TEST DBLOG

> **TEST DBLOG** [*parameters*]

This command invokes the DBLOG utility, which is used for logging database calls.

TEST DBLOG	Activates or deactivates the DBLOG utility.
parameters	The parameters that apply to TEST DBLOG are explained in the section *TEST DBLOG Command* of the *Utilities* documentation.

For further information, see *DBLOG Utility - Logging Database Calls* in the *Utilities* documentation.

The *Utilities* documentation also contains information on other Natural utilities used for online testing and monitoring.

Note Concerning Natural Single Point of Development:

If there is an active connection to a development server on a mainframe, the Natural mainframe utility DBLOG is invoked when this command is issued under Natural for Windows.
