z/OS Environment z/OS Environment

z/OS Environment

This part contains information about Natural under the operating system z/OS.

The following topics are covered:

Natural under z/OS Contains an overview of special considerations

that apply when you are running Natural under

z/OS online or in batch mode.

Authorized Services Manager
Describes the functionality and operation of the

Authorized Services Manager (ASM) which is

available under z/OS.

Natural Shared Nucleus under z/OS and Explains the function and the use of the Shared

z/VSE Natural nucleus.

Natural Roll Server Functionality
 Explains the functions of the Natural Roll Server

in general, its use in a single z/OS system and in a

z/OS Parallel Sysplex environment.

Natural Roll Server Operation
Provides information on the roll server system

requirements, operation, performance tuning and

restartability.

Note:

The codes that Natural may receive when the Roll Server is used during a Natural session runtime are output by the corresponding teleprocessing interfaces (*Natural under CICS* or *Natural under IMS TM*). For a list of these codes, refer to the *Return Codes and Reason Codes of the Roll Server Request* in the *Messages and Codes* documentation.
