

DLMENU

This chapter covers the following topics:

- Example
 - Adapter Interface
 - Built-in Events
 - Properties
-

Example

The example looks as follows:

A double-line menu is displayed. When selecting a menu item, then its text is written to the status bar.

The XML layout definition is:

```
<page model="menue_02_dl_Adapter">
  <titlebar name="Double Line Menu">
  </titlebar>
  <dlmenu menuprop="menuData">
  </dlmenu>
  <header withdistance="false">
    <button name="Save">
    </button>
  </header>
  <pagebody>
  </pagebody>
  <statusbar withdistance="false">
  </statusbar>
</page>
```

The DLMENU control is positioned directly following the title bar. In its property `menuprop`, it holds a binding to the property `menuData`.

Adapter Interface

```
DEFINE DATA PARAMETER
1 ITEMS (1:*)
2 LEVEL (I4)
2 METHOD (U) DYNAMIC
2 TEXT (U) DYNAMIC
END-DEFINE
```

Built-in Events

`items.onSelectSubItem`

Properties

| Basic | | | |
|-------------------|--|------------|-------------------------|
| menuprop | Name of the adapter parameter that represents the control in the adapter. | Obligatory | |
| textid | Multi language dependent text that is displayed inside the control. The "textid" is translated into a corresponding string at runtime. Do not specify a "name" inside the control if specifying a "textid". | Optional | |
| align | Horizontal alignment of the control's content. | Optional | left center right |
| onlyoneline | If set to "true" then the DLMENU control only contains its top line - there is no second line below. Default is "false". | Optional | true false |
| cellseparatoronly | If set to "true" then only a very thin cell separator is added between two menu items. Otherwise the separation is rendered explicitly. | Optional | true false |
| comment | Comment without any effect on rendering and behaviour. The comment is shown in the layout editor's tree view. | Optional | |
