

# ARIS Method REFERENCE

Version 10.0 - Service Release 4

April 2018

This document applies to ARIS Version 10.0 and to all subsequent releases.

Specifications contained herein are subject to change and these changes will be reported in subsequent release notes or new editions.

The name Software AG and all Software AG product names are either trademarks or registered trademarks of Software AG and/or Software AG USA Inc. and/or its subsidiaries and/or its affiliates and/or their licensors. Other company and product names mentioned herein may be trademarks of their respective owners.

Detailed information on trademarks and patents owned by Software AG and/or its subsidiaries is located at <http://softwareag.com/licenses> (<http://softwareag.com/licenses>).

Use of this software is subject to adherence to Software AG's licensing conditions and terms. These terms are part of the product documentation, located at <http://softwareag.com/licenses> (<http://softwareag.com/licenses>) and/or in the root installation directory of the licensed product(s).

This software may include portions of third-party products. For third-party copyright notices, license terms, additional rights or restrictions, please refer to "License Texts, Copyright Notices and Disclaimers of Third Party Products". For certain specific third-party license restrictions, please refer to section E of the Legal Notices available under "License Terms and Conditions for Use of Software AG Products / Copyright and Trademark Notices of Software AG Products". These documents are part of the product documentation, located at <http://softwareag.com/licenses> (<http://softwareag.com/licenses>) and/or in the root installation directory of the licensed product(s).

## Contents

1	Classification of models .....	1
1.1	Layout classes.....	1
1.2	Assignment of models to layout classes .....	3
2	Implicit relationships in Swimlane models .....	7
2.1	Implicit relationships - EPC (column/row display) .....	7
2.2	Implicit relationships of the Input/Output diagram.....	10
2.3	Implicit relationships of the UML Activity diagram .....	11
2.4	Implicit relationships of the PCD .....	11
2.5	Implicit relationships of the PCD (material flow) .....	11
3	Method tables .....	12
3.1	Model types - Specific object types.....	12
3.1.1	Access diagram .....	12
3.1.2	Access diagram (physical).....	14
3.1.3	Application collaboration diagram .....	16
3.1.4	Application collaboration diagram (physical) .....	18
3.1.5	Application system diagram.....	20
3.1.6	Application system type diagram.....	21
3.1.7	Application system type diagram (column display).....	22
3.1.8	ArchiMate model (2.1) .....	23
3.1.9	ArchiMate model (3.0) .....	25
3.1.10	Attribute allocation diagram .....	26
3.1.11	Attribute allocation diagram (Solution Design) .....	27
3.1.12	Authorization hierarchy.....	27
3.1.13	Authorization map.....	27
3.1.14	Bow tie diagram .....	27
3.1.15	BPMN allocation diagram (BPMN 1.x) .....	28
3.1.16	BPMN allocation diagram (BPMN 2.0).....	28
3.1.17	BPMN collaboration diagram (BPMN 2.0) .....	29
3.1.18	BPMN conversation diagram (BPMN 2.0) .....	29
3.1.19	BPMN process diagram (BPMN 1.x).....	29
3.1.20	BPMN process diagram (BPMN 2.0).....	31
3.1.21	BSC Cause-and-effect diagram .....	31
3.1.22	Business controls diagram.....	31
3.1.23	Business footprint diagram .....	32
3.1.24	Business Model Canvas.....	33
3.1.25	Business rule allocation diagram .....	34
3.1.26	Business rule architecture diagram .....	34
3.1.27	Business segment matrix .....	34
3.1.28	c3 method .....	35
3.1.29	CD Diagram .....	35
3.1.30	Class diagram .....	36
3.1.31	Classification diagram.....	36
3.1.32	Communications diagram.....	36
3.1.33	Competition model.....	37
3.1.34	Composite schedule .....	37
3.1.35	Cost category diagram.....	37
3.1.36	CtX-tree .....	37
3.1.37	Customer journey landscape .....	37
3.1.38	Customer journey map .....	38
3.1.39	Customer segmentation map.....	39
3.1.40	Customer touchpoint allocation diagram.....	39
3.1.41	Customer touchpoint map .....	40

3.1.42	Data flow diagram.....	41
3.1.43	Data type diagram (Solution Design) .....	41
3.1.44	Data Warehouse model.....	42
3.1.45	DMN boxed function .....	42
3.1.46	DMN context diagram .....	42
3.1.47	DMN decision requirements diagram .....	43
3.1.48	DMN decision table model .....	43
3.1.49	DMN invocation model .....	44
3.1.50	Document structure (Solution Design) .....	44
3.1.51	DTD.....	44
3.1.52	DW structure.....	45
3.1.53	DW transformation.....	45
3.1.54	E-Business scenario diagram .....	45
3.1.55	eERM .....	46
3.1.56	eERM attribute allocation diagram .....	47
3.1.57	Enterprise BPMN collaboration diagram .....	47
3.1.58	Enterprise BPMN process diagram .....	48
3.1.59	EPC .....	49
3.1.60	EPC (column display).....	51
3.1.61	EPC (horizontal table display) .....	53
3.1.62	EPC (instance).....	55
3.1.63	EPC (material flow) .....	57
3.1.64	EPC (row display) .....	59
3.1.65	EPC (table display).....	61
3.1.66	Event diagram .....	64
3.1.67	Event diagram (instance) .....	65
3.1.68	Fishbone diagram .....	65
3.1.69	Function allocation diagram .....	66
3.1.70	Function mapping .....	68
3.1.71	Function tree.....	68
3.1.72	Function/Organizational level diagram .....	69
3.1.73	Functions mapping (SAP Solution Manager) .....	69
3.1.74	IE Data model .....	69
3.1.75	Industrial process .....	70
3.1.76	Information carrier diagram .....	71
3.1.77	Information flow diagram.....	71
3.1.78	Input/Output diagram .....	72
3.1.79	Input/Output diagram (inverse) .....	73
3.1.80	IoT object context.....	73
3.1.81	IoT object definition .....	74
3.1.82	IT architecture mapping.....	74
3.1.83	IT architecture matrix.....	74
3.1.84	Knowledge map.....	75
3.1.85	Knowledge structure diagram .....	76
3.1.86	KPI allocation diagram.....	77
3.1.87	KPI tree.....	78
3.1.88	Mapping model .....	78
3.1.89	Material diagram.....	78
3.1.90	Material flow diagram .....	78
3.1.91	Matrix model.....	79
3.1.92	Network diagram .....	89
3.1.93	Network topology.....	90
3.1.94	Objective diagram.....	91
3.1.95	Office process.....	91
3.1.96	OMT Class description model .....	92
3.1.97	OMT Data value decomposition .....	92
3.1.98	OMT Dynamic model .....	92

3.1.99	OMT Functional model .....	93
3.1.100	OMT Object model .....	93
3.1.101	Organizational chart .....	93
3.1.102	PCD .....	94
3.1.103	PCD (material flow) .....	96
3.1.104	PPC.....	98
3.1.105	Privileges diagram .....	99
3.1.106	Process instantiation model .....	99
3.1.107	Process schedule .....	100
3.1.108	Process selection diagram .....	102
3.1.109	Process selection matrix.....	102
3.1.110	Process support map .....	102
3.1.111	Product allocation diagram .....	103
3.1.112	Product selection matrix .....	104
3.1.113	Product tree .....	104
3.1.114	Product/Service exchange diagram.....	105
3.1.115	Product/Service exchange diagram (graphic) .....	106
3.1.116	Product/Service tree.....	106
3.1.117	Product/Service tree (graphic) .....	107
3.1.118	Program flow chart (PF) .....	107
3.1.119	Project schedule .....	108
3.1.120	Questionnaire template allocations .....	109
3.1.121	Quick model.....	109
3.1.122	RAD .....	109
3.1.123	RAMS .....	110
3.1.124	Relations diagram .....	110
3.1.125	Requirement allocation diagram .....	111
3.1.126	Requirements tree .....	112
3.1.127	Risk diagram.....	112
3.1.128	Role diagram.....	113
3.1.129	Rule diagram.....	113
3.1.130	SAP ALE filter model.....	113
3.1.131	SAP ALE function model .....	113
3.1.132	SAP ALE message flow model .....	114
3.1.133	SAP ALE message type model .....	114
3.1.134	SAP applications diagram .....	114
3.1.135	SAP functions mapping (SAP Solution Manager) .....	114
3.1.136	SAP integration process (XI).....	114
3.1.137	SAP NetWeaver Business Warehouse data flow model .....	115
3.1.138	SAP NetWeaver Business Warehouse mapping multi provider .....	115
3.1.139	SAP NetWeaver Business Warehouse structure.....	115
3.1.140	SAP NetWeaver Business Warehouse transformation.....	116
3.1.141	SAP SERM.....	116
3.1.142	SAP Solutions allocation diagram.....	116
3.1.143	SAP Solutions organizational elements mapping .....	117
3.1.144	Schedule .....	117
3.1.145	Screen design .....	117
3.1.146	Screen design (Solution Design) .....	119
3.1.147	Screen diagram .....	119
3.1.148	Screen navigation .....	120
3.1.149	SeDaM model.....	121
3.1.150	Service allocation diagram .....	121
3.1.151	Service architecture diagram .....	122
3.1.152	Service architecture diagram (column display) .....	123
3.1.153	Service collaboration diagram .....	123
3.1.154	Shift calendar.....	124
3.1.155	SIPOC .....	125

3.1.156	Spreadsheet.....	125
3.1.157	Strategy allocation diagram.....	142
3.1.158	Strategy diagram.....	142
3.1.159	Structuring model.....	142
3.1.160	Survey management.....	142
3.1.161	Swimlane tree.....	143
3.1.162	SWOT diagram.....	143
3.1.163	System attribute domain.....	143
3.1.164	System attributes.....	143
3.1.165	System environment.....	143
3.1.166	Table diagram.....	145
3.1.167	Task allocation diagram.....	145
3.1.168	Technical resources.....	148
3.1.169	Technical terms model.....	148
3.1.170	TOGAF diagram.....	149
3.1.171	Transformation.....	150
3.1.172	Transformation profile model.....	150
3.1.173	UML 1.4 Activity diagram.....	151
3.1.174	UML 1.4 Class description diagram.....	152
3.1.175	UML 1.4 Class diagram.....	152
3.1.176	UML 1.4 Collaboration diagram.....	154
3.1.177	UML 1.4 Component diagram.....	154
3.1.178	UML 1.4 Deployment diagram.....	155
3.1.179	UML 1.4 Sequence diagram.....	156
3.1.180	UML 1.4 Statechart diagram.....	157
3.1.181	UML 1.4 Use case diagram.....	158
3.1.182	UML2 Activity diagram.....	159
3.1.183	UML2 Class diagram.....	166
3.1.184	UML2 Communication diagram.....	173
3.1.185	UML2 Component diagram.....	180
3.1.186	UML2 Composite structure diagram.....	187
3.1.187	UML2 Deployment diagram.....	194
3.1.188	UML2 Interaction overview diagram.....	201
3.1.189	UML2 Object diagram.....	208
3.1.190	UML2 Package diagram.....	215
3.1.191	UML2 Profile diagram.....	222
3.1.192	UML2 Protocol state machine diagram.....	229
3.1.193	UML2 Sequence diagram.....	236
3.1.194	UML2 State machine diagram.....	243
3.1.195	UML2 Timing diagram.....	250
3.1.196	UML2 Use case diagram.....	257
3.1.197	Value stream map.....	263
3.1.198	Value-added chain diagram.....	264
3.1.199	Whiteboard.....	265
3.1.200	Work breakdown structure.....	265
3.1.201	XML model.....	265
3.1.202	Y diagram.....	265
3.2	Model types - Connection types/Assignment relationship types.....	266
3.2.1	Access diagram.....	266
3.2.2	Access diagram (physical).....	349
3.2.3	Application collaboration diagram.....	409
3.2.4	Application collaboration diagram (physical).....	493
3.2.5	Application system diagram.....	536
3.2.6	Application system type diagram.....	541
3.2.7	Application system type diagram (column display).....	551
3.2.8	ArchiMate model (2.1).....	554
3.2.9	ArchiMate model (3.0).....	801

3.2.10	Attribute allocation diagram .....	1600
3.2.11	Attribute allocation diagram (Solution Design) .....	1602
3.2.12	Authorization hierarchy.....	1602
3.2.13	Authorization map.....	1603
3.2.14	Bow tie diagram .....	1605
3.2.15	BPMN allocation diagram (BPMN 1.x) .....	1606
3.2.16	BPMN allocation diagram (BPMN 2.0).....	1614
3.2.17	BPMN collaboration diagram (BPMN 2.0) .....	1614
3.2.18	BPMN conversation diagram (BPMN 2.0) .....	1622
3.2.19	BPMN process diagram (BPMN 1.x).....	1623
3.2.20	BPMN process diagram (BPMN 2.0).....	1626
3.2.21	BSC Cause-and-effect diagram .....	1631
3.2.22	Business controls diagram.....	1634
3.2.23	Business footprint diagram.....	1640
3.2.24	Business Model Canvas.....	1647
3.2.25	Business rule allocation diagram .....	1664
3.2.26	Business rule architecture diagram .....	1666
3.2.27	Business segment matrix .....	1667
3.2.28	c3 method .....	1669
3.2.29	CD Diagram .....	1673
3.2.30	Class diagram .....	1674
3.2.31	Classification diagram.....	1679
3.2.32	Communications diagram.....	1679
3.2.33	Competition model.....	1680
3.2.34	Cost category diagram.....	1680
3.2.35	CtX-tree .....	1680
3.2.36	Customer journey landscape .....	1681
3.2.37	Customer journey map .....	1682
3.2.38	Customer segmentation map.....	1685
3.2.39	Customer touchpoint allocation diagram.....	1687
3.2.40	Customer touchpoint map .....	1691
3.2.41	Data flow diagram.....	1693
3.2.42	Data type diagram (Solution Design) .....	1696
3.2.43	Data Warehouse model.....	1697
3.2.44	DMN boxed function .....	1699
3.2.45	DMN context diagram .....	1699
3.2.46	DMN decision requirements diagram.....	1705
3.2.47	DMN decision table model .....	1708
3.2.48	Document structure (Solution Design) .....	1709
3.2.49	DTD.....	1710
3.2.50	DW structure.....	1715
3.2.51	DW transformation.....	1716
3.2.52	E-Business scenario diagram .....	1717
3.2.53	eERM .....	1719
3.2.54	eERM attribute allocation diagram .....	1724
3.2.55	Enterprise BPMN collaboration diagram .....	1727
3.2.56	Enterprise BPMN process diagram .....	1746
3.2.57	EPC .....	1762
3.2.58	EPC (column display).....	1852
3.2.59	EPC (horizontal table display) .....	1932
3.2.60	EPC (instance).....	2013
3.2.61	EPC (material flow) .....	2065
3.2.62	EPC (row display) .....	2153
3.2.63	EPC (table display).....	2234
3.2.64	Event diagram.....	2315
3.2.65	Event diagram (instance) .....	2326
3.2.66	Function allocation diagram.....	2327

3.2.67	Function mapping .....	2408
3.2.68	Function tree.....	2409
3.2.69	Function/Organizational level diagram .....	2410
3.2.70	Functions mapping (SAP Solution Manager) .....	2410
3.2.71	IE Data model .....	2410
3.2.72	Industrial process .....	2415
3.2.73	Information carrier diagram .....	2449
3.2.74	Information flow diagram.....	2453
3.2.75	Input/Output diagram .....	2455
3.2.76	Input/Output diagram (inverse).....	2460
3.2.77	IoT object context.....	2465
3.2.78	IoT object definition .....	2466
3.2.79	IT architecture mapping.....	2466
3.2.80	IT architecture matrix.....	2467
3.2.81	Knowledge map .....	2473
3.2.82	Knowledge structure diagram .....	2475
3.2.83	KPI allocation diagram.....	2477
3.2.84	KPI tree.....	2492
3.2.85	Mapping model .....	2493
3.2.86	Material diagram.....	2495
3.2.87	Material flow diagram .....	2496
3.2.88	Network diagram .....	2497
3.2.89	Network topology.....	2503
3.2.90	Objective diagram.....	2515
3.2.91	Office process.....	2517
3.2.92	OMT Class description model .....	2551
3.2.93	OMT Dynamic model .....	2551
3.2.94	OMT Functional model .....	2552
3.2.95	OMT Object model .....	2553
3.2.96	Organizational chart.....	2556
3.2.97	PCD .....	2567
3.2.98	PCD (material flow).....	2647
3.2.99	PPC.....	2732
3.2.100	Privileges diagram .....	2734
3.2.101	Process instantiation model .....	2744
3.2.102	Process schedule .....	2745
3.2.103	Process selection diagram .....	2828
3.2.104	Process selection matrix.....	2828
3.2.105	Process support map .....	2829
3.2.106	Product allocation diagram .....	2836
3.2.107	Product selection matrix .....	2845
3.2.108	Product tree.....	2846
3.2.109	Product/Service exchange diagram.....	2847
3.2.110	Product/Service exchange diagram (graphic) .....	2865
3.2.111	Product/Service tree.....	2873
3.2.112	Product/Service tree (graphic) .....	2881
3.2.113	Program flow chart (PF).....	2888
3.2.114	Project schedule .....	2889
3.2.115	Questionnaire template allocations .....	2905
3.2.116	Quick model.....	2907
3.2.117	RAD .....	2907
3.2.118	RAMS .....	2908
3.2.119	Relations diagram .....	2909
3.2.120	Requirement allocation diagram .....	2911
3.2.121	Requirements tree .....	2919
3.2.122	Risk diagram.....	2920
3.2.123	Role diagram.....	2921

