

LIBNAM - Name of External Program Load Library

This Natural profile parameter only applies under BS2000/OSD, z/OS batch mode, and TSO.

It specifies the name of the load library from which programs are to be loaded dynamically when Natural is used under BS2000/OSD, z/OS batch mode, or TSO.

Possible settings	character string	Any valid BS2000/OSD file name, or 8-byte DDNAME of load library
Default setting	none	
Dynamic specification	yes	
Specification within session	no	

Under z/OS, a JCL statement with a DDNAME that equals the LIBNAM setting also needs to be specified. By default, programs are loaded from the job steplib.
