

RPCSIZE - Size of Buffer Used by Natural RPC

For static specification, this parameter is available as a keyword subparameter of the NTRPC macro. For dynamic specification, this parameter is available as a keyword subparameter of the profile parameter RPC.

It specifies the size of the buffer used by Natural RPC. If the specified size is not large enough, the buffer will be increased on request.

RPCSIZE can be specified on both the client and the server side.

Possible settings	1 – 2097151 0	Buffer size in KB. Natural RPC cannot be used.
Default setting	0	
Dynamic specification	yes	
Specification within session	no	

For further information on Natural RPC, see the *Natural Remote Procedure Call (RPC)* documentation.
