ZP - Zero Printing

This Natural profile and session parameter specifies how a field which contains a setting of all zeros is to be output; that is, it is used to suppress the display of a numeric field (format N, I, P or F) or time field (format T) which contains a value of all zeros.

Within a Natural session, the profile parameter ZP can be overridden by the session parameter ZP.

Possible settings	ON	Each field value which consists of all zeros is output as one zero, right justified (for numeric fields) or all zeros (for time fields).
	OFF	Each field value which consists of all zeros is suppressed.
Default setting	ON	
Dynamic specification	yes	

Specification within session	yes	Applicable Statements:
		
		 `DISPLAY`
		`FORMAT`
		`INPUT`
		`PRINT`
		`REINPUT`
		`SET GLOBALS`
		`WRITE`

		Applicable Command: `GLOBALS`
Application Programming Interface	USR1005N	See *SYSEXT - Natural Application Programming Interfaces* in the *Utilities* documentation.