3.2.124	Rule diagram.....	2932
3.2.125	SAP ALE filter model.....	2933
3.2.126	SAP ALE function model.....	2933
3.2.127	SAP ALE message flow model.....	2933
3.2.128	SAP functions mapping (SAP Solution Manager).....	2934
3.2.129	SAP integration process (XI).....	2934
3.2.130	SAP NetWeaver Business Warehouse data flow model.....	2936
3.2.131	SAP NetWeaver Business Warehouse mapping multi provider.....	2937
3.2.132	SAP NetWeaver Business Warehouse structure.....	2937
3.2.133	SAP NetWeaver Business Warehouse transformation.....	2938
3.2.134	SAP SERM.....	2939
3.2.135	SAP Solutions allocation diagram.....	2941
3.2.136	SAP Solutions organizational elements mapping.....	2944
3.2.137	Screen design.....	2952
3.2.138	Screen design (Solution Design).....	2975
3.2.139	Screen diagram.....	2984
3.2.140	Screen navigation.....	2990
3.2.141	SeDaM model.....	2995
3.2.142	Service allocation diagram.....	2997
3.2.143	Service architecture diagram.....	3022
3.2.144	Service architecture diagram (column display).....	3023
3.2.145	Service collaboration diagram.....	3024
3.2.146	Shift calendar.....	3044
3.2.147	SIPOC.....	3044
3.2.148	Strategy allocation diagram.....	3050
3.2.149	Strategy diagram.....	3051
3.2.150	Structuring model.....	3051
3.2.151	Survey management.....	3052
3.2.152	Swimlane tree.....	3053
3.2.153	SWOT diagram.....	3053
3.2.154	System environment.....	3054
3.2.155	Table diagram.....	3085
3.2.156	Task allocation diagram.....	3088
3.2.157	Technical resources.....	3146
3.2.158	Technical terms model.....	3151
3.2.159	TOGAF diagram.....	3153
3.2.160	Transformation.....	3197
3.2.161	Transformation profile model.....	3198
3.2.162	UML 1.4 Activity diagram.....	3199
3.2.163	UML 1.4 Class description diagram.....	3218
3.2.164	UML 1.4 Class diagram.....	3221
3.2.165	UML 1.4 Collaboration diagram.....	3310
3.2.166	UML 1.4 Component diagram.....	3319
3.2.167	UML 1.4 Deployment diagram.....	3339
3.2.168	UML 1.4 Sequence diagram.....	3377
3.2.169	UML 1.4 Statechart diagram.....	3386
3.2.170	UML 1.4 Use case diagram.....	3398
3.2.171	Value stream map.....	3427
3.2.172	Value-added chain diagram.....	3429
3.2.173	Whiteboard.....	3436
3.2.174	Work breakdown structure.....	3437
3.2.175	XML model.....	3437
3.3	ARIS object types.....	3438
3.3.1	ARIS objects.....	3438
3.3.2	Object type specific attribute types.....	3592

3.3.2.1	Action.....	3592
3.3.2.2	Activity graph .....	3596
3.3.2.3	Actor .....	3600
3.3.2.4	Answer option.....	3604
3.3.2.5	Application collaboration .....	3608
3.3.2.6	Application system .....	3612
3.3.2.7	Application system class.....	3617

# 1 Classification of models

Model layout is based on symbol positions and the meaning of relationships. Which symbols and relationships take on the central role depends on the model type. Associations are listed in the following tables.

## 1.1 Layout classes

Class	Description	Layout procedure (available in the program)
Directed graph with associations (DG)	Directed graphs with associations are used to represent models in which specific object types build a directional structure. These object types can have relationships to other object types.	Directed graph (EPC) Directed graph (BPMN) Directed graph (attribute-based)
Central object type (CO)	Models with a central object type serve to represent relationships between this object type and other object types.	Central object type
Central object type with priority (CP)	Models with a central object type with priority serve to represent relationships between the central object type and other object types. Here, the object type with the highest priority in the current model occupies the central role.	Central object type
Pure hierarchy (PH)	Pure hierarchies consist of only one object type. The hierarchy relationship can be reflected by different connection types.	Hierarchy
Hierarchy with associations (HA)	Hierarchies with associations represent trees that consist of only one object type. The hierarchy relationship can be reflected by different connection types. Besides hierarchy relationships, other object types can be assigned to the objects that build the hierarchy.	Hierarchy
Hierarchies with crosslinks (HC)	A hierarchy with crosslinks contains multiple structurally relevant object types that can build subhierarchies. These subhierarchies can be linked via structurally irrelevant connections. An example of a model type using this layout is the organizational chart. Objects of the <b>Group</b> and <b>Organizational unit</b> types are structurally relevant and can build subhierarchies using the <b>is superior</b> relationship type. The structurally irrelevant <b>is assigned to</b> connection can be	Hierarchy

Class	Description	Layout procedure (available in the program)
	drawn between a group hierarchy and the hierarchy of organizational units.	
SAP® SERM layout	Directed graph with associations, where the direction the relationships are drawn in when created does not match the direction of the model flow. This means that <b>is supertype of</b> relationships between entity type and generalization type, and <b>is subtype of</b> relationships between generalization type and entity type are both drawn from the entity type to the generalization type, while the layout represents relationships from entity type to generalization type, and from generalization type to entity type.	SAP® SERM
Undirected graph (ERM)	An eERM layout requires special handling because the alignment of individual connections does not correspond to the direction the connections are drawn in when created. An example of such a connection is the <b>is subtype of</b> connection drawn from <b>Entity type</b> objects to <b>Generalization type</b> objects. However, the layout will represent the connection as running from the generalization type to the entity type.	ERM
	Combines the properties of a directed graph with associations and the properties of a hierarchy. Directed connections run from left to right, hierarchical relationships from top to bottom.	Value-added chain
EPC (column display) layout  EPC (row display) layout  PCD layout  Input/Output diagram layout	This layout procedure is applied to model types that consist of two rows and any number of columns (column display), or vice versa (row display).  Models that consist of any required number of rows and columns use the LAYOUT_IN_OUT layout procedure. Typical examples are the Input/Output diagram or the Business segment matrix.	Models (column/row display)
Universal procedure	All model types that cannot be associated with a particular layout procedure are subject to the	Universal procedure

Class	Description	Layout procedure (available in the program)
	universal procedure.	
UML layout	This layout procedure is used only for UML models edited with ARIS UML Designer.	UML layout

## 1.2 Assignment of models to layout classes

Model	Class	Structurally relevant/central objects (priority)
Application system diagram	Hierarchy with crosslinks	Application system (1), IT function (1), Program module type (3), Program module type (2), Module (1)
Application system type diagram	Hierarchy with crosslinks	IT function type (2), IT function class (1), Application system class (1), Module class (1), Application system type (2), Module type (2)
Attribute allocation diagram	Central object type with priority	Attribute (2), Relation (1)
CD diagram	Pure hierarchy	Cost driver
EPC	Directed graph with associations	Process interface, Function (target), All operators, Function, Operation, System function (target), Shift, System function (actual), Event, Function (actual)
EPC (instance)	Directed graph with associations	All operators (inst.), Event instance, Project guideline, Task
EPC (material flow)	Directed graph with associations	All operators, Event, Process interface, Function (target), Operation, System function (actual), System function (target), Function (actual), Function

<b>Model</b>	<b>Class</b>	<b>Structurally relevant/central objects (priority)</b>
eERM	Undirected graph (ERM)	Generalization, Cluster, Reint. relationship type, Relationship type, Entity type
eERM attribute allocation diagram	Central object type with priority	Attribute type group (5), Generalization (3), FK attribute (ERM) (4), K attribute (ERM) (4), D attribute (ERM) (4), Reint. relationship type, Relationship type (2), Entity type (1)
Event diagram	Hierarchy with associations	Event, All operators
Technical terms model	Hierarchy with associations	Technical term
Function/Organizational level diagram	Central object type	Organizational level
Function tree	Pure hierarchy	Function
Function allocation diagram	Central object type	Object state, Function
Task allocation diagram	Central object type	Task
Structuring model	Pure hierarchy	Structural element
Graphic description	Directed graph with associations	Line of work, Impulse, Abort symbol, All operators, Reflector
IEF data model	SAP® SERM layout	Cluster, Generalization, Generalization, Generalization, Entity type, Generalization
Industrial process	Directed graph with associations	Event, Function (manufacturing), Rule, Function (office), Object state
Class diagram	SAP® SERM layout	Entity type, Relationship type, Reint. relationship type, Cluster, Technical term
Classification diagram	Central object type	Object type class
Cost category diagram	Pure hierarchy	Cost category

<b>Model</b>	<b>Class</b>	<b>Structurally relevant/central objects (priority)</b>
Material diagram	Hierarchy with crosslinks	Material type (1), Packaging material class (4), Material class (3), Packaging material type (2)
Network diagram	Hierarchy with crosslinks	Hardware component (1), Network (4), Network connection (3), Network node (2)
Network topology	Hierarchy with crosslinks	Network connection type (5), Network node type (4), Hardware component type (2), Hardware component class (1), Network type (3)
Office process	Directed graph with associations	Function (office), Event, Function (manufacturing), Rule
OMT Class description model	Central object type	Class
OMT Dynamic model	Directed graph with associations	State, Initial state, Final state
OMT Object model	Hierarchy with associations	Class
Organizational chart	Hierarchy with crosslinks	System organizational unit type, System organizational unit, Location (5), Organizational unit type (1), Position (1), Organizational unit (1), System organizational unit type (7), System organizational unit (6), Position type, Cost center, Group (4)
PPC	Directed graph with associations	All operators, Event instance, Task, Project guideline
Product tree	Pure hierarchy	Product
Process instantiation model	Directed graph with associations	Instantiation plan, Instantiation interval, Instantiation cycle
Privileges diagram	Central object type	Group, Person type, Organizational unit, Position, External person, Location, Organizational unit, Internal person

<b>Model</b>	<b>Class</b>	<b>Structurally relevant/central objects (priority)</b>
Relations diagram	Undirected graph (ERM)	eERM domain, Relation, View
SAP ALE filter model	Central object type	Function
SAP ALE function model	Pure hierarchy	Function
SAP® SERM	SAP® SERM layout	Entity type, Cluster, Generalization, Business object, SAP® SERM gen.
Shift calendar	Directed graph with associations	Shift plan, Shift cycle, Shift, Break, Operation
SeDaM model	SAP® SERM layout	Generalization, Entity type, Cluster
Table diagram	Undirected graph (ERM)	View (physical), Field, Table
Technical resources	Hierarchy with crosslinks	Operating resource (9), Tech. operating supply class (4), Transport system class (3), Warehouse equipment class (2), Operating resource class (1), Technical operating supply (12), Warehouse equipment (10), Operating resource type (5), Transport system type (7), Technical operating supply type (8), Warehouse equipment type (6), Transport system (11)
Knowledge structure diagram	Pure hierarchy	Documented knowledge, Knowledge category
Objective diagram	Hierarchy with crosslinks	Success factor (2), Objective (1)

## 2 Implicit relationships in Swimlane models

In the following Swimlane models (models in column/row display) implicit relationships are generated automatically:

- EPC (column/row display)
- Input/Output diagram
- UML Activity diagram
- PCD
- PCD (material flow)

### 2.1 Implicit relationships - EPC (column/row display)

The following objects can have the listed implicit relationships within this model:

Source object type	Implicit relationship	Target object type
Organizational unit	is technically responsible for	Function
Position	is technically responsible for	Function
Person	is technically responsible for	Function
Group	is technically responsible for	Function
Employee variable	is technically responsible for	Function
Organizational unit	is technically responsible for	IT function type
Position	is technically responsible for	IT function type
Person	is technically responsible for	IT function type
Group	is technically responsible for	IT function type
Organizational unit	carries out	Function
Position	carries out	Function
Person	carries out	Function
Group	carries out	Function
Employee variable	carries out	Function
Application system	supports	Function
Organizational unit	is IT responsible for	Function
Position	is IT responsible for	Function
Person	is IT responsible for	Function
Group	is IT responsible for	Function
Employee variable	is IT responsible for	Function

Source object type	Implicit relationship	Target object type
Organizational unit type	carries out	Function
Person type	carries out	Function
Organizational unit type	is IT responsible for	Function
Person type	is IT responsible for	Function
Organizational unit	is technically responsible for	Application system type
Organizational unit	is technically responsible for	Application system class
Organizational unit	is technically responsible for	Module type
Organizational unit type	is technically responsible for	Application system type
Organizational unit type	is technically responsible for	Application system class
Organizational unit type	is technically responsible for	Function
Organizational unit type	is technically responsible for	Module type
Organizational unit type	is technically responsible for	Application system
Organizational unit type	is technically responsible for	Module
Organizational unit type	is technically responsible for	IT function type
Organizational unit type	is technically responsible for	IT function
Position	is technically responsible for	Application system type
Position	is technically responsible for	Application system class
Position	is technically responsible for	Module type
Person	is technically responsible for	Application system type
Person	is technically responsible for	Application system class
Person	is technically responsible for	Module type
Person type	is technically responsible for	Application system type
Person type	is technically responsible for	Application system class
Person type	is technically responsible for	Function
Person type	is technically responsible for	Module type
Person type	is technically responsible for	Application system
Person type	is technically responsible for	Module
Person type	is technically responsible for	IT function type
Person type	is technically responsible for	IT function
Group	is technically responsible for	Application system type

Source object type	Implicit relationship	Target object type
Group	is technically responsible for	Application system class
Group	is technically responsible for	Module type
Application system type	can support	Function
Application system class	can support	Function
Organizational unit	decides on	Function
Position	decides on	Function
Person	decides on	Function
Group	decides on	Function
Employee variable	decides on	Function
Organizational unit	contributes to	Function
Position	contributes to	Function
Person	contributes to	Function
Group	contributes to	Function
Employee variable	contributes to	Function
Organizational unit	must inform about result of	Function
Position	must inform about result of	Function
Person	must inform about result of	Function
Group	must inform about result of	Function
Employee variable	must inform about result of	Function
Organizational unit	must be informed about	Function
Position	must be informed about	Function
Person	must be informed about	Function
Group	must be informed about	Function
Employee variable	must be informed about	Function
Organizational unit	must be informed on cancellation	Function
Position	must be informed on cancellation	Function
Person	must be informed on cancellation	Function
Group	must be informed on cancellation	Function
Person type	decides on	Function
Person type	contributes to	Function

Source object type	Implicit relationship	Target object type
Person type	must inform about result of	Function
Person type	must be informed about	Function
Organizational unit type	carries out	Function
Person type	must be informed on cancellation	Function
Organizational unit	has consulting role in	Function
Position	has consulting role in	Function
Person	has consulting role in	Function
Employee variable	has consulting role in	Function
Organizational unit type	has consulting role in	Function
Person type	has consulting role in	Function
Group	has consulting role in	Function
Organizational unit	accepts	Function

## 2.2 Implicit relationships of the Input/Output diagram

The following objects can have the listed implicit relationships within this model:

Source object type	Implicit relationship	Target object type
Function	creates output to	Information carrier
Cluster/Data model	is input for	Function
Entity type	is input for	Function
ERM attribute	is input for	Function
Function	has as output	Relationship type
Function	has as output	Cluster/Data model
Function	has as output	Entity type
Function	has as output	ERM attribute
Information carrier	provides input for	Function

## 2.3 Implicit relationships of the UML Activity diagram

The following objects can have the listed implicit relationships within this model:

Source object type	Implicit relationship	Target object type
Organizational unit	carries out	Function
Position	carries out	Function
Person	carries out	Function
Group	carries out	Function
Person type	carries out	Function

## 2.4 Implicit relationships of the PCD

The following objects can have the listed implicit relationships within this model:

Source object type	Implicit relationship	Target object type
Organizational unit	carries out	Function
Position	carries out	Function
Person	carries out	Function
Group	carries out	Function
Person type	carries out	Function

## 2.5 Implicit relationships of the PCD (material flow)

The following objects can have the listed implicit relationships within this model:

Source object type	Implicit relationship	Target object type
Organizational unit	carries out	Function
Position	carries out	Function
Person	carries out	Function
Group	carries out	Function
Person type	carries out	Function

### 3.1.5 Application system diagram

<b>Model type</b>	<b>Object type</b>
Application system diagram	Application system
Application system diagram	Application system type
Application system diagram	DBMS
Application system diagram	DBMS type
Application system diagram	Function
Application system diagram	Graphical user interface type
Application system diagram	IT function
Application system diagram	IT function type
Application system diagram	List
Application system diagram	Module
Application system diagram	Module type
Application system diagram	Operating system
Application system diagram	Operating system type
Application system diagram	Program library
Application system diagram	Program module
Application system diagram	Program module type
Application system diagram	Programming language
Application system diagram	Screen

### 3.1.6 Application system type diagram

Model type	Object type
Application system type diagram	Application system class
Application system type diagram	Application system type
Application system type diagram	Capability
Application system type diagram	DBMS type
Application system type diagram	Draft list
Application system type diagram	Function
Application system type diagram	Graphical user interface type
Application system type diagram	IS service
Application system type diagram	IT function class
Application system type diagram	IT function type
Application system type diagram	List
Application system type diagram	Module class
Application system type diagram	Module type
Application system type diagram	Objective
Application system type diagram	Operating system type
Application system type diagram	Program module type
Application system type diagram	Programming language
Application system type diagram	Screen
Application system type diagram	Screen category
Application system type diagram	Screen design
Application system type diagram	Service type
Application system type diagram	Socket

### 3.1.7 Application system type diagram (column display)

<b>Model type</b>	<b>Object type</b>
Application system type diagram (column display)	Application system type
Application system type diagram (column display)	Capability
Application system type diagram (column display)	Function
Application system type diagram (column display)	IS service
Application system type diagram (column display)	IT function type
Application system type diagram (column display)	Service type
Application system type diagram (column display)	Socket

