

Release Notes ESP v7.5.1.0 – October 2026

This document highlights version changes and enhancements to:
EspMenu, EspBatch, EspControl and EspAuto

EspBatch

Before upgrading EspBatch all jobs must be completed, use functions JS010 & JS012 to ensure that all jobs have either been completed/deleted.

Overall product functionality remains the same as ESP v7.4.1.0 with minor performance improvements.

EspMenu

No changes.

EspControl

Enhanced logging for debugging.

EspAuto

Overall product functionality remains the same as ESP v7.4.1.0 with minor performance improvements.

Incompatibilities for versions prior to v7.3.1. Requires a CATAL in user environment after upgrade.

JSC102	ESPRJE interface (Client objects that execute JSC102 must be cataloged)
JS315	SCL's exported via EspBatch function JS315 cannot be imported into the new EspBatch versions.

ESP v7.5.1 manuals are consistent with ESP v7.4.1 manuals are no functional product changes have been made.
