# CDYNAM - Dynamic Loading of Non-Natural Programs

This Natural profile parameter defines whether or not non-Natural programs can be loaded dynamically by Natural during the execution of a single Natural program.

| Possible settings | `1 - 1024` | If `CDYNAM` is set to `0`, no dynamic loading of non-Natural programs will be performed. |
| --- | --- | --- |
| | `0` | If `CDYNAM` is set to a value greater than `0`, dynamic loading of non-Natural programs will be performed by Natural. |
| **Default setting** | `> 0` | |
| **Dynamic specification** | yes | |
| **Specification within session** | no | |