### 3.1.8 ArchiMate model (2.1)

Model type	Object type
ArchiMate model (2.1)	Application system type
ArchiMate model (2.1)	Assessment
ArchiMate model (2.1)	Business rule
ArchiMate model (2.1)	Capability
ArchiMate model (2.1)	Class
ArchiMate model (2.1)	Cluster/Data model
ArchiMate model (2.1)	Contract
ArchiMate model (2.1)	Distribution channel
ArchiMate model (2.1)	Driver
ArchiMate model (2.1)	Entity type
ArchiMate model (2.1)	Event
ArchiMate model (2.1)	Event instance
ArchiMate model (2.1)	Function
ArchiMate model (2.1)	Gap
ArchiMate model (2.1)	Group
ArchiMate model (2.1)	Hardware component type
ArchiMate model (2.1)	IT function type
ArchiMate model (2.1)	Information carrier
ArchiMate model (2.1)	Knowledge category
ArchiMate model (2.1)	Location
ArchiMate model (2.1)	Need
ArchiMate model (2.1)	Network connection type
ArchiMate model (2.1)	Network node type
ArchiMate model (2.1)	Network type
ArchiMate model (2.1)	Objective
ArchiMate model (2.1)	Organizational unit
ArchiMate model (2.1)	Policy
ArchiMate model (2.1)	Product/Service
ArchiMate model (2.1)	Requirement

<b>Model type</b>	<b>Object type</b>
ArchiMate model (2.1)	Role
ArchiMate model (2.1)	Rule
ArchiMate model (2.1)	Service type
ArchiMate model (2.1)	Structural element
ArchiMate model (2.1)	Task
ArchiMate model (2.1)	Technical term

### 3.1.9 ArchiMate model (3.0)

Model type	Object type
ArchiMate model (3.0)	Application collaboration
ArchiMate model (3.0)	Application system type
ArchiMate model (3.0)	Assessment
ArchiMate model (3.0)	Business rule
ArchiMate model (3.0)	Capability
ArchiMate model (3.0)	Cluster/Data model
ArchiMate model (3.0)	Contract
ArchiMate model (3.0)	Deliverable
ArchiMate model (3.0)	Distribution channel
ArchiMate model (3.0)	Driver
ArchiMate model (3.0)	Entity type
ArchiMate model (3.0)	Equipment
ArchiMate model (3.0)	Event
ArchiMate model (3.0)	Event instance
ArchiMate model (3.0)	Facility
ArchiMate model (3.0)	Function
ArchiMate model (3.0)	Gap
ArchiMate model (3.0)	General resource
ArchiMate model (3.0)	Group
ArchiMate model (3.0)	Hardware component type
ArchiMate model (3.0)	IS service
ArchiMate model (3.0)	IT function type
ArchiMate model (3.0)	Information carrier
ArchiMate model (3.0)	Knowledge category
ArchiMate model (3.0)	Location
ArchiMate model (3.0)	Need
ArchiMate model (3.0)	Network connection type
ArchiMate model (3.0)	Network node type
ArchiMate model (3.0)	Network type

Model type	Object type
ArchiMate model (3.0)	Objective
ArchiMate model (3.0)	Operating resource type
ArchiMate model (3.0)	Organizational unit
ArchiMate model (3.0)	Participant
ArchiMate model (3.0)	Policy
ArchiMate model (3.0)	Product/Service
ArchiMate model (3.0)	Requirement
ArchiMate model (3.0)	Role
ArchiMate model (3.0)	Rule
ArchiMate model (3.0)	Service type
ArchiMate model (3.0)	Socket
ArchiMate model (3.0)	Strategy
ArchiMate model (3.0)	Structural element
ArchiMate model (3.0)	Success factor
ArchiMate model (3.0)	System software
ArchiMate model (3.0)	Task
ArchiMate model (3.0)	Technology service

### 3.1.10 Attribute allocation diagram

Model type	Object type
Attribute allocation diagram	Attribute
Attribute allocation diagram	Domain
Attribute allocation diagram	ERM attribute
Attribute allocation diagram	Relation
Attribute allocation diagram	Relationship type

### 3.1.11 Attribute allocation diagram (Solution Design)

Model type	Object type
Attribute allocation diagram (Solution Design)	ERM attribute
Attribute allocation diagram (Solution Design)	Entity type
Attribute allocation diagram (Solution Design)	Enumeration
Attribute allocation diagram (Solution Design)	Enumeration occurrence

### 3.1.12 Authorization hierarchy

Model type	Object type
Authorization hierarchy	Authorization condition

### 3.1.13 Authorization map

Model type	Object type
Authorization map	Authorization condition
Authorization map	Group
Authorization map	Location
Authorization map	Organizational unit
Authorization map	Organizational unit type
Authorization map	Person
Authorization map	Position
Authorization map	Role

### 3.1.14 Bow tie diagram

Model type	Object type
Bow tie diagram	Event
Bow tie diagram	Function
Bow tie diagram	Hazard

### 3.1.15 BPMN allocation diagram (BPMN 1.x)

Model type	Object type
BPMN allocation diagram (BPMN 1.x)	Business rule
BPMN allocation diagram (BPMN 1.x)	Class
BPMN allocation diagram (BPMN 1.x)	Cluster/Data model
BPMN allocation diagram (BPMN 1.x)	ERM attribute
BPMN allocation diagram (BPMN 1.x)	Event
BPMN allocation diagram (BPMN 1.x)	Function
BPMN allocation diagram (BPMN 1.x)	Gate
BPMN allocation diagram (BPMN 1.x)	Group
BPMN allocation diagram (BPMN 1.x)	Information carrier
BPMN allocation diagram (BPMN 1.x)	Lane
BPMN allocation diagram (BPMN 1.x)	Organizational unit
BPMN allocation diagram (BPMN 1.x)	Participant
BPMN allocation diagram (BPMN 1.x)	Partner link
BPMN allocation diagram (BPMN 1.x)	Person
BPMN allocation diagram (BPMN 1.x)	Position
BPMN allocation diagram (BPMN 1.x)	Role
BPMN allocation diagram (BPMN 1.x)	Rule
BPMN allocation diagram (BPMN 1.x)	Structural element

### 3.1.16 BPMN allocation diagram (BPMN 2.0)

Model type	Object type
BPMN allocation diagram (BPMN 2.0)	Function
BPMN allocation diagram (BPMN 2.0)	Organizational unit
BPMN allocation diagram (BPMN 2.0)	Participant
BPMN allocation diagram (BPMN 2.0)	Role

### 3.1.17 BPMN collaboration diagram (BPMN 2.0)

Model type	Object type
BPMN collaboration diagram (BPMN 2.0)	Cluster/Data model
BPMN collaboration diagram (BPMN 2.0)	Event
BPMN collaboration diagram (BPMN 2.0)	Function
BPMN collaboration diagram (BPMN 2.0)	Information carrier
BPMN collaboration diagram (BPMN 2.0)	Lane
BPMN collaboration diagram (BPMN 2.0)	Message
BPMN collaboration diagram (BPMN 2.0)	Participant
BPMN collaboration diagram (BPMN 2.0)	Rule
BPMN collaboration diagram (BPMN 2.0)	Structural element
BPMN collaboration diagram (BPMN 2.0)	Text annotation

### 3.1.18 BPMN conversation diagram (BPMN 2.0)

Model type	Object type
BPMN conversation diagram (BPMN 2.0)	Conversation
BPMN conversation diagram (BPMN 2.0)	Participant
BPMN conversation diagram (BPMN 2.0)	Text annotation

### 3.1.19 BPMN process diagram (BPMN 1.x)

Model type	Object type
BPMN process diagram (BPMN 1.x)	Application system
BPMN process diagram (BPMN 1.x)	Application system class
BPMN process diagram (BPMN 1.x)	Application system type
BPMN process diagram (BPMN 1.x)	Business object
BPMN process diagram (BPMN 1.x)	COT attribute
BPMN process diagram (BPMN 1.x)	Class
BPMN process diagram (BPMN 1.x)	Cluster/Data model
BPMN process diagram (BPMN 1.x)	Complex object type

<b>Model type</b>	<b>Object type</b>
BPMN process diagram (BPMN 1.x)	Component
BPMN process diagram (BPMN 1.x)	ERM attribute
BPMN process diagram (BPMN 1.x)	Entity type
BPMN process diagram (BPMN 1.x)	Event
BPMN process diagram (BPMN 1.x)	Function
BPMN process diagram (BPMN 1.x)	Group
BPMN process diagram (BPMN 1.x)	IT function
BPMN process diagram (BPMN 1.x)	IT function class
BPMN process diagram (BPMN 1.x)	IT function type
BPMN process diagram (BPMN 1.x)	Information carrier
BPMN process diagram (BPMN 1.x)	Information element
BPMN process diagram (BPMN 1.x)	Lane
BPMN process diagram (BPMN 1.x)	Location
BPMN process diagram (BPMN 1.x)	Module
BPMN process diagram (BPMN 1.x)	Module class
BPMN process diagram (BPMN 1.x)	Module type
BPMN process diagram (BPMN 1.x)	Organizational unit
BPMN process diagram (BPMN 1.x)	Organizational unit type
BPMN process diagram (BPMN 1.x)	Package
BPMN process diagram (BPMN 1.x)	Participant
BPMN process diagram (BPMN 1.x)	Person
BPMN process diagram (BPMN 1.x)	Position
BPMN process diagram (BPMN 1.x)	Relationship type
BPMN process diagram (BPMN 1.x)	Role
BPMN process diagram (BPMN 1.x)	Rule
BPMN process diagram (BPMN 1.x)	Structural element
BPMN process diagram (BPMN 1.x)	System organizational unit
BPMN process diagram (BPMN 1.x)	System organizational unit type
BPMN process diagram (BPMN 1.x)	Technical term
BPMN process diagram (BPMN 1.x)	Text annotation

### 3.1.20 BPMN process diagram (BPMN 2.0)

Model type	Object type
BPMN process diagram (BPMN 2.0)	Cluster/Data model
BPMN process diagram (BPMN 2.0)	Event
BPMN process diagram (BPMN 2.0)	Function
BPMN process diagram (BPMN 2.0)	Information carrier
BPMN process diagram (BPMN 2.0)	Lane
BPMN process diagram (BPMN 2.0)	Rule
BPMN process diagram (BPMN 2.0)	Structural element
BPMN process diagram (BPMN 2.0)	Text annotation

### 3.1.21 BSC Cause-and-effect diagram

Model type	Object type
BSC Cause-and-effect diagram	KPI instance
BSC Cause-and-effect diagram	Objective
BSC Cause-and-effect diagram	Perspective
BSC Cause-and-effect diagram	Strategy
BSC Cause-and-effect diagram	Success factor

### 3.1.22 Business controls diagram

Model type	Object type
Business controls diagram	Application system type
Business controls diagram	Control execution task
Business controls diagram	Employee variable
Business controls diagram	Function
Business controls diagram	Group
Business controls diagram	Information carrier
Business controls diagram	Location
Business controls diagram	Objective

Model type	Object type
Business controls diagram	Organizational unit
Business controls diagram	Organizational unit type
Business controls diagram	Person
Business controls diagram	Policy
Business controls diagram	Position
Business controls diagram	Questionnaire template
Business controls diagram	Risk
Business controls diagram	Role
Business controls diagram	Screen
Business controls diagram	Task
Business controls diagram	Technical term
Business controls diagram	Test definition

### 3.1.23 Business footprint diagram

Model type	Object type
Business footprint diagram	Application system class
Business footprint diagram	Architecture element
Business footprint diagram	Assumption
Business footprint diagram	Business rule
Business footprint diagram	Class
Business footprint diagram	Cluster/Data model
Business footprint diagram	Driver
Business footprint diagram	Entity type
Business footprint diagram	Function
Business footprint diagram	Gap
Business footprint diagram	KPI instance
Business footprint diagram	Objective
Business footprint diagram	Organizational unit
Business footprint diagram	Policy

Model type	Object type
Business footprint diagram	Requirement
Business footprint diagram	Service type
Business footprint diagram	Task

### 3.1.24 Business Model Canvas

Model type	Object type
Business Model Canvas	Application system type
Business Model Canvas	Cluster/Data model
Business Model Canvas	Cost
Business Model Canvas	Distribution channel
Business Model Canvas	Function
Business Model Canvas	Hardware component type
Business Model Canvas	Need
Business Model Canvas	Organizational unit
Business Model Canvas	Organizational unit type
Business Model Canvas	Person
Business Model Canvas	Product/Service
Business Model Canvas	Profit
Business Model Canvas	Revenue
Business Model Canvas	Role
Business Model Canvas	Service type
Business Model Canvas	Structural element

### 3.1.25 Business rule allocation diagram

Model type	Object type
Business rule allocation diagram	Application system type
Business rule allocation diagram	Business rule
Business rule allocation diagram	Class
Business rule allocation diagram	Cluster/Data model
Business rule allocation diagram	ERM attribute
Business rule allocation diagram	Entity type
Business rule allocation diagram	Group
Business rule allocation diagram	Organizational unit
Business rule allocation diagram	Person
Business rule allocation diagram	Position
Business rule allocation diagram	Role

### 3.1.26 Business rule architecture diagram

Model type	Object type
Business rule architecture diagram	Business rule
Business rule architecture diagram	Policy

### 3.1.27 Business segment matrix

Model type	Object type
Business segment matrix	Business segment
Business segment matrix	Distribution channel
Business segment matrix	Group
Business segment matrix	Location
Business segment matrix	Organizational unit
Business segment matrix	Organizational unit type
Business segment matrix	Position
Business segment matrix	Product/Service
Business segment matrix	Role

### 3.1.28 c3 method

Model type	Object type
c3 method	Application system type
c3 method	Entity type
c3 method	Function
c3 method	Group
c3 method	Improvement potential
c3 method	Knowledge category
c3 method	Location
c3 method	Objective
c3 method	Organizational unit
c3 method	Organizational unit type
c3 method	Person
c3 method	Position
c3 method	Risk
c3 method	Role
c3 method	Structural element
c3 method	Tool

### 3.1.29 CD Diagram

Model type	Object type
CD Diagram	Cost driver

### 3.1.30 Class diagram

Model type	Object type
Class diagram	Attribute type group
Class diagram	Class
Class diagram	Cluster/Data model
Class diagram	ERM attribute
Class diagram	ERM domain
Class diagram	Entity type
Class diagram	Event
Class diagram	Function
Class diagram	Generalization type
Class diagram	Protocol
Class diagram	Relationship type
Class diagram	Rule
Class diagram	Technical term

### 3.1.31 Classification diagram

Model type	Object type
Classification diagram	Classification criterion
Classification diagram	Function
Classification diagram	Object type class

### 3.1.32 Communications diagram

Model type	Object type
Communications diagram	Communication
Communications diagram	Organizational unit
Communications diagram	Organizational unit type

### 3.1.33 Competition model

Model type	Object type
Competition model	Organizational unit
Competition model	Product/Service

### 3.1.34 Composite schedule

Model type	Object type
Composite schedule	Schedule

### 3.1.35 Cost category diagram

Model type	Object type
Cost category diagram	Cost category

### 3.1.36 CtX-tree

Model type	Object type
CtX-tree	Success factor

### 3.1.37 Customer journey landscape

Model type	Object type
Customer journey landscape	Customer journey
Customer journey landscape	Customer lifecycle stage

### 3.1.38 Customer journey map

Model type	Object type
Customer journey map	Application system type
Customer journey map	Capability
Customer journey map	Cluster/Data model
Customer journey map	Customer journey step
Customer journey map	Customer touchpoint
Customer journey map	Distribution channel
Customer journey map	Emotion
Customer journey map	Function
Customer journey map	Group
Customer journey map	Information carrier
Customer journey map	KPI instance
Customer journey map	Organizational unit
Customer journey map	Organizational unit type
Customer journey map	Person
Customer journey map	Position
Customer journey map	Risk
Customer journey map	Role
Customer journey map	Service type
Customer journey map	System organizational unit
Customer journey map	System organizational unit type
Customer journey map	Task
Customer journey map	Technical term

### 3.1.39 Customer segmentation map

Model type	Object type
Customer segmentation map	Customer journey
Customer segmentation map	Customer segment
Customer segmentation map	Persona
Customer segmentation map	Product/Service
Customer segmentation map	Revenue
Customer segmentation map	Risk
Customer segmentation map	Task

### 3.1.40 Customer touchpoint allocation diagram

Model type	Object type
Customer touchpoint allocation diagram	Application system type
Customer touchpoint allocation diagram	Capability
Customer touchpoint allocation diagram	Cluster/Data model
Customer touchpoint allocation diagram	Customer journey step
Customer touchpoint allocation diagram	Customer touchpoint
Customer touchpoint allocation diagram	Distribution channel
Customer touchpoint allocation diagram	Emotion
Customer touchpoint allocation diagram	Function
Customer touchpoint allocation diagram	Group
Customer touchpoint allocation diagram	Information carrier
Customer touchpoint allocation diagram	KPI instance
Customer touchpoint allocation diagram	Organizational unit
Customer touchpoint allocation diagram	Organizational unit type
Customer touchpoint allocation diagram	Person
Customer touchpoint allocation diagram	Position
Customer touchpoint allocation diagram	Risk
Customer touchpoint allocation diagram	Role
Customer touchpoint allocation diagram	Service type

Model type	Object type
Customer touchpoint allocation diagram	System organizational unit
Customer touchpoint allocation diagram	System organizational unit type
Customer touchpoint allocation diagram	Task
Customer touchpoint allocation diagram	Technical term

### 3.1.41 Customer touchpoint map

Model type	Object type
Customer touchpoint map	Application system type
Customer touchpoint map	Capability
Customer touchpoint map	Cluster/Data model
Customer touchpoint map	Customer segment
Customer touchpoint map	Customer touchpoint
Customer touchpoint map	Distribution channel
Customer touchpoint map	Emotion
Customer touchpoint map	Group
Customer touchpoint map	Information carrier
Customer touchpoint map	KPI instance
Customer touchpoint map	Organizational unit
Customer touchpoint map	Organizational unit type
Customer touchpoint map	Person
Customer touchpoint map	Position
Customer touchpoint map	Risk
Customer touchpoint map	Role
Customer touchpoint map	Service type
Customer touchpoint map	System organizational unit
Customer touchpoint map	System organizational unit type
Customer touchpoint map	Task
Customer touchpoint map	Technical term

