

%N - Activate Non-Conversational Mode

This terminal command is used with a `SET CONTROL` statement and causes the next logical output screen to be displayed without requiring any user response for processing to continue; that is, after the screen has been displayed, processing will continue immediately without waiting for any user input.

This command may be used to send messages about the progress of program execution to the user.

Under IMS TM:

This terminal command does not apply under IMS TM. If it is used under IMS TM, it causes the next logical output screen to be suppressed.
