control task mining recordings.	ARIS Automation & Connectivity
YCPIB	ACP - ITSM - Bilingual (EN & DE)	This is an ARIS Content Package prepared for an IT Service Management initiatives which needs to be aligned to the ITIL v4 and ISO 20000 frameworks. This best-practice database comes with a huge set of predefined ARIS models as well as MS® Word templates described and maintained in English and German. The product code for this ARIS database is: YCPIB	ARIS Accelerators
YCPID	ACP - ITSM - German	This is an ARIS Content Package prepared for an IT Service Management initiative which needs to be aligned to the ITIL v4 and ISO 20000 frameworks. This best-practice database comes with a huge set of predefined ARIS models as well as MS® Word templates described and maintained only in German. The product code for this ARIS database is: YCPID	ARIS Accelerators

YCPIE	ACP - ITSM - English	This is an ARIS Content Package prepared for an IT Service Management initiative which needs to be aligned to the ITIL v4 and ISO 20000 frameworks. This best-practice database comes with a huge set of predefined ARIS models as well as MS® Word templates described and maintained in English. The product code for this ARIS database is: YCPIE.	ARIS Accelerators
YCPQM	ACP - ISO 9001 - English	This is an ARIS Content Package prepared for an ISO 9001 initiative. This QMS best-practice database comes with a huge set of predefined ARIS models as well as MS® Word templates described and maintained in English. The product code for this ARIS database is: YCPQM.	ARIS Accelerators
YCPQN	ACP - ISO 9001 - German	This is an ARIS Content Package prepared for an ISO 9001 initiative. This QMS best-practice database comes with a huge set of predefined ARIS models as well as MS® Word templates described and maintained only in German. The product code for this ARIS database is: YCPQN.	ARIS Accelerators
YCPQO	ACP - ISO 9001 - Bilingual (EN & DE)	This is an ARIS Content Package prepared for an ISO 9001 initiative. This QMS best-practice database comes with a huge set of predefined ARIS models as well as MS® Word templates described and maintained in English and German. The product code for this ARIS database is: YCPQO.	ARIS Accelerators
YPLBX	ARIS Advanced Base Extension	A SaaS subscription for ARIS Advanced requires a Base license to be deployed within one of the shared cloud servers (in one of the available regions). The Base Extension enables an increased user limit as well as single sign-on capability.	ARIS Business Process Analysis
YPLBZ	ARIS Advanced Base	A SaaS subscription for ARIS Advanced requires a Base license to be deployed within one of the shared cloud servers (in one of the available regions).	ARIS Business Process Analysis
YPMA1	ARIS Process Mining Advanced Liv. Process S	A living process means that the process mining system has (a) direct connection(s) to underlying source	ARIS Process Mining

		<p>system(s) to continuously extract and analyze data to provide an up-to-date view of the analyzed process. For a living process, it does not matter if the analyzed process is divided among different technical systems, but the process domain is considered.</p> <p>Example: The process "Order to cash" can run on 5 different application systems (types) but counts as 1. If the process "Purchase to pay" should be analyzed as well, this counts as another living process, since the subject of process mining is the purchase order and not the sales order.</p>	
YPMAA	ARIS Process Mining Advanced Analyst	This product represents the user type Analyst in ARIS Process Mining Advanced. An analyst can create and adapt process mining projects and the analyses contained in them. In addition, source tables can be combined in data models, which can also be extended with calculated case and activity columns. Furthermore, CSV-based data sets can be uploaded and loaded to perform process mining snapshot projects. An analyst has all functional rights of a viewer user included.	ARIS Process Mining
YPMAB	ARIS Process Mining Advanced Base	This product represents the tenant extension unlocking the Advanced edition for ARIS Process Mining customers. Storage Capacity: The Cloud Services allow the Customer to store up to 10 GB of data with up to 1 million process cases. One case represents a single temporal and logistical sequence of activities within a specific process.	ARIS Process Mining
YPMAE	ARIS Process Mining Advanced Engineer	This product represents the user type Engineer in ARIS Process Mining Advanced. An engineer manages data sets with direct system connections. This includes data extractions and transformations. An engineer has all functional rights of an analyst user included.	ARIS Process Mining
YPMVA	ARIS Process Mining Advanced Viewer	This product represents the user type Viewer in ARIS Process Mining Advanced. A viewer can flexibly analyze	ARIS Process Mining

		processes in existing process mining projects and its containing analyses.	
YPMEA	ARIS Process Mining Enterprise Analyst	This product represents the user type Analyst in ARIS Process Mining Enterprise. An analyst can create and adapt process mining projects and the analyses contained in them. In addition, source tables can be combined in data models, which can also be extended with calculated case and activity columns. Furthermore, CSV-based data sets can be uploaded and loaded to perform process mining snapshot projects. An analyst has all functional rights of a viewer user included.	ARIS Process Mining
YPMEB	ARIS Process Mining Enterprise Base	This product represents the tenant extension unlocking the Enterprise edition for ARIS Process Mining customers. It provides space for 2 million cases and 20 GB of data for process mining snapshot projects.	ARIS Process Mining
YPMEC	ARIS Process Mining Enterprise Combined Deployment	This product represents the combined deployment of ARIS Process Mining SaaS Enterprise into a customer's existing ARIS Cloud Enterprise environment.	ARIS Process Mining
YPMED	ARIS Process Mining Enterprise Ded. Infr.	This product represents the dedicated deployment of ARIS Process Mining SaaS Enterprise.	ARIS Process Mining
YPMEE	ARIS Process Mining Enterprise Engineer	This product represents the user type Engineer in ARIS Process Mining Enterprise. An engineer manages data sets with direct system connections. This includes data extractions and transformations. An engineer has all functional rights of an analyst user included.	ARIS Process Mining
YPMEF	ARIS Process Mining Enterprise Flexible Cases	Flexible Living Process Cases represent the total amount of cases that can be loaded into the process mining system and that may originate from (a) direct connection(s) to the underlying source system(s) to continuously extract or ingest data as well as analyze it to provide an up-to-date view of the analyzed process. Price is per 1000 cases.	ARIS Process Mining

