

# Invoking and Terminating SYSDDM

This section provides instructions for invoking and terminating the utility SYSDDM.

**▶ To invoke the SYSDDM utility**

- Enter the following Natural system command:

```
SYSDDM
```

Or:

1. From the Natural main menu, choose **Maintenance and Transfer Utilities** to display the **Maintenance and Transfer Utilities** menu.
2. From the **Maintenance and Transfer Utilities** menu, choose **Maintain DDMs**.

The menu of the SYSDDM utility appears as shown in the example below:

```

10:01:44          ***** NATURAL SYSDDM UTILITY *****          2008-07-24
User SAG                      - Menu -                      FDIC (10,460)
                                                Work area empty

          DDM Maintenance          List/Copy Services

          E Edit DDM              L List DDMs
          R Read DDM              X List DDMs with Additional Information
          C Catalog DDM           S Show Defined DBIDs and Used FNRs
          U Delete DDM            M Copy DDM to Another FDIC File
          ? Help
          . Exit

                                Other Services

                                G Generate DDM from Adabas FDT
                                B SQL Services (NDB/NSQ)
                                D DL/I Services
                                Z SQL Services (NSB)

Code ..... _          FDIC Type ..... A
DDM Name .. _____ DDM Type ..... _
FNR ..... 0          DBID .. 0          Adabas Password ..
Replace ... N          DBID Type ..... 7

Command ==>
Enter-PF1---PF2---PF3---PF4---PF5---PF6---PF7---PF8---PF9---PF10--PF11--PF12---
          Help          Exit                      Canc
    
```

The fields and functions provided on the SYSDDM utility menu are explained in the section *Using SYSDDM Maintenance and Service Functions*.

**▶ To terminate the SYSDDM utility**

- In the SYSDDM utility menu, press PF3 (Exit).

Or:

In the Command line enter a period (.).
