

RENUMBER

| |
|--------------------------------|
| RENUMBER [(<i>n</i>)] |
|--------------------------------|

This command is used to renumber the lines in the source program currently in the source work area.

| | |
|---------------------------------|---|
| RENUMBER | If you enter the command without parameter, the increment to be used for renumbering is 10. |
| RENUMBER (<i>n</i>) | <i>n</i> can be used to specify a value between 1 and 10 as increment for renumbering. |
