

NAF - Administration

This section describes the functions of the Administration section of the NATSPOOL menu.

	Reports/Queues - Function 10
	Devices - Function 11
	Abstracts - Function 12
	Applications - Function 13
	Change Spool File - Function 14

Note:

When the Natural add-on product Entire Output Management is installed in your environment, an additional Function 15 is shown on the NATSPOOL menu. When you invoke this function, you access Entire Output Management.
