

# ACIVERS - Define ACI Version for Use with EntireX Broker ACI

For static specification, this parameter is available as a keyword subparameter of the NTRPC macro. For dynamic specification, this parameter is available as a keyword subparameter of the profile parameter RPC.

It specifies the API version to be used with the EntireX Broker ACI. The broker stub in use as well as the called EntireX Broker must support the ACI version defined here. Please, refer to the EntireX documentation for the supported API versions. The setting of ACIVERS enables special features of the EntireX Broker, depending on the API version you are using. For details, see *Setting Up an EntireX Broker Access* in the *Natural Remote Procedure Call* documentation.

ACIVERS can be specified on both the client and the server side.

<b>Possible settings</b>	1 - 9	Single-digit number.  The higher the version, the more features are available.
<b>Default setting</b>	2	API Version 2 is used.
<b>Dynamic specification</b>	yes	
<b>Specification within session</b>	no	

For additional information on Natural RPC, see the *Natural Remote Procedure Call (RPC)* documentation.
