VM/CMS Environment

This part contains information about Natural in a VM/CMS environment.

The following topics are covered:

●	Natural under VM/CMS	Explains topics such as issuing CP and CMS commands from Natural, reading the CMS program stack, hardcopy function and applying fixes to Natural. In addition, links are available to topics that apply when you are using Natural under CMS in batch mode.
●	Print File and Work File Support	Provides information on how to define print files and work files in the Natural parameter module.