### 3.1.42 Data flow diagram

Model type	Object type
Data flow diagram	Cluster/Data model
Data flow diagram	Constant
Data flow diagram	Event
Data flow diagram	Function
Data flow diagram	Group
Data flow diagram	IT function type
Data flow diagram	Information carrier
Data flow diagram	Object element
Data flow diagram	Operator
Data flow diagram	Organizational unit
Data flow diagram	Participant
Data flow diagram	Person
Data flow diagram	Position
Data flow diagram	Role
Data flow diagram	Rule
Data flow diagram	Screen

### 3.1.43 Data type diagram (Solution Design)

Model type	Object type
Data type diagram (Solution Design)	ERM attribute
Data type diagram (Solution Design)	Entity type
Data type diagram (Solution Design)	Generalization type

### 3.1.44 Data Warehouse model

Model type	Object type
Data Warehouse model	Application system
Data Warehouse model	Cluster/Data model
Data Warehouse model	Data store object
Data Warehouse model	Function
Data Warehouse model	Module
Data Warehouse model	Screen
Data Warehouse model	Structural element
Data Warehouse model	Technical term

### 3.1.45 DMN boxed function

Model type	Object type
DMN boxed function	Cluster/Data model
DMN boxed function	ERM attribute

### 3.1.46 DMN context diagram

Model type	Object type
DMN context diagram	Application system type
DMN context diagram	Business rule
DMN context diagram	Cluster/Data model
DMN context diagram	ERM attribute
DMN context diagram	Function
DMN context diagram	Group
DMN context diagram	Information carrier
DMN context diagram	KPI instance
DMN context diagram	Objective
DMN context diagram	Organizational unit
DMN context diagram	Person

Model type	Object type
DMN context diagram	Position
DMN context diagram	Questionnaire template
DMN context diagram	Role
DMN context diagram	Service type
DMN context diagram	Structural element
DMN context diagram	Text annotation

### 3.1.47 DMN decision requirements diagram

Model type	Object type
DMN decision requirements diagram	Application system type
DMN decision requirements diagram	Business rule
DMN decision requirements diagram	Cluster/Data model
DMN decision requirements diagram	Information carrier
DMN decision requirements diagram	Service type
DMN decision requirements diagram	Structural element
DMN decision requirements diagram	Text annotation

### 3.1.48 DMN decision table model

Model type	Object type
DMN decision table model	Cluster/Data model
DMN decision table model	ERM attribute
DMN decision table model	Enumeration occurrence
DMN decision table model	Product/Service
DMN decision table model	Text annotation

### 3.1.49 DMN invocation model

Model type	Object type
DMN invocation model	Cluster/Data model
DMN invocation model	ERM attribute

### 3.1.50 Document structure (Solution Design)

Model type	Object type
Document structure (Solution Design)	Cluster/Data model
Document structure (Solution Design)	ERM attribute
Document structure (Solution Design)	Entity type

### 3.1.51 DTD

Model type	Object type
DTD	Attribute type
DTD	Conditional section
DTD	Contents
DTD	Element type
DTD	Enumeration
DTD	Enumeration attribute type
DTD	Sequence
DTD	XOR

### 3.1.52 DW structure

Model type	Object type
DW structure	Cluster/Data model
DW structure	ERM attribute
DW structure	Entity type

### 3.1.53 DW transformation

Model type	Object type
DW transformation	Cluster/Data model
DW transformation	ERM attribute
DW transformation	Entity type
DW transformation	Function

### 3.1.54 E-Business scenario diagram

Model type	Object type
E-Business scenario diagram	Application system
E-Business scenario diagram	Application system type
E-Business scenario diagram	Cluster/Data model
E-Business scenario diagram	Function
E-Business scenario diagram	Information carrier
E-Business scenario diagram	Organizational unit type
E-Business scenario diagram	Product/Service
E-Business scenario diagram	Role
E-Business scenario diagram	Security protocol

### 3.1.55 eERM

<b>Model type</b>	<b>Object type</b>
eERM	Application system type
eERM	Attribute type group
eERM	COT attribute
eERM	Capability
eERM	Cluster/Data model
eERM	ERM attribute
eERM	ERM domain
eERM	Entity type
eERM	Enumeration
eERM	Enumeration occurrence
eERM	Generalization type
eERM	IS service
eERM	IT function type
eERM	Measurement unit
eERM	Measurement unit number
eERM	Relationship type
eERM	Service type
eERM	Socket

### 3.1.56 eERM attribute allocation diagram

Model type	Object type
eERM attribute allocation diagram	Attribute type group
eERM attribute allocation diagram	COT attribute
eERM attribute allocation diagram	ERM attribute
eERM attribute allocation diagram	ERM domain
eERM attribute allocation diagram	Entity type
eERM attribute allocation diagram	Enumeration
eERM attribute allocation diagram	Enumeration occurrence
eERM attribute allocation diagram	Generalization type
eERM attribute allocation diagram	Measurement unit
eERM attribute allocation diagram	Measurement unit number
eERM attribute allocation diagram	Relationship type

### 3.1.57 Enterprise BPMN collaboration diagram

Model type	Object type
Enterprise BPMN collaboration diagram	Application system type
Enterprise BPMN collaboration diagram	Cluster/Data model
Enterprise BPMN collaboration diagram	Event
Enterprise BPMN collaboration diagram	Function
Enterprise BPMN collaboration diagram	Group
Enterprise BPMN collaboration diagram	Information carrier
Enterprise BPMN collaboration diagram	Lane
Enterprise BPMN collaboration diagram	Message
Enterprise BPMN collaboration diagram	Organizational unit
Enterprise BPMN collaboration diagram	Organizational unit type
Enterprise BPMN collaboration diagram	Participant
Enterprise BPMN collaboration diagram	Position
Enterprise BPMN collaboration diagram	Role

Model type	Object type
Enterprise BPMN collaboration diagram	Rule
Enterprise BPMN collaboration diagram	Structural element
Enterprise BPMN collaboration diagram	Text annotation

### 3.1.58 Enterprise BPMN process diagram

Model type	Object type
Enterprise BPMN process diagram	Application system type
Enterprise BPMN process diagram	Cluster/Data model
Enterprise BPMN process diagram	Event
Enterprise BPMN process diagram	Function
Enterprise BPMN process diagram	Group
Enterprise BPMN process diagram	Information carrier
Enterprise BPMN process diagram	Lane
Enterprise BPMN process diagram	Organizational unit
Enterprise BPMN process diagram	Organizational unit type
Enterprise BPMN process diagram	Position
Enterprise BPMN process diagram	Role
Enterprise BPMN process diagram	Rule
Enterprise BPMN process diagram	Structural element
Enterprise BPMN process diagram	Text annotation

### 3.1.59 EPC

Model type	Object type
EPC	Application system
EPC	Application system class
EPC	Application system type
EPC	Assumption
EPC	Attribute type group
EPC	Authorization condition
EPC	Business object
EPC	Business rule
EPC	COT attribute
EPC	Capability
EPC	Capability configuration
EPC	Class
EPC	Cluster/Data model
EPC	Complex object type
EPC	Component
EPC	Cost category
EPC	Cost driver
EPC	Customer touchpoint
EPC	Distribution channel
EPC	Documented knowledge
EPC	Draft list
EPC	ERM attribute
EPC	Element type
EPC	Employee variable
EPC	Entity type
EPC	Enumeration occurrence
EPC	Event
EPC	Function
EPC	Gap

<b>Model type</b>	<b>Object type</b>
EPC	General resource
EPC	Group
EPC	Hardware component type
EPC	IS service
EPC	IT function
EPC	IT function type
EPC	Information carrier
EPC	Information element
EPC	IoT object
EPC	KPI instance
EPC	Knowledge category
EPC	List
EPC	Location
EPC	Module
EPC	Module type
EPC	Objective
EPC	Operating resource
EPC	Organizational unit
EPC	Organizational unit type
EPC	Package
EPC	Person
EPC	Policy
EPC	Position
EPC	Product/Service
EPC	Questionnaire template
EPC	Relationship type
EPC	Requirement
EPC	Risk
EPC	Role
EPC	Rule

Model type	Object type
EPC	Screen
EPC	Screen design
EPC	Service type
EPC	Socket
EPC	Success factor
EPC	System organizational unit
EPC	System organizational unit type
EPC	Task
EPC	Technical term

### 3.1.60 EPC (column display)

Model type	Object type
EPC (column display)	Application system
EPC (column display)	Application system class
EPC (column display)	Application system type
EPC (column display)	Attribute type group
EPC (column display)	Authorization condition
EPC (column display)	Business object
EPC (column display)	Business rule
EPC (column display)	COT attribute
EPC (column display)	Capability
EPC (column display)	Class
EPC (column display)	Cluster/Data model
EPC (column display)	Complex object type
EPC (column display)	Component
EPC (column display)	Cost category
EPC (column display)	Cost driver
EPC (column display)	Customer touchpoint
EPC (column display)	Documented knowledge

<b>Model type</b>	<b>Object type</b>
EPC (column display)	Draft list
EPC (column display)	ERM attribute
EPC (column display)	Element type
EPC (column display)	Employee variable
EPC (column display)	Entity type
EPC (column display)	Enumeration occurrence
EPC (column display)	Event
EPC (column display)	Function
EPC (column display)	General resource
EPC (column display)	Group
EPC (column display)	Hardware component type
EPC (column display)	IS service
EPC (column display)	IT function
EPC (column display)	IT function type
EPC (column display)	Information carrier
EPC (column display)	KPI instance
EPC (column display)	Knowledge category
EPC (column display)	List
EPC (column display)	Location
EPC (column display)	Module
EPC (column display)	Module type
EPC (column display)	Objective
EPC (column display)	Operating resource
EPC (column display)	Organizational unit

### 3.1.61 EPC (horizontal table display)

Model type	Object type
EPC (horizontal table display)	Application system
EPC (horizontal table display)	Application system class
EPC (horizontal table display)	Application system type
EPC (horizontal table display)	Attribute type group
EPC (horizontal table display)	Authorization condition
EPC (horizontal table display)	Business object
EPC (horizontal table display)	Business rule
EPC (horizontal table display)	COT attribute
EPC (horizontal table display)	Capability
EPC (horizontal table display)	Class
EPC (horizontal table display)	Cluster/Data model
EPC (horizontal table display)	Complex object type
EPC (horizontal table display)	Component

<b>Model type</b>	<b>Object type</b>
EPC (horizontal table display)	Cost category
EPC (horizontal table display)	Cost driver
EPC (horizontal table display)	Customer touchpoint
EPC (horizontal table display)	Documented knowledge
EPC (horizontal table display)	Draft list
EPC (horizontal table display)	ERM attribute
EPC (horizontal table display)	Element type
EPC (horizontal table display)	Employee variable
EPC (horizontal table display)	Entity type
EPC (horizontal table display)	Enumeration occurrence
EPC (horizontal table display)	Event
EPC (horizontal table display)	Function
EPC (horizontal table display)	General resource
EPC (horizontal table display)	Group
EPC (horizontal table display)	Hardware component type
EPC (horizontal table display)	IS service
EPC (horizontal table display)	IT function
EPC (horizontal table display)	IT function type
EPC (horizontal table display)	Information carrier
EPC (horizontal table display)	KPI instance
EPC (horizontal table display)	Knowledge category
EPC (horizontal table display)	List
EPC (horizontal table display)	Location
EPC (horizontal table display)	Module
EPC (horizontal table display)	Module type
EPC (horizontal table display)	Objective
EPC (horizontal table display)	Operating resource
EPC (horizontal table display)	Organizational unit
EPC (horizontal table display)	Organizational unit type
EPC (horizontal table display)	Package

Model type	Object type
EPC (horizontal table display)	Person
EPC (horizontal table display)	Policy
EPC (horizontal table display)	Position
EPC (horizontal table display)	Product/Service
EPC (horizontal table display)	Questionnaire template
EPC (horizontal table display)	Relationship type
EPC (horizontal table display)	Requirement
EPC (horizontal table display)	Risk
EPC (horizontal table display)	Role
EPC (horizontal table display)	Rule
EPC (horizontal table display)	Screen
EPC (horizontal table display)	Screen design
EPC (horizontal table display)	Service type
EPC (horizontal table display)	Socket
EPC (horizontal table display)	System organizational unit
EPC (horizontal table display)	System organizational unit type
EPC (horizontal table display)	Technical term

### 3.1.62 EPC (instance)

Model type	Object type
EPC (instance)	Application system
EPC (instance)	Application system class
EPC (instance)	Application system type
EPC (instance)	COT attribute (instance)
EPC (instance)	Cluster instance
EPC (instance)	Complex object
EPC (instance)	Documented knowledge
EPC (instance)	Draft list
EPC (instance)	ERM attribute instance
EPC (instance)	Employee variable

<b>Model type</b>	<b>Object type</b>
EPC (instance)	Entity
EPC (instance)	Event instance
EPC (instance)	General resource
EPC (instance)	Group
EPC (instance)	Hardware component type
EPC (instance)	IT function
EPC (instance)	IT function type
EPC (instance)	Information carrier
EPC (instance)	Lane
EPC (instance)	List
EPC (instance)	Location
EPC (instance)	Module
EPC (instance)	Module type
EPC (instance)	Operating resource
EPC (instance)	Organizational unit
EPC (instance)	Organizational unit type
EPC (instance)	Person
EPC (instance)	Position
EPC (instance)	Product/Service
EPC (instance)	Relationship
EPC (instance)	Role
EPC (instance)	Rule instance
EPC (instance)	Screen
EPC (instance)	Screen design
EPC (instance)	System organizational unit
EPC (instance)	System organizational unit type
EPC (instance)	Task
EPC (instance)	Technical terms instance
EPC (instance)	Transaction folder

### 3.1.63 EPC (material flow)

Model type	Object type
EPC (material flow)	Application system
EPC (material flow)	Application system class
EPC (material flow)	Application system type
EPC (material flow)	Attribute type group
EPC (material flow)	Authorization condition
EPC (material flow)	Business object
EPC (material flow)	Business rule
EPC (material flow)	COT attribute
EPC (material flow)	Capability
EPC (material flow)	Capability configuration
EPC (material flow)	Class
EPC (material flow)	Cluster/Data model
EPC (material flow)	Complex object type
EPC (material flow)	Component
EPC (material flow)	Cost category
EPC (material flow)	Cost driver
EPC (material flow)	Customer touchpoint
EPC (material flow)	Documented knowledge
EPC (material flow)	Draft list
EPC (material flow)	ERM attribute
EPC (material flow)	Element type
EPC (material flow)	Employee variable
EPC (material flow)	Entity type
EPC (material flow)	Enumeration occurrence
EPC (material flow)	Event
EPC (material flow)	Function
EPC (material flow)	General resource
EPC (material flow)	Group
EPC (material flow)	Hardware component type

<b>Model type</b>	<b>Object type</b>
EPC (material flow)	IS service
EPC (material flow)	IT function
EPC (material flow)	IT function type
EPC (material flow)	Information carrier
EPC (material flow)	Information element
EPC (material flow)	KPI instance
EPC (material flow)	Knowledge category
EPC (material flow)	List
EPC (material flow)	Location
EPC (material flow)	Material type
EPC (material flow)	Module
EPC (material flow)	Module type
EPC (material flow)	Objective
EPC (material flow)	Operating resource
EPC (material flow)	Operating resource type
EPC (material flow)	Organizational unit
EPC (material flow)	Organizational unit type
EPC (material flow)	Package
EPC (material flow)	Packaging material type
EPC (material flow)	Person
EPC (material flow)	Policy
EPC (material flow)	Position
EPC (material flow)	Product/Service
EPC (material flow)	Questionnaire template
EPC (material flow)	Relationship type
EPC (material flow)	Requirement
EPC (material flow)	Risk
EPC (material flow)	Role
EPC (material flow)	Rule
EPC (material flow)	Screen

Model type	Object type
EPC (material flow)	Screen design
EPC (material flow)	Service type
EPC (material flow)	Socket
EPC (material flow)	System organizational unit
EPC (material flow)	System organizational unit type
EPC (material flow)	Technical operating supply
EPC (material flow)	Technical operating supply type
EPC (material flow)	Technical term
EPC (material flow)	Transport system
EPC (material flow)	Transport system type
EPC (material flow)	Warehouse equipment
EPC (material flow)	Warehouse equipment type

### 3.1.64 EPC (row display)

Model type	Object type
EPC (row display)	Application system
EPC (row display)	Application system class
EPC (row display)	Application system type
EPC (row display)	Attribute type group
EPC (row display)	Authorization condition
EPC (row display)	Business object
EPC (row display)	Business rule
EPC (row display)	COT attribute
EPC (row display)	Capability
EPC (row display)	Class
EPC (row display)	Cluster/Data model
EPC (row display)	Complex object type
EPC (row display)	Component
EPC (row display)	Cost category

<b>Model type</b>	<b>Object type</b>
EPC (row display)	Cost driver
EPC (row display)	Customer touchpoint
EPC (row display)	Distribution channel
EPC (row display)	Documented knowledge
EPC (row display)	Draft list
EPC (row display)	ERM attribute
EPC (row display)	Element type
EPC (row display)	Employee variable
EPC (row display)	Entity type
EPC (row display)	Enumeration occurrence
EPC (row display)	Event
EPC (row display)	Function
EPC (row display)	General resource
EPC (row display)	Group
EPC (row display)	Hardware component type
EPC (row display)	IS service
EPC (row display)	IT function
EPC (row display)	IT function type
EPC (row display)	Information carrier
EPC (row display)	KPI instance
EPC (row display)	Knowledge category
EPC (row display)	List
EPC (row display)	Location
EPC (row display)	Module
EPC (row display)	Module type
EPC (row display)	Objective
EPC (row display)	Operating resource
EPC (row display)	Organizational unit
EPC (row display)	Organizational unit type
EPC (row display)	Package

