

BPNAME - Name of Natural Global Buffer Pool

This Natural profile parameter specifies the name of the Natural global buffer pool.

Possible settings	1 - 8 characters, or blank	Name of the Natural global buffer pool. If BPNAME= ' ' (blank) is set, a <i>local</i> Natural buffer pool is used.
Default setting	blank	
Dynamic specification	yes	This parameter can only be specified dynamically.
Specification within session	no	

For general information, see *Natural Global Buffer Pool* in the *Operations* documentation.

This parameter can only be specified dynamically. It corresponds to the NAME specification of the BPI profile parameter or the NTBPI macro respectively.

The BPNAME profile parameter only applies to the primary Natural global buffer pool (TYPE=NAT, SEQ=0). If there is a primary buffer pool with SEQ=0 in NATPARM, only the NAME setting of this buffer pool is updated. Internally, the BPNAME specification is converted into an equivalent BPI specification.

Example:

BPNAME=GBP1 is converted into: BPI=(TYPE=NAT,SEQ=0,NAME=GBP1)
