

DC - Character for Decimal Point Notation

This Natural profile and session parameter determines the character to be used for decimal point notation.

Within a Natural session, the profile parameter DC can be overridden by the session parameter DC.

Possible settings	any character (except numeric characters)	You specify the DC parameter as DC= ' c ' where <i>c</i> represents the character to be used as decimal point. The character specified with the DC parameter <ul style="list-style-type: none"> • must not be the same as the one specified with the IA profile/session parameter (input assign character) or ID profile/session parameter (input delimiter character), • should not be the same as the one specified with the CF profile/session parameter (control character for terminal commands) or HI profile parameter (help character). 		
Default setting	. (period)			
Dynamic specification	yes			
Specification within session	yes	Applicable Statements:	SET GLOBALS	Parameter is evaluated at runtime.
		Applicable Command:	GLOBALS	Parameter may be specified dynamically with the GLOBALS system command.
Application Programming Interface	USR0350N, USR1005N *	See <i>SYSEXT - Natural Application Programming Interfaces</i> in the <i>Utilities</i> documentation. * Recommended.		

Under Natural Security: The setting of this parameter can be overridden by the Session Parameters option of the Library Profile.
