

Con-nect

Release Notes

Version 3.4.3

November 2016

Dieses Dokument gilt für Con-nect ab Version 3.4.3.

Hierin enthaltene Beschreibungen unterliegen Änderungen und Ergänzungen, die in nachfolgenden Release Notes oder Neuausgaben bekanntgegeben werden.

Copyright © 1985-2016 Software AG, Darmstadt, Deutschland und/oder Software AG USA, Inc., Reston, VA, USA, und/oder ihre Tochtergesellschaften und/oder ihre Lizenzgeber.

Der Name Software AG und die Namen der Software AG Produkte sind Marken der Software AG und/oder Software AG USA Inc., einer ihrer Tochtergesellschaften oder ihrer Lizenzgeber. Namen anderer Gesellschaften oder Produkte können Marken ihrer jeweiligen Schutzrechtsinhaber sein.

Nähere Informationen zu den Patenten und Marken der Software AG und ihrer Tochtergesellschaften befinden sich unter <http://documentation.softwareag.com/legal/>.

Diese Software kann Teile von Software-Produkten Dritter enthalten. Urheberrechtshinweise, Lizenzbestimmungen sowie zusätzliche Rechte und Einschränkungen dieser Drittprodukte können dem Abschnitt "License Texts, Copyright Notices and Disclaimers of Third Party Products" entnommen werden. Diese Dokumente enthalten den von den betreffenden Lizenzgebern oder den Lizenzen wörtlich vorgegebenen Wortlaut und werden daher in der jeweiligen Ursprungssprache wiedergegeben. Für einzelne, spezifische Lizenzbeschränkungen von Drittprodukten siehe PART E der Legal Notices, abrufbar unter dem Abschnitt "License Terms and Conditions for Use of Software AG Products / Copyrights and Trademark Notices of Software AG Products". Diese Dokumente sind Teil der Produktdokumentation, die unter <http://softwareag.com/licenses> oder im Verzeichnis der lizenzierten Produkte zu finden ist.

Die Nutzung dieser Software unterliegt den Lizenzbedingungen der Software AG. Diese Bedingungen sind Bestandteil der Produktdokumentation und befinden sich unter <http://softwareag.com/licenses> und/oder im Wurzelverzeichnis des lizenzierten Produkts.

1 Release Notes

This document describes the new and modified features for Con-nect/Con-form Version 3.4.3, Con-nect Teleservices Version 2.6.3, and Con-nect SNADS Version 1.5.3. It consists of the following sections:

Installation	Changes for installation and documentation prerequisites.
New Features and Enhancements	Detailed information about what is new and what has changed in this version.
Notice of Future Changes	Information on changes that are planned for a future version.

2 Installation

■ Installation Prerequisites	4
------------------------------------	---

Installation Prerequisites

Con-nect is a subsystem of Natural. Con-nect/Con-form Version 3.4.3, Con-nect Teleservices Version 2.6.3, and Con-nect SNADS Version 1.5.3 are compatible with Natural Version 8.2.2 or above.

The prerequisites for Con-nect are listed in *General Information for Con-nect* in the *Con-nect Installation and Operations* documentation.

The prerequisites for Con-form are listed in *General Information* in the *Con-form Installation* documentation.

Since Natural no longer supports VM/CMS, Con-nect and Con-form do not support this either.

3

New Features and Enhancements

■ Installation	6
■ Application Programming Interface	6
■ Con-form	7

Installation

For Con-nect, the error messages are now contained in the INPL data sets.

Application Programming Interface

Return Code 02

The meaning of the return code 02 has been enhanced. It is now also used in batch mode when a cabinet is locked. See also *Con-nect Application Programming Interface*, section *Return Codes*.

Z-DIS17C

This is a new API subprogram which can be used to display a list of members of a specific shared cabinet. The list also includes the profile type of each member cabinet (shared cabinet profile, private cabinet profile or special profile). See *Con-nect Application Programming Interface*, section *Z-DIS17C*.

Z-DIS17F

This is a new API subprogram which can be used to display the cabinet profile of a specific member of a shared cabinet. See *Con-nect Application Programming Interface*, section *Z-DIS17F*.

Z-ERA05A

This is a new API subprogram which can be used to mark a cabinet for deletion and at the same time lock access to this cabinet. See *Con-nect Application Programming Interface*, section *Z-ERA05A*.

Con-form

.OP DAS - Number of Characters After the Decimal Character

It is now possible to define up to 29 digits after the decimal character. With previous versions, this was restricted to 7 digits. See *Con-form User's Guide*, section *Decimal Numbers*.

4 Notice of Future Changes

Con-nect Version 3.4.3 is the last version which supports Con-nect SNADS.
