

Listing DDMs

This section provides instructions for displaying a list of all DDMs available in an FDIC system file by using either the SYSDDM utility or the Natural system command LIST.

▶ To list all DDMs with SYSDDM

- In the SYSDDM utility menu, specify the following:

In the **Code** field, enter an L or X (see also *Description of Functions*).

In the **Name** field, enter an asterisk (*), and, in the **DBID** and **FNR** fields, enter the ID and file number of the database to be accessed by the DDMs.

For details on valid field entries, see *DDM Specification*.

The **LIST DDMs** screen appears with a selection list of all DDMs contained in the specified FDIC system file.

▶ To list all DDMs with LIST

- In the Command line, enter the following system command:

```
LIST DDM *
```

The **LIST DDMs** screen appears with a selection list of all DDMs contained in the current FDIC system file.

For information on all options available with LIST, see the relevant section in the *System Commands* documentation.
