

# CM - Command Mode

This Natural profile parameter can be used to suppress Natural command mode (NEXT and MORE).

|                                     |     |   |
|-------------------------------------|-----|---|
| <b>Possible settings</b>            | ON  | NEXT and MORE are available for command input.  |
|                                     | OFF | The Natural session will be terminated whenever NEXT is encountered; the MORE line will be write-protected (no input possible). |
| <b>Default setting</b>              | ON  |   |
| <b>Dynamic specification</b>        | yes |   |
| <b>Specification within session</b> | no  |   |