YPMES	ARIS Process Mining Enterprise Shared Deployment	This product represents the shared deployment of ARIS Process Mining SaaS Enterprise.	ARIS Process Mining
YPMEV	ARIS Process Mining Enterprise Viewer	This product represents the user type Viewer in ARIS Process Mining Enterprise. A viewer can flexibly analyze processes in existing process mining projects and its containing analyses.	ARIS Process Mining
YPMMU	ARIS Process Mining Basic Analyst	This product represents the user type Analyst in ARIS Process Mining Basic. An analyst can create and adapt process mining projects and the analyses contained in them. In addition, source tables can be combined in data models, which can also be extended with calculated case and activity columns. Furthermore, CSV-based data sets can be uploaded and loaded to perform process mining snapshot projects. An analyst has all functional rights of a viewer user included.	ARIS Process Mining
YSPAB	ARIS Enterprise Admin	An Admin can do functional and technical administration (e.g. within a Centre of Excellence) as well as creates new content within any architectural domain and consumes content created by other Designers.	ARIS Business Process Analysis
YSPAD	ARIS Advanced Designer	A Designer creates new content within any architectural domain and consumes content created by other Designers.	ARIS Business Process Analysis
YSPAM	ARIS Advanced Admin	An Admin can do functional and technical administration (e.g. within a Centre of Excellence) as well as creates new content within any architectural domain and consumes content created by other Designers. An Admin license always includes all capabilities of an ARIS Advanced - Designer (YSPAD)	ARIS Business Process Analysis
YSPAS	ARIS Enterpr. - Ext: for SAP Solution	This extension offers capabilities to integrate with SAP products, e.g. SAP Solution Manager, SAP Enable NOW	ARIS Automation & Connectivity
YSPAV	ARIS Advanced Viewer	The Viewer finds & consumes content available in the ARIS Portal. Traditionally, everyone in the workforce that needs access to the ways of working is at least a Viewer. Ideally, every employee gets a Viewer license.	ARIS Business Process Analysis

YSPDE	ARIS Enterprise Designer	A Designer creates new content within any architectural domain and consumes content created by other Designers.	ARIS Business Process Analysis
YSPDS	ARIS Enterpr. - Ext: Prem. Doc. Storage	The license provides the right to the customer to store up to 1 mio documents into ARIS Document Storage	ARIS Automation & Connectivity
YSPED	ARIS Basic Designer	A Designer creates new content within any architectural domain and consumes content created by other Designers.	ARIS Business Process Analysis
YSPES	ARIS Enterprise - Enterprise Server	ARIS Enterprise – Enterprise Server is intended for those who need it all. Basic capabilities and full flexibility to configure, deploy and run customized governance workflows as well as GDPR accelerators.	ARIS Business Process Analysis
YSPEV	ARIS Basic Viewer	The Viewer finds & consumes content available in the ARIS Portal. Traditionally, everyone in the workforce that needs access to the ways of working is at least a Viewer. Ideally, every employee gets a Viewer license.	ARIS Business Process Analysis
YSPIN	ARIS Enterpr. - Ext: 3rd Party Integr.	This extension allows to run fully automated (read/write) access to ARIS API from any third-party application. This license is required to allow for programmatic retrieval and distribution of ARIS data via ARIS API.	ARIS Automation & Connectivity
YSPRA	ARIS Enterpr. - Ext: Rollout add-ons	This extension offers confirmation workflows and what's new functionality to users.	ARIS Automation & Connectivity
YSPRC	ARIS Enterpr. - Ext: Risk and Compliance	The extension for Risk & Compliance extends ARIS with the capabilities needed to run an effective Risk & Compliance management within a company or organization.	ARIS Risk & Compliance
YSPSE	ARIS Enterprise - Server	ARIS Enterprise – Server is intended for those customers who need all basic capabilities but do not wish to configure, deploy and run their own governance workflows and don't need accelerators for GDPR solution development.	ARIS Business Process Analysis
YSPSI	ARIS Enterpr. - Ext: Simulation	This extension offers simulation capabilities that enable the identification of process bottlenecks and support decision-making for process improvement based on simulation results. Also, it allows to run	ARIS Automation & Connectivity

		simulation experiments, showing dynamic factor variations and their possible effects on your business process	
YSPSP	ARIS Enterpr. - Ext: SharePoint Integr.	This Extension Pack adds integration to Microsoft SharePoint for the ARIS Document Storage on an ARIS Connect Server. Documents stored in Microsoft SharePoint can be easily accessed from within an ARIS environment.	ARIS Automation & Connectivity
YSPVM	ARIS Enterprise Viewer Pro	A Viewer Pro consumes and contributes to content available in the ARIS Portal, including views of dashboards. Everyone in management that needs statistics on the ways of working or that is involved in defining, reviewing or approving the ways of working should have this license. He/she can also maintain data.	ARIS Business Process Analysis
YSPVP	ARIS Enterprise Viewer	The Viewer finds & consumes content available in the ARIS Portal. Traditionally, everyone in the workforce that needs access to the ways of working is at least a Viewer. Ideally, every employee gets a Viewer license.	ARIS Business Process Analysis
