Document Conventions

Convention	Description
Bold	Identifies elements on a screen.
Monospace font	Identifies service names and locations in the format <i>folder.subfolder.service</i> , APIs, Java classes, methods, properties.
<i>Italic</i>	Identifies: Variables for which you must supply values specific to your own situation or environment. New terms the first time they occur in the text. References to other documentation sources.
Monospace font	Identifies: Text you must type in. Messages displayed by the system. Program code.
{ }	Indicates a set of choices from which you must choose one. Type only the information inside the curly braces. Do not type the { } symbols.
	Separates two mutually exclusive choices in a syntax line. Type one of these choices. Do not type the symbol.
[]	Indicates one or more options. Type only the information inside the square brackets. Do not type the [] symbols.
...	Indicates that you can type multiple options of the same type. Type only the information. Do not type the ellipsis (...).

Online Information and Support

Product Documentation

You can find the product documentation on our documentation website at <https://documentation.softwareag.com>.

Product Training

You can find helpful product training material on our Learning Portal at <https://learn.software-ag.com>.

Tech Community

You can collaborate with Software GmbH experts on our Tech Community website at <https://tech-community.softwareag.com>. From here you can, for example:

- Browse through our vast knowledge base.
- Ask questions and find answers in our discussion forums.
- Get the latest Software GmbH news and announcements.
- Explore our communities.
- Go to our public GitHub and Docker repositories at <https://github.com/softwareag> and <https://hub.docker.com/publishers/softwareag> and discover additional Software GmbH resources.

Product Support

Support for Software GmbH products is provided to licensed customers via our Empower Portal at <https://empower.softwareag.com>. Many services on this portal require that you have an account. If you do not yet have one, you can request it at <https://empower.softwareag.com/register>. Once you have an account, you can, for example:

- Download products, updates and fixes.
- Search the Knowledge Center for technical information and tips.
- Subscribe to early warnings and critical alerts.
- Open and update support incidents.
- Add product feature requests.

Data Protection

Software AG products provide functionality with respect to processing of personal data according to the EU General Data Protection Regulation (GDPR). Where applicable, appropriate steps are documented in the respective administration documentation.

3

Prerequisites

See Adabas System Coordination Install documentation, section Prerequisites.

4

New Features

■ License File Requirements	10
-----------------------------------	----

The following features are new for Version 8.6.1:

License File Requirements

Starting with version 8.6 SP1, the Adabas System Coordinator daemon requires an associated license file.

Note: If the Adabas System Coordinator license file is unavailable or erroneous, client jobs that require COR daemon services may fail to initialize correctly and will receive RSP101 subcode 59s, accompanied by message COR079E.

For further information regarding the new license requirements, refer to the License section.

For installation information regarding the new license requirements, refer to the Installation Procedure section.

For general information on Adabas licensing procedures, license check software, and license files, refer to the *Mainframe Product Licensing* topic in the *Adabas for Mainframes* documentation.

5 Enhancements

■ Improved CICSplex Support	12
■ DSPSCOPE – Change in Default Parameter Value	12

The following features have been enhanced for Version 8.6.1:

Improved CICSplex Support

Support for CICS multi-system dynamic transaction routing (CICSplex) has been improved.

When defining a CICS DTR client runtime control, a new field in the client configuration screen (Enable CICSplex DTR) will indicate that the CICS DTR job is multi-system.

For information on the required configuration refer to the Multi-system dynamic transaction routing section.

DSPSCOPE – Change in Default Parameter Value

The default value for the DSPSCOPE daemon runtime parameter has been changed from COMMON to ALL. This should have no effect since DSPSCOPE=ALL has been a prerequisite for the successful operation of the COR daemon since z/OS 2.4. For more information on this daemon runtime parameter, refer to DSPSCOPE - Dataspace Scope.

6 Discontinued Support

None.

7

Installation

Install Adabas System Coordinator before any Adabas add-on options are installed. Refer to the section Adabas System Coordinator Installation for more information.

The Adabas System Coordinator product supplied with Adabas is in demonstration mode. In this mode, the only components installed are those required to support the Adabas Fastpath AFPLOOK tool and the Adabas Vista AVILOOK tool. The full product is supplied when any add-on product is purchased, and Adabas System Coordinator switches automatically to full execution mode.

8 Required Maintenance

During the final certification stages of this release fixes are produced after the final freeze of the installation kit. Depending upon timing some or all of the available fixes may be supplied with the kit in an “all zaps” dataset. These fixes, and any others that also appear in Empower, should be applied during the installation process. The following fixes are currently known to be required:

Fixes Required For Adabas System Coordinator

none

9 Restrictions

Adabas client-based products are not compatible with the Adabas DBID/SVC routing feature.

10

General Considerations

None.

11

Upgrading from Earlier Versions

Refer to Upgrading from Earlier Versions in the main documentation for instructions and considerations for upgrading to this new version of Adabas System Coordinator.