<b>Model type</b>	<b>Object type</b>
EPC (row display)	Person
EPC (row display)	Policy
EPC (row display)	Position
EPC (row display)	Product/Service
EPC (row display)	Questionnaire template
EPC (row display)	Relationship type
EPC (row display)	Requirement
EPC (row display)	Risk
EPC (row display)	Role
EPC (row display)	Rule
EPC (row display)	Screen
EPC (row display)	Screen design
EPC (row display)	Service type
EPC (row display)	Socket
EPC (row display)	System organizational unit
EPC (row display)	System organizational unit type
EPC (row display)	Technical term

### 3.1.65 EPC (table display)

<b>Model type</b>	<b>Object type</b>
EPC (table display)	Application system
EPC (table display)	Application system class
EPC (table display)	Application system type
EPC (table display)	Attribute type group
EPC (table display)	Authorization condition
EPC (table display)	Business object
EPC (table display)	Business rule
EPC (table display)	COT attribute
EPC (table display)	Capability

<b>Model type</b>	<b>Object type</b>
EPC (table display)	Class
EPC (table display)	Cluster/Data model
EPC (table display)	Complex object type
EPC (table display)	Component
EPC (table display)	Cost category
EPC (table display)	Cost driver
EPC (table display)	Customer touchpoint
EPC (table display)	Documented knowledge
EPC (table display)	Draft list
EPC (table display)	ERM attribute
EPC (table display)	Element type
EPC (table display)	Employee variable
EPC (table display)	Entity type
EPC (table display)	Enumeration occurrence
EPC (table display)	Event
EPC (table display)	Function
EPC (table display)	General resource
EPC (table display)	Group
EPC (table display)	Hardware component type
EPC (table display)	IS service
EPC (table display)	IT function
EPC (table display)	IT function type
EPC (table display)	Information carrier
EPC (table display)	KPI instance
EPC (table display)	Knowledge category
EPC (table display)	List
EPC (table display)	Location
EPC (table display)	Module
EPC (table display)	Module type
EPC (table display)	Objective

<b>Model type</b>	<b>Object type</b>
EPC (table display)	Operating resource
EPC (table display)	Organizational unit
EPC (table display)	Organizational unit type
EPC (table display)	Package
EPC (table display)	Person
EPC (table display)	Policy
EPC (table display)	Position
EPC (table display)	Product/Service
EPC (table display)	Questionnaire template
EPC (table display)	Relationship type
EPC (table display)	Requirement
EPC (table display)	Risk
EPC (table display)	Role
EPC (table display)	Rule
EPC (table display)	Screen
EPC (table display)	Screen design
EPC (table display)	Service type
EPC (table display)	Socket
EPC (table display)	System organizational unit
EPC (table display)	System organizational unit type
EPC (table display)	Technical term

### 3.1.66 Event diagram

Model type	Object type
Event diagram	Application system type
Event diagram	Assumption
Event diagram	Business rule
Event diagram	COT attribute
Event diagram	Class
Event diagram	Cluster/Data model
Event diagram	Complex object type
Event diagram	Documented knowledge
Event diagram	ERM attribute
Event diagram	Element type
Event diagram	Entity type
Event diagram	Enumeration occurrence
Event diagram	Event
Event diagram	Gap
Event diagram	General resource
Event diagram	Group
Event diagram	IT function type
Event diagram	Information carrier
Event diagram	KPI instance
Event diagram	Knowledge category
Event diagram	Module type
Event diagram	Organizational unit
Event diagram	Organizational unit type
Event diagram	Person
Event diagram	Policy
Event diagram	Position
Event diagram	Product/Service
Event diagram	Relationship type
Event diagram	Requirement

<b>Model type</b>	<b>Object type</b>
Event diagram	Role
Event diagram	Rule
Event diagram	Screen
Event diagram	Task
Event diagram	Technical term

### 3.1.67 Event diagram (instance)

<b>Model type</b>	<b>Object type</b>
Event diagram (instance)	Event instance

### 3.1.68 Fishbone diagram

<b>Model type</b>	<b>Object type</b>
Fishbone diagram	Quick object

### 3.1.69 Function allocation diagram

Model type	Object type
Function allocation diagram	Application system
Function allocation diagram	Application system class
Function allocation diagram	Application system type
Function allocation diagram	Assumption
Function allocation diagram	Attribute type group
Function allocation diagram	Authorization condition
Function allocation diagram	Business object
Function allocation diagram	Business rule
Function allocation diagram	COT attribute
Function allocation diagram	Capability
Function allocation diagram	Capability configuration
Function allocation diagram	Class
Function allocation diagram	Cluster/Data model
Function allocation diagram	Complex object type
Function allocation diagram	Component
Function allocation diagram	Cost category
Function allocation diagram	Cost driver
Function allocation diagram	Customer touchpoint
Function allocation diagram	Documented knowledge
Function allocation diagram	Draft list
Function allocation diagram	ERM attribute
Function allocation diagram	Element type
Function allocation diagram	Employee variable
Function allocation diagram	Entity type
Function allocation diagram	Enumeration occurrence
Function allocation diagram	Event
Function allocation diagram	Function
Function allocation diagram	Gap
Function allocation diagram	General resource

<b>Model type</b>	<b>Object type</b>
Function allocation diagram	Group
Function allocation diagram	Hardware component type
Function allocation diagram	IS service
Function allocation diagram	IT function
Function allocation diagram	IT function type
Function allocation diagram	Information carrier
Function allocation diagram	Information element
Function allocation diagram	IoT object
Function allocation diagram	KPI instance
Function allocation diagram	Knowledge category
Function allocation diagram	List
Function allocation diagram	Location
Function allocation diagram	Material type
Function allocation diagram	Module
Function allocation diagram	Module type
Function allocation diagram	Objective
Function allocation diagram	Operating resource
Function allocation diagram	Operating resource type
Function allocation diagram	Organizational unit
Function allocation diagram	Organizational unit type
Function allocation diagram	Package
Function allocation diagram	Packaging material type
Function allocation diagram	Person
Function allocation diagram	Policy
Function allocation diagram	Position
Function allocation diagram	Product/Service
Function allocation diagram	Questionnaire template
Function allocation diagram	Relationship type
Function allocation diagram	Requirement
Function allocation diagram	Risk

Model type	Object type
Function allocation diagram	Role
Function allocation diagram	Screen
Function allocation diagram	Screen (Solution Design)
Function allocation diagram	Screen design
Function allocation diagram	Service type
Function allocation diagram	Socket
Function allocation diagram	Success factor
Function allocation diagram	System organizational unit
Function allocation diagram	System organizational unit type
Function allocation diagram	Task
Function allocation diagram	Technical operating supply
Function allocation diagram	Technical operating supply type
Function allocation diagram	Technical term
Function allocation diagram	Transport system
Function allocation diagram	Transport system type
Function allocation diagram	Warehouse equipment
Function allocation diagram	Warehouse equipment type

### 3.1.70 Function mapping

Model type	Object type
Function mapping	Function

### 3.1.71 Function tree

Model type	Object type
Function tree	Function

### 3.1.72 Function/Organizational level diagram

Model type	Object type
Function/Organizational level diagram	Cluster/Data model
Function/Organizational level diagram	Function
Function/Organizational level diagram	Organizational level

### 3.1.73 Functions mapping (SAP Solution Manager)

Model type	Object type
Functions mapping (SAP Solution Manager)	Function

### 3.1.74 IE Data model

Model type	Object type
IE Data model	Class
IE Data model	Cluster/Data model
IE Data model	ERM attribute
IE Data model	Entity type
IE Data model	Generalization type
IE Data model	Information element
IE Data model	Relationship type
IE Data model	Technical term

### 3.1.75 Industrial process

Model type	Object type
Industrial process	Application system type
Industrial process	Business rule
Industrial process	Class
Industrial process	Cluster/Data model
Industrial process	Documented knowledge
Industrial process	ERM attribute
Industrial process	Entity type
Industrial process	Event
Industrial process	Function
Industrial process	General resource
Industrial process	Group
Industrial process	Information carrier
Industrial process	KPI instance
Industrial process	Knowledge category
Industrial process	Location
Industrial process	Material type
Industrial process	Objective
Industrial process	Operating resource type
Industrial process	Organizational unit
Industrial process	Package
Industrial process	Packaging material type
Industrial process	Person
Industrial process	Position
Industrial process	Product/Service
Industrial process	Relationship type
Industrial process	Risk
Industrial process	Role
Industrial process	Rule
Industrial process	Screen

<b>Model type</b>	<b>Object type</b>
Industrial process	Technical operating supply type
Industrial process	Technical term
Industrial process	Transport system type
Industrial process	Warehouse equipment type

### 3.1.76 Information carrier diagram

<b>Model type</b>	<b>Object type</b>
Information carrier diagram	Cluster/Data model
Information carrier diagram	Entity type
Information carrier diagram	Information carrier
Information carrier diagram	Knowledge category
Information carrier diagram	Technical term

### 3.1.77 Information flow diagram

<b>Model type</b>	<b>Object type</b>
Information flow diagram	Function
Information flow diagram	Information flow
Information flow diagram	Organizational unit
Information flow diagram	Organizational unit type
Information flow diagram	System organizational unit
Information flow diagram	System organizational unit type

### 3.1.78 Input/Output diagram

Model type	Object type
Input/Output diagram	Application system
Input/Output diagram	Application system type
Input/Output diagram	Capability configuration
Input/Output diagram	Class
Input/Output diagram	Cluster/Data model
Input/Output diagram	ERM attribute
Input/Output diagram	Entity type
Input/Output diagram	Function
Input/Output diagram	Information carrier
Input/Output diagram	Information element
Input/Output diagram	Organizational unit
Input/Output diagram	Organizational unit type
Input/Output diagram	Participant
Input/Output diagram	Relationship type
Input/Output diagram	Role
Input/Output diagram	System
Input/Output diagram	Technical term

### 3.1.79 Input/Output diagram (inverse)

Model type	Object type
Input/Output diagram (inverse)	Application system
Input/Output diagram (inverse)	Application system type
Input/Output diagram (inverse)	Capability configuration
Input/Output diagram (inverse)	Class
Input/Output diagram (inverse)	Cluster/Data model
Input/Output diagram (inverse)	ERM attribute
Input/Output diagram (inverse)	Entity type
Input/Output diagram (inverse)	Function
Input/Output diagram (inverse)	Information carrier
Input/Output diagram (inverse)	Information element
Input/Output diagram (inverse)	Organizational unit
Input/Output diagram (inverse)	Organizational unit type
Input/Output diagram (inverse)	Participant
Input/Output diagram (inverse)	Relationship type
Input/Output diagram (inverse)	Role
Input/Output diagram (inverse)	System
Input/Output diagram (inverse)	Technical term

### 3.1.80 IoT object context

Model type	Object type
IoT object context	Cluster/Data model
IoT object context	ERM attribute
IoT object context	Event
IoT object context	Function
IoT object context	IoT object
IoT object context	Protocol
IoT object context	Risk

### 3.1.81 IoT object definition

Model type	Object type
IoT object definition	IoT object

### 3.1.82 IT architecture mapping

Model type	Object type
IT architecture mapping	Architecture element
IT architecture mapping	Structural element

### 3.1.83 IT architecture matrix

Model type	Object type
IT architecture matrix	Application system class
IT architecture matrix	Application system type
IT architecture matrix	Architecture element
IT architecture matrix	Cluster/Data model
IT architecture matrix	DBMS type
IT architecture matrix	Function
IT architecture matrix	Hardware component class
IT architecture matrix	Hardware component type
IT architecture matrix	Information carrier
IT architecture matrix	Network class
IT architecture matrix	Network connection class
IT architecture matrix	Network connection type
IT architecture matrix	Network node class
IT architecture matrix	Network node type
IT architecture matrix	Network type
IT architecture matrix	Operating system type
IT architecture matrix	Product/Service
IT architecture matrix	Programming language

<b>Model type</b>	<b>Object type</b>
IT architecture matrix	Protocol
IT architecture matrix	Service type
IT architecture matrix	Structural element
IT architecture matrix	Technical term

### 3.1.84 Knowledge map

<b>Model type</b>	<b>Object type</b>
Knowledge map	Group
Knowledge map	Knowledge category
Knowledge map	Location
Knowledge map	Organizational unit
Knowledge map	Organizational unit type
Knowledge map	Person
Knowledge map	Position
Knowledge map	Role

### 3.1.85 Knowledge structure diagram

<b>Model type</b>	<b>Object type</b>
Knowledge structure diagram	Application system class
Knowledge structure diagram	Application system type
Knowledge structure diagram	Class
Knowledge structure diagram	Cluster/Data model
Knowledge structure diagram	Documented knowledge
Knowledge structure diagram	Entity type
Knowledge structure diagram	Information carrier
Knowledge structure diagram	Knowledge category
Knowledge structure diagram	Object instance
Knowledge structure diagram	Package
Knowledge structure diagram	Relationship type
Knowledge structure diagram	Technical term

### 3.1.86 KPI allocation diagram

Model type	Object type
KPI allocation diagram	Application system
KPI allocation diagram	Application system type
KPI allocation diagram	Assumption
KPI allocation diagram	Business rule
KPI allocation diagram	Class
KPI allocation diagram	Cluster/Data model
KPI allocation diagram	Documented knowledge
KPI allocation diagram	ERM attribute
KPI allocation diagram	Entity type
KPI allocation diagram	Environment
KPI allocation diagram	Function
KPI allocation diagram	Gap
KPI allocation diagram	Group
KPI allocation diagram	Information carrier
KPI allocation diagram	KPI instance
KPI allocation diagram	Knowledge category
KPI allocation diagram	Objective
KPI allocation diagram	Organizational unit
KPI allocation diagram	Organizational unit type
KPI allocation diagram	Person
KPI allocation diagram	Policy
KPI allocation diagram	Position
KPI allocation diagram	Questionnaire template
KPI allocation diagram	Relationship type
KPI allocation diagram	Requirement
KPI allocation diagram	Risk
KPI allocation diagram	Role
KPI allocation diagram	Success factor

Model type	Object type
KPI allocation diagram	Task
KPI allocation diagram	Technical term

### 3.1.87 KPI tree

Model type	Object type
KPI tree	KPI instance

### 3.1.88 Mapping model

Model type	Object type
Mapping model	Attribute
Mapping model	Constant
Mapping model	Context information
Mapping model	Operator

### 3.1.89 Material diagram

Model type	Object type
Material diagram	Material class
Material diagram	Material type
Material diagram	Packaging material class
Material diagram	Packaging material type

### 3.1.90 Material flow diagram

Model type	Object type
Material flow diagram	Function
Material flow diagram	Material flow
Material flow diagram	Organizational unit
Material flow diagram	Organizational unit type

### 3.1.91 Matrix model

Model type	Object type
Matrix model	Action
Matrix model	Activity graph
Matrix model	Actor
Matrix model	Answer option
Matrix model	Application collaboration
Matrix model	Application system
Matrix model	Application system class
Matrix model	Application system type
Matrix model	Architecture element
Matrix model	Argument
Matrix model	Artifact
Matrix model	Assessment
Matrix model	Association
Matrix model	Association class
Matrix model	Association instance
Matrix model	Association role
Matrix model	Assumption
Matrix model	Attribute
Matrix model	Attribute link
Matrix model	Attribute type
Matrix model	Attribute type group
Matrix model	Authorization condition
Matrix model	Bitmap
Matrix model	Break
Matrix model	Business object
Matrix model	Business rule
Matrix model	Business segment
Matrix model	Button
Matrix model	COT attribute

<b>Model type</b>	<b>Object type</b>
Matrix model	COT attribute (instance)
Matrix model	Calendar event
Matrix model	Capability
Matrix model	Capability configuration
Matrix model	Class
Matrix model	Classification criterion
Matrix model	Classifier role
Matrix model	Classifier-in-state
Matrix model	Cluster instance
Matrix model	Cluster/Data model
Matrix model	Collaboration
Matrix model	Collaboration instance set
Matrix model	Column
Matrix model	Combo box
Matrix model	Command
Matrix model	Communication
Matrix model	Complex object
Matrix model	Complex object type
Matrix model	Component
Matrix model	Component instance
Matrix model	Conditional section
Matrix model	Connector
Matrix model	Constant
Matrix model	Constraint
Matrix model	Container
Matrix model	Contents
Matrix model	Contract
Matrix model	Control execution task
Matrix model	Control label
Matrix model	Cost

<b>Model type</b>	<b>Object type</b>
Matrix model	Cost category
Matrix model	Cost driver
Matrix model	Customer journey
Matrix model	Customer journey step
Matrix model	Customer lifecycle stage
Matrix model	Customer segment
Matrix model	Customer touchpoint
Matrix model	DBMS
Matrix model	DBMS type
Matrix model	Data store
Matrix model	Data store object
Matrix model	Data value
Matrix model	Date
Matrix model	Deliverable
Matrix model	Distribution channel
Matrix model	Documented knowledge
Matrix model	Domain
Matrix model	Domain (physical)
Matrix model	Draft list
Matrix model	Driver
Matrix model	ERM attribute
Matrix model	ERM attribute instance
Matrix model	ERM domain
Matrix model	Element
Matrix model	Element type
Matrix model	Emotion
Matrix model	Employee variable
Matrix model	Energy type
Matrix model	Entity
Matrix model	Entity type

