SRETAIN - Retain Source Format

This Natural profile parameter specifies the encoding format for new and existing Natural sources when they are saved.

See also Profile Parameters in the Unicode and Code Page Support documentation.

Possible settings	OFF (ON, EXCEPTNEW)	The original code page of an existing Natural source is retained. If an existing Natural source without code page information is saved, it will not receive any code page information. When a new Natural source is created, it will be saved in the default code page format as defined with the profile parameter CP. Natural sources will be saved in the default code page format. The original code page of an existing Natural source is retained. If an existing Natural source without code page information is saved, it will not receive any code page information. When a new Natural source is created, it will be saved without code page information. (ON, EXCEPTNEW) retains the compatibility of newly created Natural sources with existing applications that have been created with earlier Natural versions that did not provide code page support. Note: The value (ON, EXCEPTNEW) is supported on
		mainframe computers only.
Default setting	ON	
Dynamic specification	yes	
Specification within session	no	

For the code page of a Natural source that is saved or stowed, the resulting encoding depends on the settings of the profile parameters SRETAIN and CP. See *Code Page Support for Editors, System Commands and Utilities on the Mainframe* in the *Unicode and Code Page Support* documentation.
