Listing DDMs

This section provides instructions for displaying a list of all DDMs available in an FDIC system file by using either the SYSDDM utility or the Natural system command `LIST`.

▶ To list all DDMs with SYSDDM

- In the SYSDDM utility menu, specify the following:

  In the **Code** field, enter an `L` or `X` (see also *Description of Functions*).
  In the **Name** field, enter an asterisk (*), and, in the **DBID** and **FNR** fields, enter the ID and file number of the database to be accessed by the DDMs.
  For details on valid field entries, see *DDM Specification*.

  The **LIST DDMs** screen appears with a selection list of all DDMs contained in the specified FDIC system file.

▶ To list all DDMs with `LIST`

- In the Command line, enter the following system command:

  ```
  LIST DDM *
  ```

  The **LIST DDMs** screen appears with a selection list of all DDMs contained in the current FDIC system file.

For information on all options available with `LIST`, see the relevant section in the *System Commands* documentation.