<b>Model type</b>	<b>Object type</b>
Matrix model	Enumeration
Matrix model	Enumeration attribute type
Matrix model	Enumeration literal
Matrix model	Enumeration occurrence
Matrix model	Environment
Matrix model	Equipment
Matrix model	Event
Matrix model	Event instance
Matrix model	Exception
Matrix model	Extension point
Matrix model	Facility
Matrix model	Field
Matrix model	Field (specimen)
Matrix model	Fielded capability
Matrix model	Filter object type
Matrix model	Function
Matrix model	Gap

Matrix model	System attribute
Matrix model	System attribute domain
Matrix model	System organizational unit
Matrix model	System organizational unit type
Matrix model	System software
Matrix model	Table
Matrix model	Tables (specimen)
Matrix model	Tag definition
Matrix model	Tagged value
Matrix model	Task
Matrix model	Tech. operating supply class
Matrix model	Technical operating supply
Matrix model	Technical operating supply type
Matrix model	Technical term
Matrix model	Technical terms instance
Matrix model	Technology service
Matrix model	Test definition

<b>Model type</b>	<b>Object type</b>
Matrix model	Text
Matrix model	Text annotation
Matrix model	Text box
Matrix model	Tool
Matrix model	Transformation pattern
Matrix model	Transformation pattern component
Matrix model	Transformation profile
Matrix model	Transport system
Matrix model	Transport system class
Matrix model	Transport system type
Matrix model	Tree control
Matrix model	UML Model
Matrix model	Use case instance
Matrix model	View
Matrix model	View (physical)
Matrix model	Warehouse equipment
Matrix model	Warehouse equipment class
Matrix model	Warehouse equipment type
Matrix model	XOR

### 3.1.92 Network diagram

Model type	Object type
Network diagram	Application system
Network diagram	Application system type
Network diagram	Class
Network diagram	DBMS
Network diagram	Hardware component
Network diagram	Hardware component type
Network diagram	Location
Network diagram	Network
Network diagram	Network class
Network diagram	Network connection
Network diagram	Network connection type
Network diagram	Network node
Network diagram	Network node type
Network diagram	Network type
Network diagram	Operating system
Network diagram	Organizational unit
Network diagram	Person
Network diagram	Position
Network diagram	Risk
Network diagram	Role
Network diagram	Technical term

### 3.1.93 Network topology

Model type	Object type
Network topology	Application system type
Network topology	Architecture element
Network topology	Class
Network topology	DBMS type
Network topology	Group
Network topology	Hardware component class
Network topology	Hardware component type
Network topology	Location
Network topology	Network class
Network topology	Network connection class
Network topology	Network connection type
Network topology	Network node class
Network topology	Network node type
Network topology	Network type
Network topology	Operating system type
Network topology	Organizational unit
Network topology	Person
Network topology	Position
Network topology	Product/Service
Network topology	Protocol
Network topology	Role

### 3.1.94 Objective diagram

Model type	Object type
Objective diagram	Assumption
Objective diagram	Business rule
Objective diagram	Capability
Objective diagram	Function
Objective diagram	Gap
Objective diagram	Objective
Objective diagram	Policy
Objective diagram	Product/Service
Objective diagram	Requirement
Objective diagram	Success factor
Objective diagram	Task

### 3.1.95 Office process

Model type	Object type
Office process	Application system type
Office process	Business rule
Office process	Class
Office process	Cluster/Data model
Office process	Documented knowledge
Office process	ERM attribute
Office process	Entity type
Office process	Event
Office process	Function
Office process	General resource
Office process	Group
Office process	Information carrier
Office process	KPI instance
Office process	Knowledge category

Model type	Object type
Office process	Location
Office process	Objective
Office process	Organizational unit
Office process	Package
Office process	Person
Office process	Position
Office process	Product/Service
Office process	Relationship type
Office process	Risk
Office process	Role
Office process	Rule
Office process	Screen
Office process	Technical term

### 3.1.96 OMT Class description model

Model type	Object type
OMT Class description model	Class
OMT Class description model	ERM attribute
OMT Class description model	Operation

### 3.1.97 OMT Data value decomposition

Model type	Object type
OMT Data value decomposition	Data value

### 3.1.98 OMT Dynamic model

Model type	Object type
OMT Dynamic model	Class
OMT Dynamic model	State

### 3.1.99 OMT Functional model

Model type	Object type
OMT Functional model	Actor
OMT Functional model	Connector
OMT Functional model	Data store
OMT Functional model	Data value
OMT Functional model	Process

### 3.1.100 OMT Object model

Model type	Object type
OMT Object model	Association
OMT Object model	Association instance
OMT Object model	Class
OMT Object model	Constraint
OMT Object model	ERM attribute
OMT Object model	Object instance
OMT Object model	Operation
OMT Object model	Sp./Gen. operator

### 3.1.101 Organizational chart

Model type	Object type
Organizational chart	Group
Organizational chart	Location
Organizational chart	Location type
Organizational chart	Organizational chart
Organizational chart	Organizational unit
Organizational chart	Organizational unit type
Organizational chart	Person
Organizational chart	Position

Model type	Object type
Organizational chart	Role
Organizational chart	System organizational unit
Organizational chart	System organizational unit type

### 3.1.102 PCD

Model type	Object type
PCD	Application system
PCD	Application system class
PCD	Application system type
PCD	Attribute type group
PCD	Authorization condition
PCD	Business object
PCD	Business rule
PCD	COT attribute
PCD	Capability
PCD	Class
PCD	Cluster/Data model
PCD	Complex object type
PCD	Component
PCD	Cost category
PCD	Cost driver
PCD	Documented knowledge
PCD	Draft list
PCD	ERM attribute
PCD	Element type
PCD	Employee variable
PCD	Entity type
PCD	Enumeration occurrence
PCD	Event

<b>Model type</b>	<b>Object type</b>
PCD	Function
PCD	General resource
PCD	Group
PCD	Hardware component type
PCD	IS service
PCD	IT function
PCD	IT function type
PCD	Information carrier
PCD	KPI instance
PCD	Knowledge category
PCD	List
PCD	Location
PCD	Module
PCD	Module type
PCD	Objective
PCD	Operating resource
PCD	Organizational unit
PCD	Organizational unit type
PCD	Package
PCD	Person
PCD	Policy
PCD	Position
PCD	Product/Service
PCD	Relationship type
PCD	Risk
PCD	Role
PCD	Rule
PCD	Screen
PCD	Screen design
PCD	Service type

Model type	Object type
PCD	Socket
PCD	System organizational unit
PCD	System organizational unit type
PCD	Technical term

### 3.1.103 PCD (material flow)

Model type	Object type
PCD (material flow)	Application system
PCD (material flow)	Application system class
PCD (material flow)	Application system type
PCD (material flow)	Attribute type group
PCD (material flow)	Authorization condition
PCD (material flow)	Business object
PCD (material flow)	Business rule
PCD (material flow)	COT attribute
PCD (material flow)	Capability
PCD (material flow)	Class
PCD (material flow)	Cluster/Data model
PCD (material flow)	Complex object type
PCD (material flow)	Component
PCD (material flow)	Cost category
PCD (material flow)	Cost driver
PCD (material flow)	Documented knowledge
PCD (material flow)	Draft list
PCD (material flow)	ERM attribute
PCD (material flow)	Element type
PCD (material flow)	Employee variable
PCD (material flow)	Entity type
PCD (material flow)	Enumeration occurrence

<b>Model type</b>	<b>Object type</b>
PCD (material flow)	Event
PCD (material flow)	Function
PCD (material flow)	General resource
PCD (material flow)	Group
PCD (material flow)	Hardware component type
PCD (material flow)	IS service
PCD (material flow)	IT function
PCD (material flow)	IT function type
PCD (material flow)	Information carrier
PCD (material flow)	KPI instance
PCD (material flow)	Knowledge category
PCD (material flow)	List
PCD (material flow)	Location
PCD (material flow)	Material type
PCD (material flow)	Module
PCD (material flow)	Module type
PCD (material flow)	Objective
PCD (material flow)	Operating resource
PCD (material flow)	Operating resource type
PCD (material flow)	Organizational unit
PCD (material flow)	Organizational unit type
PCD (material flow)	Package
PCD (material flow)	Packaging material type
PCD (material flow)	Person
PCD (material flow)	Policy
PCD (material flow)	Position
PCD (material flow)	Product/Service
PCD (material flow)	Relationship type
PCD (material flow)	Risk
PCD (material flow)	Role

Model type	Object type
PCD (material flow)	Rule
PCD (material flow)	Screen
PCD (material flow)	Screen design
PCD (material flow)	Service type
PCD (material flow)	Socket
PCD (material flow)	System organizational unit
PCD (material flow)	System organizational unit type
PCD (material flow)	Technical operating supply
PCD (material flow)	Technical operating supply type
PCD (material flow)	Technical term
PCD (material flow)	Transport system
PCD (material flow)	Transport system type
PCD (material flow)	Warehouse equipment
PCD (material flow)	Warehouse equipment type

### 3.1.104 PPC

Model type	Object type
PPC	Cluster instance
PPC	Event instance
PPC	General resource
PPC	Operating resource
PPC	Person
PPC	Role
PPC	Rule
PPC	Task

### 3.1.105 Privileges diagram

Model type	Object type
Privileges diagram	Application system type
Privileges diagram	COT attribute
Privileges diagram	Cluster/Data model
Privileges diagram	Complex object type
Privileges diagram	ERM attribute
Privileges diagram	Entity type
Privileges diagram	Function
Privileges diagram	Group
Privileges diagram	IT function type
Privileges diagram	Location
Privileges diagram	Module type
Privileges diagram	Organizational unit
Privileges diagram	Person
Privileges diagram	Position
Privileges diagram	Relationship type
Privileges diagram	Role
Privileges diagram	Technical term

### 3.1.106 Process instantiation model

Model type	Object type
Process instantiation model	Instantiation cycle
Process instantiation model	Instantiation interval
Process instantiation model	Instantiation plan

### 3.1.107 Process schedule

Model type	Object type
Process schedule	Application system
Process schedule	Application system class
Process schedule	Application system type
Process schedule	Attribute type group
Process schedule	Authorization condition
Process schedule	Business object
Process schedule	Business rule
Process schedule	COT attribute
Process schedule	Capability
Process schedule	Class
Process schedule	Cluster/Data model
Process schedule	Complex object type
Process schedule	Component
Process schedule	Cost category
Process schedule	Cost driver
Process schedule	Customer touchpoint
Process schedule	Documented knowledge
Process schedule	Draft list
Process schedule	ERM attribute
Process schedule	Element type
Process schedule	Employee variable
Process schedule	Entity type
Process schedule	Enumeration occurrence
Process schedule	Event
Process schedule	Function
Process schedule	General resource
Process schedule	Group
Process schedule	Hardware component type
Process schedule	IS service

<b>Model type</b>	<b>Object type</b>
Process schedule	IT function
Process schedule	IT function type
Process schedule	Information carrier
Process schedule	KPI instance
Process schedule	Knowledge category
Process schedule	Lane
Process schedule	List
Process schedule	Location
Process schedule	Module
Process schedule	Module type
Process schedule	Objective
Process schedule	Operating resource
Process schedule	Organizational unit
Process schedule	Organizational unit type
Process schedule	Package
Process schedule	Person
Process schedule	Position
Process schedule	Product/Service
Process schedule	Questionnaire template
Process schedule	Relationship type
Process schedule	Risk
Process schedule	Role
Process schedule	Rule
Process schedule	Screen
Process schedule	Screen design
Process schedule	Service type
Process schedule	Socket
Process schedule	System organizational unit
Process schedule	System organizational unit type
Process schedule	Technical term

### 3.1.108 Process selection diagram

Model type	Object type
Process selection diagram	Function
Process selection diagram	Main process
Process selection diagram	Organizational unit

### 3.1.109 Process selection matrix

Model type	Object type
Process selection matrix	Function
Process selection matrix	Main process
Process selection matrix	Organizational unit

### 3.1.110 Process support map

Model type	Object type
Process support map	Application system
Process support map	Application system class
Process support map	Application system type
Process support map	Capability
Process support map	Capability configuration
Process support map	Function
Process support map	Group
Process support map	Location
Process support map	Main process
Process support map	Organizational unit
Process support map	Organizational unit type
Process support map	Person
Process support map	Position

<b>Model type</b>	<b>Object type</b>
Process support map	Process support unit
Process support map	Product/Service
Process support map	Role
Process support map	Service type

### 3.1.111 Product allocation diagram

<b>Model type</b>	<b>Object type</b>
Product allocation diagram	Assumption
Product allocation diagram	Business rule
Product allocation diagram	Class
Product allocation diagram	Cluster/Data model
Product allocation diagram	Distribution channel
Product allocation diagram	Documented knowledge
Product allocation diagram	Entity type
Product allocation diagram	Event
Product allocation diagram	Function
Product allocation diagram	Gap
Product allocation diagram	Group
Product allocation diagram	Information carrier
Product allocation diagram	Knowledge category
Product allocation diagram	Marketing instrument
Product allocation diagram	Need
Product allocation diagram	Objective
Product allocation diagram	Organizational unit
Product allocation diagram	Organizational unit type
Product allocation diagram	Person
Product allocation diagram	Policy
Product allocation diagram	Position
Product allocation diagram	Product/Service

<b>Model type</b>	<b>Object type</b>
Product allocation diagram	Product/Service characteristic
Product allocation diagram	Relationship type
Product allocation diagram	Requirement
Product allocation diagram	Role
Product allocation diagram	Task
Product allocation diagram	Technical term

### 3.1.112 Product selection matrix

<b>Model type</b>	<b>Object type</b>
Product selection matrix	Function
Product selection matrix	Organizational unit
Product selection matrix	Product/Service

### 3.1.113 Product tree

<b>Model type</b>	<b>Object type</b>
Product tree	Product/Service

### 3.1.114 Product/Service exchange diagram

Model type	Object type
Product/Service exchange diagram	Application system type
Product/Service exchange diagram	Assumption
Product/Service exchange diagram	Business rule
Product/Service exchange diagram	Class
Product/Service exchange diagram	Cluster/Data model
Product/Service exchange diagram	Distribution channel
Product/Service exchange diagram	Entity type
Product/Service exchange diagram	Event
Product/Service exchange diagram	Function
Product/Service exchange diagram	Gap
Product/Service exchange diagram	Group
Product/Service exchange diagram	IT function type
Product/Service exchange diagram	Information carrier
Product/Service exchange diagram	Location
Product/Service exchange diagram	Material type
Product/Service exchange diagram	Need
Product/Service exchange diagram	Operating resource type
Product/Service exchange diagram	Organizational unit
Product/Service exchange diagram	Organizational unit type
Product/Service exchange diagram	Packaging material type
Product/Service exchange diagram	Person
Product/Service exchange diagram	Policy
Product/Service exchange diagram	Position
Product/Service exchange diagram	Product/Service
Product/Service exchange diagram	Requirement
Product/Service exchange diagram	Role
Product/Service exchange diagram	Task
Product/Service exchange diagram	Technical operating supply type
Product/Service exchange diagram	Technical term

### 3.1.115 Product/Service exchange diagram (graphic)

Model type	Object type
Product/Service exchange diagram (graphic)	Application system type
Product/Service exchange diagram (graphic)	Event
Product/Service exchange diagram (graphic)	Function
Product/Service exchange diagram (graphic)	Group
Product/Service exchange diagram (graphic)	Location
Product/Service exchange diagram (graphic)	Material type
Product/Service exchange diagram (graphic)	Operating resource type
Product/Service exchange diagram (graphic)	Organizational unit
Product/Service exchange diagram (graphic)	Organizational unit type
Product/Service exchange diagram (graphic)	Packaging material type
Product/Service exchange diagram (graphic)	Person
Product/Service exchange diagram (graphic)	Position
Product/Service exchange diagram (graphic)	Product/Service
Product/Service exchange diagram (graphic)	Role
Product/Service exchange diagram (graphic)	Technical operating supply type

### 3.1.116 Product/Service tree

Model type	Object type
Product/Service tree	Function
Product/Service tree	Group
Product/Service tree	Location
Product/Service tree	Objective
Product/Service tree	Organizational unit
Product/Service tree	Organizational unit type
Product/Service tree	Person
Product/Service tree	Position
Product/Service tree	Product/Service
Product/Service tree	Role

### 3.1.117 Product/Service tree (graphic)

Model type	Object type
Product/Service tree (graphic)	Function
Product/Service tree (graphic)	Group
Product/Service tree (graphic)	Location
Product/Service tree (graphic)	Objective
Product/Service tree (graphic)	Organizational unit
Product/Service tree (graphic)	Organizational unit type
Product/Service tree (graphic)	Person
Product/Service tree (graphic)	Position
Product/Service tree (graphic)	Product/Service
Product/Service tree (graphic)	Role

### 3.1.118 Program flow chart (PF)

Model type	Object type
Program flow chart (PF)	Event
Program flow chart (PF)	Function
Program flow chart (PF)	Loop start
Program flow chart (PF)	Rule

### 3.1.119 Project schedule

Model type	Object type
Project schedule	Application system
Project schedule	Application system type
Project schedule	Capability
Project schedule	Capability configuration
Project schedule	Cluster instance
Project schedule	ERM attribute instance
Project schedule	Entity
Project schedule	Event instance
Project schedule	Group
Project schedule	IT function
Project schedule	IT function type
Project schedule	Information carrier
Project schedule	KPI instance
Project schedule	Lane
Project schedule	Location
Project schedule	Module
Project schedule	Module type
Project schedule	Objective
Project schedule	Organizational unit
Project schedule	Organizational unit type
Project schedule	Person
Project schedule	Position
Project schedule	Product/Service
Project schedule	Questionnaire template
Project schedule	Relationship
Project schedule	Role
Project schedule	Rule instance
Project schedule	System organizational unit
Project schedule	System organizational unit type

Model type	Object type
Project schedule	Task
Project schedule	Technical terms instance

