SYSAPI

<div style="border:1px solid black; display:inline-block; padding:4px 12px;">

`SYSAPI`

</div>

This command is used to invoke the `SYSAPI` utility.

This utility is used to locate Application Programming Interfaces (APIs) provided by Natural add-on products such as Entire Output Management (NOM).

For each API, the utility `SYSAPI` provides one or more example programs that contain a functional description of the API and that can be used to test the effect of the API.

For further information, see *SYSAPI - APIs of Natural Add-on Products* in the *Utilities* documentation.
