Natural Shared Nucleus under z/OS and z/VSE

The function and the use of the shared nucleus are almost identical under the operating systems z/OS and z/VSE.

To avoid redundant descriptions, reference is made to the corresponding document for the z/OS environment. There, the following topics are covered:

- *Environment-Independent Nucleus*

- *Creating a Shared Nucleus*

- *Installing a Shared Nucleus*

- *Linking Subproducts to the Nucleus*

- *Single-Environment Shared Nucleus*

- *Environment-Dependent Nucleus*

- *Statically Linked Non-Natural Programs*

- *Dynamically Called Non-Natural Program*