### 3.1.120 Questionnaire template allocations

Model type	Object type
Questionnaire template allocations	Application system type
Questionnaire template allocations	Function
Questionnaire template allocations	Organizational unit
Questionnaire template allocations	Policy
Questionnaire template allocations	Questionnaire template
Questionnaire template allocations	Risk
Questionnaire template allocations	Risk category
Questionnaire template allocations	Role
Questionnaire template allocations	Survey task
Questionnaire template allocations	Task
Questionnaire template allocations	Technical term
Questionnaire template allocations	Test definition

### 3.1.121 Quick model

Model type	Object type
Quick model	Quick object

### 3.1.122 RAD

Model type	Object type
RAD	Role
RAD	Screen

### 3.1.123 RAMS

Model type	Object type
RAMS	Entity type
RAMS	Function
RAMS	Main process
RAMS	Organizational unit

### 3.1.124 Relations diagram

Model type	Object type
Relations diagram	Attribute
Relations diagram	Cluster/Data model
Relations diagram	Domain
Relations diagram	ERM attribute
Relations diagram	ERM domain
Relations diagram	Entity type
Relations diagram	Relation
Relations diagram	Relationship type
Relations diagram	View

### 3.1.125 Requirement allocation diagram

Model type	Object type
Requirement allocation diagram	Application system
Requirement allocation diagram	Application system class
Requirement allocation diagram	Application system type
Requirement allocation diagram	Architecture element
Requirement allocation diagram	Attribute type group
Requirement allocation diagram	Business rule
Requirement allocation diagram	Capability
Requirement allocation diagram	Cluster/Data model
Requirement allocation diagram	Component
Requirement allocation diagram	Documented knowledge
Requirement allocation diagram	ERM attribute
Requirement allocation diagram	Enumeration
Requirement allocation diagram	Enumeration occurrence
Requirement allocation diagram	Function
Requirement allocation diagram	Generalization type
Requirement allocation diagram	Group
Requirement allocation diagram	Hardware component
Requirement allocation diagram	Hardware component class
Requirement allocation diagram	Hardware component type
Requirement allocation diagram	IT function type
Requirement allocation diagram	Information carrier
Requirement allocation diagram	KPI instance
Requirement allocation diagram	Knowledge category
Requirement allocation diagram	Main process
Requirement allocation diagram	Network
Requirement allocation diagram	Network class
Requirement allocation diagram	Network connection
Requirement allocation diagram	Network connection class
Requirement allocation diagram	Network connection type

<b>Model type</b>	<b>Object type</b>
Requirement allocation diagram	Network node
Requirement allocation diagram	Network node class
Requirement allocation diagram	Network node type
Requirement allocation diagram	Network type
Requirement allocation diagram	Objective
Requirement allocation diagram	Organizational unit
Requirement allocation diagram	Person
Requirement allocation diagram	Relationship type
Requirement allocation diagram	Requirement
Requirement allocation diagram	Risk
Requirement allocation diagram	Rule
Requirement allocation diagram	Screen
Requirement allocation diagram	Screen design
Requirement allocation diagram	Service type
Requirement allocation diagram	Structural element
Requirement allocation diagram	Technical term

### 3.1.126 Requirements tree

<b>Model type</b>	<b>Object type</b>
Requirements tree	Objective
Requirements tree	Requirement

### 3.1.127 Risk diagram

<b>Model type</b>	<b>Object type</b>
Risk diagram	Risk
Risk diagram	Risk category

### 3.1.128 Role diagram

Model type	Object type
Role diagram	Authorization condition
Role diagram	Function
Role diagram	Group
Role diagram	Knowledge category
Role diagram	Location
Role diagram	Organizational unit
Role diagram	Organizational unit type
Role diagram	Person
Role diagram	Position
Role diagram	Role
Role diagram	Technical term

### 3.1.129 Rule diagram

Model type	Object type
Rule diagram	Event
Rule diagram	Function
Rule diagram	Rule

### 3.1.130 SAP ALE filter model

Model type	Object type
SAP ALE filter model	Filter object type
SAP ALE filter model	Function

### 3.1.131 SAP ALE function model

Model type	Object type
SAP ALE function model	Function

### 3.1.132 SAP ALE message flow model

Model type	Object type
SAP ALE message flow model	Function
SAP ALE message flow model	Message

### 3.1.133 SAP ALE message type model

Model type	Object type
SAP ALE message type model	Message type

### 3.1.134 SAP applications diagram

Model type	Object type
SAP applications diagram	Function

### 3.1.135 SAP functions mapping (SAP Solution Manager)

Model type	Object type
SAP functions mapping (SAP Solution Manager)	Function

### 3.1.136 SAP integration process (XI)

Model type	Object type
SAP integration process (XI)	Event
SAP integration process (XI)	Function
SAP integration process (XI)	Loop start
SAP integration process (XI)	Rule

### 3.1.137 SAP NetWeaver Business Warehouse data flow model

Model type	Object type
SAP NetWeaver Business Warehouse data flow model	Application system
SAP NetWeaver Business Warehouse data flow model	Cluster/Data model
SAP NetWeaver Business Warehouse data flow model	Data store object
SAP NetWeaver Business Warehouse data flow model	Entity type
SAP NetWeaver Business Warehouse data flow model	Function
SAP NetWeaver Business Warehouse data flow model	Module
SAP NetWeaver Business Warehouse data flow model	Organizational unit
SAP NetWeaver Business Warehouse data flow model	Role
SAP NetWeaver Business Warehouse data flow model	Structural element
SAP NetWeaver Business Warehouse data flow model	Technical term

### 3.1.138 SAP NetWeaver Business Warehouse mapping multi provider

Model type	Object type
SAP NetWeaver Business Warehouse mapping multi provider	Cluster/Data model
SAP NetWeaver Business Warehouse mapping multi provider	Data store object
SAP NetWeaver Business Warehouse mapping multi provider	Entity type

### 3.1.139 SAP NetWeaver Business Warehouse structure

Model type	Object type
SAP NetWeaver Business Warehouse structure	Cluster/Data model
SAP NetWeaver Business Warehouse structure	Data store object
SAP NetWeaver Business Warehouse structure	Entity type

### 3.1.140 SAP NetWeaver Business Warehouse transformation

Model type	Object type
SAP NetWeaver Business Warehouse transformation	Application system
SAP NetWeaver Business Warehouse transformation	Cluster/Data model
SAP NetWeaver Business Warehouse transformation	Data store object
SAP NetWeaver Business Warehouse transformation	Entity type
SAP NetWeaver Business Warehouse transformation	Function
SAP NetWeaver Business Warehouse transformation	Structural element

### 3.1.141 SAP SERM

Model type	Object type
SAP SERM	Business object
SAP SERM	Cluster/Data model
SAP SERM	ERM attribute
SAP SERM	Entity type
SAP SERM	Generalization type

### 3.1.142 SAP Solutions allocation diagram

Model type	Object type
SAP Solutions allocation diagram	Cluster/Data model
SAP Solutions allocation diagram	Entity type
SAP Solutions allocation diagram	Information carrier
SAP Solutions allocation diagram	Organizational unit
SAP Solutions allocation diagram	Position
SAP Solutions allocation diagram	Role
SAP Solutions allocation diagram	Screen
SAP Solutions allocation diagram	System organizational unit
SAP Solutions allocation diagram	System organizational unit type

### 3.1.143 SAP Solutions organizational elements mapping

Model type	Object type
SAP Solutions organizational elements mapping	Group
SAP Solutions organizational elements mapping	Organizational unit
SAP Solutions organizational elements mapping	Organizational unit type
SAP Solutions organizational elements mapping	Person
SAP Solutions organizational elements mapping	Position
SAP Solutions organizational elements mapping	Role
SAP Solutions organizational elements mapping	Screen
SAP Solutions organizational elements mapping	System organizational unit

### 3.1.144 Schedule

Model type	Object type
Schedule	Calendar event

### 3.1.145 Screen design

Model type	Object type
Screen design	Application system type
Screen design	Attribute link
Screen design	Attribute type group
Screen design	Bitmap
Screen design	Business object
Screen design	Business rule
Screen design	Button
Screen design	COT attribute
Screen design	Class
Screen design	Cluster/Data model
Screen design	Combo box

<b>Model type</b>	<b>Object type</b>
Screen design	ERM attribute
Screen design	Element type
Screen design	Entity type
Screen design	Enumeration
Screen design	Enumeration literal
Screen design	Enumeration occurrence
Screen design	Event
Screen design	Function
Screen design	IT function type
Screen design	List control
Screen design	Object instance
Screen design	Package
Screen design	Panel
Screen design	Parameter
Screen design	Product/Service
Screen design	Radio button/Check box
Screen design	Relationship type
Screen design	Requirement
Screen design	Screen table
Screen design	Spin box
Screen design	Technical term
Screen design	Text
Screen design	Text box
Screen design	Tree control

### 3.1.146 Screen design (Solution Design)

Model type	Object type
Screen design (Solution Design)	Application system type
Screen design (Solution Design)	Cluster/Data model
Screen design (Solution Design)	Command
Screen design (Solution Design)	Container
Screen design (Solution Design)	Control label
Screen design (Solution Design)	Date
Screen design (Solution Design)	ERM attribute
Screen design (Solution Design)	Entity type
Screen design (Solution Design)	Header
Screen design (Solution Design)	IT function type
Screen design (Solution Design)	Icon
Screen design (Solution Design)	Input group
Screen design (Solution Design)	Label container
Screen design (Solution Design)	List
Screen design (Solution Design)	Option
Screen design (Solution Design)	Output text
Screen design (Solution Design)	Table
Screen design (Solution Design)	Text

### 3.1.147 Screen diagram

Model type	Object type
Screen diagram	Bitmap
Screen diagram	COT attribute
Screen diagram	Cluster/Data model
Screen diagram	Column
Screen diagram	Complex object type
Screen diagram	ERM attribute
Screen diagram	Entity type

Model type	Object type
Screen diagram	IT function type
Screen diagram	Layout
Screen diagram	Page
Screen diagram	Parameter
Screen diagram	Screen
Screen diagram	Screen table
Screen diagram	Section
Screen diagram	Separator
Screen diagram	Text

### 3.1.148 Screen navigation

Model type	Object type
Screen navigation	Attribute link
Screen navigation	Bitmap
Screen navigation	Button
Screen navigation	Combo box
Screen navigation	Event
Screen navigation	List control
Screen navigation	Object instance
Screen navigation	Panel
Screen navigation	Product/Service
Screen navigation	Radio button/Check box
Screen navigation	Role
Screen navigation	Rule
Screen navigation	Screen
Screen navigation	Spin box
Screen navigation	Text
Screen navigation	Text box
Screen navigation	Tree control

### 3.1.149 SeDaM model

Model type	Object type
SeDaM model	Attribute type group
SeDaM model	Cluster/Data model
SeDaM model	ERM attribute
SeDaM model	Entity type
SeDaM model	Generalization type

### 3.1.150 Service allocation diagram

Model type	Object type
Service allocation diagram	Application system class
Service allocation diagram	Application system type
Service allocation diagram	Architecture element
Service allocation diagram	Assumption
Service allocation diagram	Business rule
Service allocation diagram	Capability
Service allocation diagram	Capability configuration
Service allocation diagram	Class
Service allocation diagram	Cluster/Data model
Service allocation diagram	Contract
Service allocation diagram	ERM attribute
Service allocation diagram	Entity type
Service allocation diagram	Environment
Service allocation diagram	Event instance
Service allocation diagram	Function
Service allocation diagram	Gap
Service allocation diagram	Group
Service allocation diagram	Hardware component type
Service allocation diagram	IS service
Service allocation diagram	IT function type
Service allocation diagram	Information carrier

<b>Model type</b>	<b>Object type</b>
Service allocation diagram	KPI instance
Service allocation diagram	Knowledge category
Service allocation diagram	Location
Service allocation diagram	Objective
Service allocation diagram	Operating resource type
Service allocation diagram	Organizational unit
Service allocation diagram	Organizational unit type
Service allocation diagram	Person
Service allocation diagram	Policy
Service allocation diagram	Position
Service allocation diagram	Product/Service
Service allocation diagram	Relationship type
Service allocation diagram	Requirement
Service allocation diagram	Role
Service allocation diagram	Service type
Service allocation diagram	Socket
Service allocation diagram	Table
Service allocation diagram	Task
Service allocation diagram	Technical term

### 3.1.151 Service architecture diagram

<b>Model type</b>	<b>Object type</b>
Service architecture diagram	Capability
Service architecture diagram	IS service
Service architecture diagram	Service type

### 3.1.152 Service architecture diagram (column display)

Model type	Object type
Service architecture diagram (column display)	Capability
Service architecture diagram (column display)	IS service
Service architecture diagram (column display)	Service type

### 3.1.153 Service collaboration diagram

Model type	Object type
Service collaboration diagram	Application system class
Service collaboration diagram	Application system type
Service collaboration diagram	Architecture element
Service collaboration diagram	Assumption
Service collaboration diagram	Business rule
Service collaboration diagram	Capability
Service collaboration diagram	Capability configuration
Service collaboration diagram	Class
Service collaboration diagram	Cluster/Data model
Service collaboration diagram	Contract
Service collaboration diagram	ERM attribute
Service collaboration diagram	Entity type
Service collaboration diagram	Event
Service collaboration diagram	Function
Service collaboration diagram	Gap
Service collaboration diagram	Group
Service collaboration diagram	IS service
Service collaboration diagram	IT function type
Service collaboration diagram	Information carrier
Service collaboration diagram	List
Service collaboration diagram	Location
Service collaboration diagram	Operating resource type

Model type	Object type
Service collaboration diagram	Organizational unit
Service collaboration diagram	Organizational unit type
Service collaboration diagram	Person
Service collaboration diagram	Policy
Service collaboration diagram	Port
Service collaboration diagram	Position
Service collaboration diagram	Protocol
Service collaboration diagram	Relationship type
Service collaboration diagram	Requirement
Service collaboration diagram	Role
Service collaboration diagram	Rule
Service collaboration diagram	Screen
Service collaboration diagram	Service type
Service collaboration diagram	Socket
Service collaboration diagram	Table
Service collaboration diagram	Task
Service collaboration diagram	Technical term

### 3.1.154 Shift calendar

Model type	Object type
Shift calendar	Break
Shift calendar	Shift
Shift calendar	Shift cycle
Shift calendar	Shift plan

### 3.1.155 SIPOC

Model type	Object type
SIPOC	Cluster/Data model
SIPOC	Function
SIPOC	Information carrier
SIPOC	Organizational unit
SIPOC	Organizational unit type
SIPOC	Person
SIPOC	Position
SIPOC	Role
SIPOC	System organizational unit
SIPOC	System organizational unit type
SIPOC	Technical term

### 3.1.156 Spreadsheet

Model type	Object type
Spreadsheet	Action
Spreadsheet	Activity graph
Spreadsheet	Actor
Spreadsheet	Answer option
Spreadsheet	Application collaboration
Spreadsheet	Application system
Spreadsheet	Application system class
Spreadsheet	Application system type
Spreadsheet	Architecture element
Spreadsheet	Argument
Spreadsheet	Artifact
Spreadsheet	Assessment
Spreadsheet	Association
Spreadsheet	Association class

<b>Model type</b>	<b>Object type</b>
Spreadsheet	Association instance
Spreadsheet	Association role
Spreadsheet	Assumption
Spreadsheet	Attribute
Spreadsheet	Attribute link
Spreadsheet	Attribute type
Spreadsheet	Attribute type group
Spreadsheet	Authorization condition
Spreadsheet	Base ArisElement
Spreadsheet	Bitmap
Spreadsheet	Break
Spreadsheet	Business object
Spreadsheet	Business rule
Spreadsheet	Business segment
Spreadsheet	Button
Spreadsheet	COT attribute
Spreadsheet	COT attribute (instance)
Spreadsheet	Calendar event
Spreadsheet	Capability
Spreadsheet	Capability configuration
Spreadsheet	Class
Spreadsheet	Classification criterion
Spreadsheet	Classifier role
Spreadsheet	Classifier-in-state
Spreadsheet	Cluster instance
Spreadsheet	Cluster/Data model
Spreadsheet	Collaboration
Spreadsheet	Collaboration instance set
Spreadsheet	Column
Spreadsheet	Combo box

<b>Model type</b>	<b>Object type</b>
Spreadsheet	Command
Spreadsheet	Communication
Spreadsheet	Complex object
Spreadsheet	Complex object type
Spreadsheet	Component
Spreadsheet	Component instance
Spreadsheet	Conditional section
Spreadsheet	Connector
Spreadsheet	Constant
Spreadsheet	Constraint
Spreadsheet	Container
Spreadsheet	Contents
Spreadsheet	Context information
Spreadsheet	Contract
Spreadsheet	Control execution task
Spreadsheet	Control label
Spreadsheet	Conversation
Spreadsheet	Cost
Spreadsheet	Cost category
Spreadsheet	Cost driver
Spreadsheet	Customer journey
Spreadsheet	Customer journey step
Spreadsheet	Customer lifecycle stage
Spreadsheet	Customer segment
Spreadsheet	Customer touchpoint
Spreadsheet	DBMS
Spreadsheet	DBMS type
Spreadsheet	Data store
Spreadsheet	Data store object
Spreadsheet	Data value

<b>Model type</b>	<b>Object type</b>
Spreadsheet	Date
Spreadsheet	Deliverable
Spreadsheet	Distribution channel
Spreadsheet	Documented knowledge
Spreadsheet	Domain
Spreadsheet	Domain (physical)
Spreadsheet	Draft list
Spreadsheet	Driver
Spreadsheet	ERM attribute
Spreadsheet	ERM attribute instance
Spreadsheet	ERM domain
Spreadsheet	Element
Spreadsheet	Element type
Spreadsheet	Emotion
Spreadsheet	Employee variable
Spreadsheet	Energy type
Spreadsheet	Entity
Spreadsheet	Entity type
Spreadsheet	Enumeration
Spreadsheet	Enumeration attribute type
Spreadsheet	Enumeration literal
Spreadsheet	Enumeration occurrence
Spreadsheet	Environment
Spreadsheet	Equipment
Spreadsheet	Event
Spreadsheet	Event instance
Spreadsheet	Exception
Spreadsheet	Extension point
Spreadsheet	Facility
Spreadsheet	Field

<b>Model type</b>	<b>Object type</b>
Spreadsheet	Field (specimen)
Spreadsheet	Fielded capability
Spreadsheet	Filter object type
Spreadsheet	Function
Spreadsheet	Gap
Spreadsheet	Gate
Spreadsheet	General resource
Spreadsheet	Generalization type
Spreadsheet	Graphical user interface type
Spreadsheet	Group
Spreadsheet	Hardware component
Spreadsheet	Hardware component class
Spreadsheet	Hardware component type
Spreadsheet	Hazard
Spreadsheet	Header
Spreadsheet	IS service
Spreadsheet	IT function
Spreadsheet	IT function class
Spreadsheet	IT function type
Spreadsheet	Icon
Spreadsheet	Improvement potential
Spreadsheet	Index
Spreadsheet	Information carrier
Spreadsheet	Information element
Spreadsheet	Information flow
Spreadsheet	Input group
Spreadsheet	Instantiation cycle
Spreadsheet	Instantiation interval
Spreadsheet	Instantiation plan
Spreadsheet	Interaction instance set

<b>Model type</b>	<b>Object type</b>
Spreadsheet	IoT object
Spreadsheet	KPI instance
Spreadsheet	Knowledge category
Spreadsheet	Label container
Spreadsheet	Lane
Spreadsheet	Layout
Spreadsheet	Link object
Spreadsheet	List
Spreadsheet	List control
Spreadsheet	Location
Spreadsheet	Location type
Spreadsheet	Loop start
Spreadsheet	Main process
Spreadsheet	Marketing instrument
Spreadsheet	Material class
Spreadsheet	Material flow

### 3.1.157 Strategy allocation diagram

Model type	Object type
Strategy allocation diagram	Business rule
Strategy allocation diagram	Function
Strategy allocation diagram	Policy
Strategy allocation diagram	Product/Service
Strategy allocation diagram	Risk
Strategy allocation diagram	Strategy

### 3.1.158 Strategy diagram

Model type	Object type
Strategy diagram	Function
Strategy diagram	Objective
Strategy diagram	Risk
Strategy diagram	Strategy

### 3.1.159 Structuring model

Model type	Object type
Structuring model	Structural element

### 3.1.160 Survey management

Model type	Object type
Survey management	Answer option
Survey management	Option set
Survey management	Question
Survey management	Questionnaire template
Survey management	Section

### 3.1.161 Swimlane tree

Model type	Object type
Swimlane tree	Lane
Swimlane tree	Participant

### 3.1.162 SWOT diagram

Model type	Object type
SWOT diagram	Assessment
SWOT diagram	Success factor

### 3.1.163 System attribute domain

Model type	Object type
System attribute domain	System attribute domain

### 3.1.164 System attributes

Model type	Object type
System attributes	System attribute

### 3.1.165 System environment

Model type	Object type
System environment	Application system type
System environment	Business rule
System environment	Capability
System environment	Capability configuration
System environment	Class
System environment	Cluster/Data model
System environment	Energy type

<b>Model type</b>	<b>Object type</b>
System environment	Environment
System environment	Event instance
System environment	Fielded capability
System environment	Function
System environment	Hardware component
System environment	Hardware component type
System environment	IS service
System environment	Information element
System environment	KPI instance
System environment	Knowledge category
System environment	Location
System environment	Location type
System environment	Material flow
System environment	Network connection type
System environment	Network node
System environment	Network node type
System environment	Network type
System environment	Objective
System environment	Operating resource type
System environment	Organizational unit
System environment	Organizational unit type
System environment	Participant
System environment	Port
System environment	Position
System environment	Protocol
System environment	Role
System environment	Service type
System environment	Structural element
System environment	System
System environment	Task

### 3.1.166 Table diagram

Model type	Object type
Table diagram	Application system type
Table diagram	Attribute
Table diagram	Domain
Table diagram	Domain (physical)
Table diagram	ERM attribute
Table diagram	Entity type
Table diagram	Field
Table diagram	Field (specimen)
Table diagram	Index

TOGAF diagram	Requirement
TOGAF diagram	Role
TOGAF diagram	Service type
TOGAF diagram	Structural element
TOGAF diagram	Task

### 3.1.171 Transformation

<b>Model type</b>	<b>Object type</b>
Transformation	Structural element
Transformation	Transformation pattern
Transformation	Transformation pattern component
Transformation	Transformation profile

### 3.1.172 Transformation profile model

<b>Model type</b>	<b>Object type</b>
Transformation profile model	Structural element
Transformation profile model	Transformation pattern
Transformation profile model	Transformation profile

### 3.1.173 UML 1.4 Activity diagram

Model type	Object type
UML 1.4 Activity diagram	Action
UML 1.4 Activity diagram	Activity graph
UML 1.4 Activity diagram	Application system type
UML 1.4 Activity diagram	Argument
UML 1.4 Activity diagram	Association
UML 1.4 Activity diagram	Association class
UML 1.4 Activity diagram	Class
UML 1.4 Activity diagram	Classifier-in-state
UML 1.4 Activity diagram	Constraint
UML 1.4 Activity diagram	ERM attribute
UML 1.4 Activity diagram	Event
UML 1.4 Activity diagram	Exception
UML 1.4 Activity diagram	Function
UML 1.4 Activity diagram	Group
UML 1.4 Activity diagram	KPI instance
UML 1.4 Activity diagram	Note
UML 1.4 Activity diagram	Object instance
UML 1.4 Activity diagram	Organizational unit
UML 1.4 Activity diagram	Package
UML 1.4 Activity diagram	Parameter
UML 1.4 Activity diagram	Partition
UML 1.4 Activity diagram	Person
UML 1.4 Activity diagram	Position
UML 1.4 Activity diagram	Product/Service
UML 1.4 Activity diagram	Role
UML 1.4 Activity diagram	Rule
UML 1.4 Activity diagram	Signal
UML 1.4 Activity diagram	Stereotype
UML 1.4 Activity diagram	Tag definition

Model type	Object type
UML 1.4 Activity diagram	Tagged value
UML 1.4 Activity diagram	UML Model

### 3.1.174 UML 1.4 Class description diagram

Model type	Object type
UML 1.4 Class description diagram	Association class
UML 1.4 Class description diagram	Class
UML 1.4 Class description diagram	Constraint
UML 1.4 Class description diagram	ERM attribute
UML 1.4 Class description diagram	Function
UML 1.4 Class description diagram	Note
UML 1.4 Class description diagram	Object instance
UML 1.4 Class description diagram	Parameter
UML 1.4 Class description diagram	Technical term

### 3.1.175 UML 1.4 Class diagram

Model type	Object type
UML 1.4 Class diagram	Action
UML 1.4 Class diagram	Activity graph
UML 1.4 Class diagram	Argument
UML 1.4 Class diagram	Association
UML 1.4 Class diagram	Association class
UML 1.4 Class diagram	Association instance
UML 1.4 Class diagram	Association role
UML 1.4 Class diagram	Attribute link
UML 1.4 Class diagram	Class
UML 1.4 Class diagram	Classifier role
UML 1.4 Class diagram	Collaboration

<b>Model type</b>	<b>Object type</b>
UML 1.4 Class diagram	Collaboration instance set
UML 1.4 Class diagram	Constraint
UML 1.4 Class diagram	Data value
UML 1.4 Class diagram	ERM attribute
UML 1.4 Class diagram	Enumeration literal
UML 1.4 Class diagram	Exception
UML 1.4 Class diagram	Function
UML 1.4 Class diagram	Interaction instance set
UML 1.4 Class diagram	Link object
UML 1.4 Class diagram	Note
UML 1.4 Class diagram	Object instance
UML 1.4 Class diagram	Package
UML 1.4 Class diagram	Parameter
UML 1.4 Class diagram	Profile
UML 1.4 Class diagram	Reception
UML 1.4 Class diagram	Signal
UML 1.4 Class diagram	State machine
UML 1.4 Class diagram	Stereotype
UML 1.4 Class diagram	Subsystem
UML 1.4 Class diagram	Subsystem instance
UML 1.4 Class diagram	Tag definition
UML 1.4 Class diagram	Tagged value
UML 1.4 Class diagram	UML Model
UML 1.4 Class diagram	Use case instance

### 3.1.176 UML 1.4 Collaboration diagram

Model type	Object type
UML 1.4 Collaboration diagram	Association class
UML 1.4 Collaboration diagram	Association instance
UML 1.4 Collaboration diagram	Association role
UML 1.4 Collaboration diagram	Attribute link
UML 1.4 Collaboration diagram	Class
UML 1.4 Collaboration diagram	Classifier role
UML 1.4 Collaboration diagram	Collaboration instance set
UML 1.4 Collaboration diagram	Constraint
UML 1.4 Collaboration diagram	ERM attribute
UML 1.4 Collaboration diagram	Interaction instance set
UML 1.4 Collaboration diagram	Link object
UML 1.4 Collaboration diagram	Note
UML 1.4 Collaboration diagram	Object instance
UML 1.4 Collaboration diagram	Stereotype
UML 1.4 Collaboration diagram	Tag definition
UML 1.4 Collaboration diagram	Tagged value

### 3.1.177 UML 1.4 Component diagram

Model type	Object type
UML 1.4 Component diagram	Artifact
UML 1.4 Component diagram	Association
UML 1.4 Component diagram	Association class
UML 1.4 Component diagram	Class
UML 1.4 Component diagram	Component
UML 1.4 Component diagram	Constraint
UML 1.4 Component diagram	Data value
UML 1.4 Component diagram	Enumeration literal
UML 1.4 Component diagram	Exception

Model type	Object type
UML 1.4 Component diagram	Function
UML 1.4 Component diagram	Link object
UML 1.4 Component diagram	Note
UML 1.4 Component diagram	Object instance
UML 1.4 Component diagram	Package
UML 1.4 Component diagram	Parameter
UML 1.4 Component diagram	Reception
UML 1.4 Component diagram	Signal
UML 1.4 Component diagram	Stereotype
UML 1.4 Component diagram	Tag definition
UML 1.4 Component diagram	Tagged value
UML 1.4 Component diagram	UML Model

### 3.1.178 UML 1.4 Deployment diagram

Model type	Object type
UML 1.4 Deployment diagram	Artifact
UML 1.4 Deployment diagram	Association
UML 1.4 Deployment diagram	Association class
UML 1.4 Deployment diagram	Association instance
UML 1.4 Deployment diagram	Class
UML 1.4 Deployment diagram	Collaboration instance set
UML 1.4 Deployment diagram	Component
UML 1.4 Deployment diagram	Component instance
UML 1.4 Deployment diagram	Constraint
UML 1.4 Deployment diagram	ERM attribute
UML 1.4 Deployment diagram	Function
UML 1.4 Deployment diagram	Hardware component
UML 1.4 Deployment diagram	Hardware component type
UML 1.4 Deployment diagram	Note

Model type	Object type
UML 1.4 Deployment diagram	Object instance
UML 1.4 Deployment diagram	Package
UML 1.4 Deployment diagram	Reception
UML 1.4 Deployment diagram	Stereotype
UML 1.4 Deployment diagram	Tag definition
UML 1.4 Deployment diagram	Tagged value
UML 1.4 Deployment diagram	UML Model

### 3.1.179 UML 1.4 Sequence diagram

Model type	Object type
UML 1.4 Sequence diagram	Action
UML 1.4 Sequence diagram	Association instance
UML 1.4 Sequence diagram	Association role
UML 1.4 Sequence diagram	Classifier role
UML 1.4 Sequence diagram	Collaboration instance set
UML 1.4 Sequence diagram	Constraint
UML 1.4 Sequence diagram	Data value
UML 1.4 Sequence diagram	Hardware component
UML 1.4 Sequence diagram	Interaction instance set
UML 1.4 Sequence diagram	Link object
UML 1.4 Sequence diagram	Note
UML 1.4 Sequence diagram	Object instance
UML 1.4 Sequence diagram	Stereotype
UML 1.4 Sequence diagram	Subsystem instance
UML 1.4 Sequence diagram	Tag definition
UML 1.4 Sequence diagram	Tagged value
UML 1.4 Sequence diagram	Use case instance

### 3.1.180 UML 1.4 Statechart diagram

<b>Model type</b>	<b>Object type</b>
UML 1.4 Statechart diagram	Action
UML 1.4 Statechart diagram	Argument
UML 1.4 Statechart diagram	Class
UML 1.4 Statechart diagram	Classifier-in-state
UML 1.4 Statechart diagram	Constraint
UML 1.4 Statechart diagram	ERM attribute
UML 1.4 Statechart diagram	Event
UML 1.4 Statechart diagram	Function
UML 1.4 Statechart diagram	Note
UML 1.4 Statechart diagram	Package
UML 1.4 Statechart diagram	Parameter
UML 1.4 Statechart diagram	Product/Service
UML 1.4 Statechart diagram	Rule
UML 1.4 Statechart diagram	Signal
UML 1.4 Statechart diagram	State machine
UML 1.4 Statechart diagram	Stereotype
UML 1.4 Statechart diagram	Tag definition
UML 1.4 Statechart diagram	Tagged value
UML 1.4 Statechart diagram	UML Model

### 3.1.181 UML 1.4 Use case diagram

Model type	Object type
UML 1.4 Use case diagram	Activity graph
UML 1.4 Use case diagram	Application system type
UML 1.4 Use case diagram	Association
UML 1.4 Use case diagram	Attribute link
UML 1.4 Use case diagram	Class
UML 1.4 Use case diagram	Constraint
UML 1.4 Use case diagram	Data value
UML 1.4 Use case diagram	ERM attribute
UML 1.4 Use case diagram	Extension point
UML 1.4 Use case diagram	Function
UML 1.4 Use case diagram	Group
UML 1.4 Use case diagram	Link object
UML 1.4 Use case diagram	Note

### 3.1.197 Value stream map

Model type	Object type
Value stream map	Application system type
Value stream map	Cluster/Data model
Value stream map	Function
Value stream map	Information carrier
Value stream map	Location
Value stream map	Organizational unit
Value stream map	Person
Value stream map	Product/Service

### 3.1.198 Value-added chain diagram

Model type	Object type
Value-added chain diagram	Application system type
Value-added chain diagram	Assumption
Value-added chain diagram	Business rule
Value-added chain diagram	Class
Value-added chain diagram	Cluster/Data model
Value-added chain diagram	Customer touchpoint
Value-added chain diagram	Environment
Value-added chain diagram	Function
Value-added chain diagram	Gap
Value-added chain diagram	Group
Value-added chain diagram	KPI instance
Value-added chain diagram	Objective
Value-added chain diagram	Organizational unit
Value-added chain diagram	Organizational unit type
Value-added chain diagram	Package
Value-added chain diagram	Policy
Value-added chain diagram	Product/Service
Value-added chain diagram	Questionnaire template
Value-added chain diagram	Requirement
Value-added chain diagram	Risk
Value-added chain diagram	Role
Value-added chain diagram	Service type
Value-added chain diagram	Success factor
Value-added chain diagram	Task
Value-added chain diagram	Technical term

### 3.1.199 Whiteboard

Model type	Object type
Whiteboard	Function
Whiteboard	KPI instance
Whiteboard	Objective
Whiteboard	Text annotation

### 3.1.200 Work breakdown structure

Model type	Object type
Work breakdown structure	Function
Work breakdown structure	Requirement
Work breakdown structure	Task

### 3.1.201 XML model

Model type	Object type
XML model	Attribute
XML model	Element

### 3.1.202 Y diagram

Model type	Object type
Y diagram	Function

## 3.2 Model types - Connection types/Assignment relationship types

### 3.2.1 Access diagram

Source object type	Relationship type (active)	Relationship type (passive)	Target object type	Possible number of connections
Application system class(7) (OT_APPL_SYS_CLS)	can be located at	can be location of(165) (CT_CAN_BE_LOC_AT)	Location(54) (OT_LOC)	Unique
Application system class(7) (OT_APPL_SYS_CLS)	has as output	is output of(50) (CT_HAS_OUT)	Attribute(8) (OT_ATTR)	Unique
Application system class(7) (OT_APPL_SYS_CLS)	has as output	is output of(50) (CT_HAS_OUT)	Cluster/Data model(14) (OT_CLST)	Unique
Application system class(7) (OT_APPL_SYS_CLS)	has as output	is output of(50) (CT_HAS_OUT)	Entity type(17) (OT_ENT_TYPE)	Unique
Application system class(7) (OT_APPL_SYS_CLS)	has as output	is output of(50) (CT_HAS_OUT)	ERM attribute(19) (OT_ERM_ATTR)	Unique
Application system class(7) (OT_APPL_SYS_CLS)	has as output	is output of(50) (CT_HAS_OUT)	Relation(51) (OT_REL)	Unique
Application system class(7) (OT_APPL_SYS_CLS)	has as output	is output of(50) (CT_HAS_OUT)	Relationship type(11) (OT_RELSHP_TYPE)	Unique
Application system class(7) (OT_APPL_SYS_CLS)	has as output	is output of(50) (CT_HAS_OUT)	Technical term(58) (OT_TECH_TRM)	Unique
Application system class(7) (OT_APPL_SYS_CLS)	has as output	is output of(50) (CT_HAS_OUT)	View(57) (OT_VIEW)	Unique

Source object type	Relationship type (active)	Relationship type (passive)	Target object type	Possible number of connections
Application system class(7) (OT_APPL_SYS_CLS)	supports	is supported by(221) (CT_CAN_SUPP_1)	Service type(294) (OT_FUNC_CLUSTER)	Unique
